

Historical Natural Gas Annual 1930 Through 1996

October 1997

Energy Information Administration
Office of Oil and Gas
U.S. Department of Energy
Washington, DC 20585

Contacts

The *Natural Gas Annual* is prepared by the Energy Information Administration, Office of Oil and Gas, Reserves and Natural Gas Division, under the direction of Joan E. Heinkel.

General information for this document may be obtained from Kendrick E. Brown, Jr. (202/586-6077), Chief of the Data Operations Branch. Questions and comments concerning the contents of the *Natural Gas Annual* may be directed to Ann M. Ducca (202/586-6137) and Margo Natof

(202/586-6303). Specific inquiries should be referred to the following subject specialists:

Supply.....	Audrey Corley	(202) 586-4804
	acorley@doe.eia.gov	
Transmission.....	Dolly Tolson	(202) 586-6664
	dtolson@doe.eia.gov	
Consumption.....	Sylvia Norris	(202) 586-6106
	snorris@doe.eia.gov	
Electronic versions.....	Sheila Darnell	(202) 586-6165
	sdarnell@doe.eia.gov	

Preface

The *Natural Gas Annual* provides information on the supply and disposition of natural gas to a wide audience including industry, consumers, Federal and State agencies, and educational institutions. This report, the *Historical Natural Gas Annual* presents historical data for the Nation from 1930-1996, and by State from 1967-1996.

The data in this publication are taken from surveys conducted by the Energy Information Administration (EIA), U.S. Department of Energy (DOE), to fulfill its responsibilities for gathering and reporting energy data. Two EIA surveys provide most of the information presented in this report—the mandatory Form EIA-176, “Annual Report of Natural and Supplemental Gas Supply and Disposition,” and the Form EIA-895, “Monthly Quantity and Value of Natural Gas Report.” Form EIA-176 was submitted by respondents out of an identified universe of operators of fields, wells, or natural gas processing plants who distribute gas to end users or transport gas to or across a State border; operators of synthetic natural gas plants; natural gas distributors; natural gas pipeline companies; and companies that operate underground natural gas storage facilities. Form EIA-895 was submitted by the appropriate agencies of the 33 natural gas producing States.

Data collected on Form EIA-176 are not proprietary. Selected company-level data are presented in the Demand section.

Other EIA surveys that provided information for this report are Forms EIA-816, “Monthly Natural Gas Liquids Report,” and EIA-64A, “Annual Report of the Origin of Natural Gas Liquids Production,” for gas processed, plant fuel, and extraction loss data; Form EIA-857, “Monthly Report of Natural Gas Purchases and Deliveries to Consumers,” for data on the citygate prices; Forms EIA-759, “Monthly Power Plant

Report,” and FERC-423, “Monthly Report of Cost and Quality of Fuels for Electric Plants,” for data on the quantity and price of natural gas consumed by electric utilities; and Office of Fossil Energy, “Natural Gas Imports and Exports” for data on the quantity and price of natural gas imports and exports. The EIA report, *U.S. Crude Oil, Natural Gas, and Natural Gas Liquids Reserves, Annual Reports* was the source of the reserves data.

Some of the data are collected under the authority of the Federal Energy Regulatory Commission (FERC), an independent commission within the DOE that has jurisdiction primarily in the regulation of electric utilities and the interstate natural gas industry. The United States Geological Survey (USGS) and the United States Minerals Management Service (MMS) of the Department of the Interior were sources of supplemental information on production, the number of producing gas and gas-condensate wells, and wellhead values. The geographic coverage is the 50 States and the District of Columbia.

See Appendix A of the *Natural Gas Annual 1996* report for a description of the data collection surveys, the report methodology, and survey response rates. All volumes of natural gas in this publication are reported at 14.73 pounds per square inch absolute and 60 degrees Fahrenheit, except where noted. A glossary of terms is provided to assist users in understanding the data presented. Appendix A lists additional natural gas information sources.

The tables of data that appear in this report are available on personal computer diskettes and the Internet. Visit our World Wide Web Site at: <http://www.eia.doe.gov> or see the Contacts page for specific inquiries.

NA = Not available.

Notes: Beginning with 1980 data, dry production and consumption volumes did include supplemental gas supplies, and storage volumes did include liquefied natural gas (LNG). Beginning with 1976 data, total supply and disposition do not balance on equivalent data in Table 1 due to the exclusion of intransit receipts and deliveries. Beginning with 1965 data, all volumes are shown on a pressure base of 14.73 psia at degrees Fahrenheit. For prior years, the pressure base is 14.65 psia at 60 degrees Fahrenheit.

Figure 2. Natural Gas Delivered to Consumers in the United States, 1930-1996

Note: In 1996, consumption of natural gas for agricultural use is classified as industrial use. In 1995 and earlier years, agricultural use was classified as commercial use.

NA = Not available.
Notes: Beginning with 1965 data, all volumes are shown on a pressure base of 14.73 psia at 60 degrees Fahrenheit. For prior years, the pressure base is 14.65 psia at 60 degrees Fahrenheit. Number of vehicle fuel consumers generally refers to the number of fueling stations. In 1996, consumption of natural gas for agricultural use is classified as industrial use. In 1995 and earlier years, agricultural use was classified as commercial use.

NA = Not available.
Notes: Beginning in 1987, prices for deliveries to consumers are calculated using only on-system sales data. Due to large amounts of missing data for values of lease and plant fuel since 1987, prices are not estimated. In previous years, imputations were made for missing data and a price was calculated using reported and imputed data to derive a total value for gas consumed. Since total consumption value estimates were not made since 1987, no lease and plant fuel value estimate was made. In 1996, consumption of natural gas for agricultural use is classified as industrial use. In 1995 and earlier years, agricultural use was classified as commercial use.
Sources: Electric Utilities: 1967-1977: Federal Power Commission (FPC). 1978-1996: Energy Information Administration (EIA), Form EIA-759, "Monthly Power Plant Report"; Federal Energy Regulatory Commission (FERC), Form FERC-423, "Cost and Quality of Fuels for Electric Utility Plants"; and Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition." All other data: 1967-1975: Bureau of Mines, *Minerals Yearbook*, "Natural Gas" chapter. 1976-1978: Energy Information Administration, Energy Data Report, *Natural Gas Annual*. 1979: Energy Information Administration, *Natural Gas Production and Consumption, 1979*. 1980-1996: Energy Information Administration (EIA), Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition."

^a Arizona, Florida, Missouri, and Tennessee are included in Alabama's volumes.

^b Included in gross withdrawals from gas wells or oil wells. Breakdown not provided by State agency.

^c Quantity of nonhydrocarbon gases removed at processing plants was estimated by the Kansas Corporation Commission to be less than 0.5 percent of total gross withdrawals.

* = Volume is less than 500,000 cubic feet.

^E = Estimated data.

NA = Not available.

Note: Totals may not equal sum of components due to independent rounding.

Total.....	2.17	19,750,793	42,818,138

^a Quantity and value data are for the period beginning June 1, 1980, and ending May 31, 1981.
^b Quantity and value data obtained from Energy Information Administration (EIA), U.S. Department of Energy, Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition."

^c Quantity and value data obtained from published annual reports from Pacific Gas and Electric Company and Pacific Lighting Corporation.

^d Weighted average price obtained from separate State and Outer Continental Shelf average price calculations.

^e All of Nevada's marketed production was consumed as lease fuel.

E = Estimated data.

NA = Not available.

— = Not applicable.

Note: Totals may not equal sum of components due to independent rounding.

^a Includes coke oven gas, blast furnace gas, manufactured gas, and air injection for Btu stabilization.

^b Manufactured gas.

^c Blast furnace gas.

^d Air injection for Btu stabilization.

^e Coke oven gas.

* = Volume is less than 500,000 cubic feet.

Note: Totals may not equal sum of components due to independent rounding.

^a Data for the District of Columbia are included with data for Maryland.
^b Data for New Hampshire and Vermont are included with data for Maine.
E = Estimated data.
NA = Not available.
* = Volume is less than 500,000 cubic feet.
Note: Totals may not equal sum of components due to independent rounding.
Sources: Energy Information Administration (EIA), Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition"; Form EIA-627, "Annual Quantity and Value of Natural Gas Report" (1980 through 1995); Form EIA-895, "Monthly Quantity and Value of Natural Gas Report" (1996); Form EIA-857, "Monthly Report of Natural Gas Purchases and Deliveries to Consumers"; Form EIA-816, "Monthly Natural Gas Liquids Report"; Form EIA-759, "Monthly Power Plant Report"; Forms EIA-191/FERC-8, "Underground Gas Storage Report"; Form FPC-14, "Annual Report for Importers and Exporters of Natural Gas"; Form EIA-64A, "Annual Report of the Origin of Natural Gas Liquids Production"; and the U.S. Minerals Management Service.

^a Lease fuel quantities were estimated by assuming that the proportions of on-system production used as lease fuel by respondents to the Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition," were the same as the proportions of gross withdrawals as reported on Form EIA-895, "Monthly Quantity and Value of Natural Gas Report," used as lease by all operators. Form EIA-176 respondents reported on-system production totaling 36 percent of gross withdrawals in Alaska and 6.8 percent of gross withdrawals in the lower 48 states. The average ratios of volumes "Used in well, lease, and field operations" to "Company-owned natural gas produced on-system" computed from Form EIA-176 responses were .02387 for Alaska and .02283 for the lower 48 states. Those ratios were applied to gross withdrawals from all states, where lease fuel was applicable, that did not report lease fuel use on the Form EIA-895.

Note: Totals may not equal sum of components due to independent rounding.
Sources: 1993-1995: Energy Information Administration (EIA), Form EIA-627, "Annual Quantity and Value of Natural Gas Report," estimates based upon Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition"; Form EIA-64A, "Annual Report of the Origin of Natural Gas Liquids Production"; and Form EIA-759, "Monthly Power Plant Report." 1996: EIA, Form EIA-895, "Monthly Quantity and Value of Natural Gas Report"; Form EIA-176, Form EIA-64A, and Form EIA-759.

^a Data for the District of Columbia are included with data for Maryland.

^b Data for New Hampshire and Vermont are included with data for Maine.

NA = Not available.

— = Not applicable.

Notes: Number of vehicle fuel consumers generally refers to number of fueling stations. Totals may not equal sum of components due to independent rounding. In 1996, consumption of natural gas for agricultural use is classified as industrial use. In 1995 and earlier years, agricultural use was classified as commercial use.

Sources: Electric Utility Data: 1967-1977: Federal Power Commission (FPC). 1978-1989: Energy Information Administration (EIA), Form EIA-759, "Monthly Power Plant Report"; Form FERC-423, "Cost and Quality of Fuels for Electric Utility Plants"; and Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition." Heating Value: 1975: Federal Power Commission. 1976-1979: American Gas Association, *Gas Facts*. 1980-1989: Energy Information Administration, Form EIA-176. All other data: 1967-1980: EIA, *Natural Gas Production and Consumption*. 1990-1996: Energy Information Administration (EIA), Form EIA-759, "Monthly Power Plant Report," Form FERC-423, "Cost and Quality of Fuels for Electric Utility Plants," and Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition."

* = Volume is less than 500,000 cubic feet.

Notes: Totals may not equal sum of components due to independent rounding. In 1996, consumption of natural gas for agricultural use is classified as industrial use. In 1995 and earlier years, agricultural use was classified as commercial use.

Source: 1993-1996: Energy Information Administration (EIA), Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition."

Notes: Totals may not equal sum of components due to independent rounding. In 1996, consumption of natural gas for agricultural use is classified as industrial use. In 1995 and earlier years, agricultural use was classified as commercial use.

NA = Not available.
 Note: Totals may not equal sum of components due to independent rounding. In 1996, consumption of natural gas for agricultural use is classified as industrial use. In 1995 and earlier years, agricultural use was classified as commercial use.
 Sources: Electric Utility data: 1967-1977: Federal Power Commission (FPC). 1978-1996: Energy Information Administration (EIA), Form EIA-759, "Monthly Power Plant Report" (formerly FPC-4); Form FERC-423, "Cost and Quality of Fuels for Electric Utility Plants" (formerly FPC-423); and Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition." Heating Value: 1975: Federal Power Commission. 1976-1979: American Gas Association, *Gas Facts*. 1980-1989: EIA, Form EIA-176. All other data: 1967-1980: EIA, *Natural Gas Production and Consumption*.

^a Data for the District of Columbia are included with data for Maryland.

^b Data for New Hampshire and Vermont are included with data for Maine.

NA = Not available.

Note: Beginning in 1987, prices for gas delivered to consumers are calculated using only onsystem sales data. In previous years, prices were calculated using reported values and values imputed for gas delivered for the account of others.

^a Data for the District of Columbia are included with Maryland.

^b Data for New Hampshire and Vermont are included with data for Maine.

— = Not applicable.

Note: Beginning in 1987, prices for gas delivered to consumers are calculated using only onsystem sales data. In previous years, prices were calculated using reported values and values imputed for gas delivered for the account of others.

^a Includes take or pay, fixed minimum bill, and/or other fixed charges.

— = Not applicable.

Note: Totals may not equal sum of components due to independent rounding. In 1996, consumption of natural gas for agricultural use is classified as industrial use. In 1995 and earlier years, agricultural use was classified as commercial use.

Sources: 1993-1996: Energy Information Administration, Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition."

^a Data for the District of Columbia are included with data for Maryland.

^b Data for New Hampshire and Vermont are included with data for Maine.

NA = Not available.

Note: Beginning in 1987, industrial costs per consumer are not calculated since values associated with gas delivered for the account of others are not available. Each year since 1982, these values have represented an increasingly large portion of the total industrial value. By 1987, a meaningful average cost per consumer could no longer be calculated without them.

Sources: Bureau of Mines (BOM), Forms BOM-6-1340-A and BOM-6-1341-A, "Supply and Disposition of Natural Gas;" and Energy Information Administration (EIA), Form EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition."

Total.....	95	602	669	3,616	43,050	1,144

* = Volume is less than 500,000 cubic feet.

Note: Beginning in 1987, industrial costs per consumer are not calculated since values associated with gas delivered for the account of others are not available. Each year since 1982, these values have represented an increasingly large portion of the total industrial value. By 1987, a meaningful average cost per consumer could no longer be calculated without them.

Selected Natural Gas and Related Reports

Selected Natural Gas and Related Reports

Recurring Natural Gas Reports

- *Natural Gas Annual 1996*, DOE/EIA-0131(96). Provides information on the supply and disposition of natural gas in the United States for 1992-1996.
- *Natural Gas Monthly*, DOE/EIA-0130. Published monthly.

Other Reports Covering Natural Gas, Natural Gas Liquids, and Other Energy Sources

- *Monthly Energy Review*, DOE/EIA-0035. Published monthly. Provides national aggregate data for natural gas, natural gas liquids, and other energy sources.
- *Short-Term Energy Outlook*, DOE/EIA-0202. Published quarterly. Provides forecasts for next six quarters for natural gas and other energy sources.
- *Natural Gas 1996: Issues and Trends*, DOE/EIA-0560(96), December 1996.
- *U.S. Crude Oil, Natural Gas, and Natural Gas Liquids Reserves -1996 Annual Report*, DOE/EIA-0216(96)/Advance Summary, September 1997.
- *Annual Energy Review 1996*, DOE/ EIA-0384(96), July 1997. Published annually.
- *State Energy Data Report, Consumption Estimates, 1960-1994*, DOE/EIA-0214(94), October 1996.

- *Annual Report to Congress 1996*, DOE/ EIA-0173(96), July 1997. Published annually.
- *Annual Energy Outlook 1997*, DOE/ EIA-0383(97), December 1996. Published annually.
- *State Energy Price and Expenditure Report 1970-1994*, DOE/EIA-0376(94), June 1997.

One-Time Reports

- *The Value of Underground Storage in Today's Natural Gas Industry*, DOE/EIA-0591, March 1995.
- *Energy Policy Act Transportation Study: Interim Report of Natural Gas Flows and Rates*, DOE/EIA-0602, October 1995.
- *Natural Gas Productive Capacity for the Lower 48 States 1980 Through 1995*, DOE/EIA-0542(95), July 1994.

Reference Reports

- *Directory of Energy Data Collection Forms*, DOE/ EIA-0249(95), January 1996.
- *Oil and Gas Field Code Master List, 1995*, EIA-0370(95), December 1996.

Glossary

Balancing Item: Represents differences between the sum of the components of natural gas supply and the sum of the components of natural gas disposition. These differences may be due to quantities lost or to the effects of data-reporting problems. Reporting problems include differences due to the net result of conversions of flow data metered at varying temperature and pressure bases and converted to a standard temperature and pressure base; the effect of variations in company accounting and billing practices; differences between billing cycle and calendar period time frames; and imbalances resulting from the merger of data-reporting systems that vary in scope, format, definitions, and type of respondents.

Biomass Gas: A medium Btu gas containing methane and carbon dioxide, resulting from the action of microorganisms on organic materials such as a landfill.

British Thermal Unit (Btu): The quantity of heat required to raise the temperature of 1 pound of water by 1 degree Fahrenheit at or near 39.2 degrees Fahrenheit.

City Gate: A point or measuring station at which a gas distribution company receives gas from a pipeline company or transmission system.

Coke Oven Gas: The gaseous portion of volatile substances driven off in the coking process after other coal chemicals are removed.

Commercial Consumption: Gas used by nonmanufacturing establishments or agencies primarily engaged in the sale of goods or services. Included are such establishments as hotels, restaurants, wholesale and retail stores and other service enterprises; gas used by establishments engaged in forestry and fisheries; and gas used by local, State, and Federal agencies engaged in nonmanufacturing activities.

Delivered: The physical transfer of natural, synthetic, and/or supplemental gas from facilities operated by the responding company to facilities operated by others or to consumers.

Dry Natural Gas Production: Marketed production less extraction loss.

Electric Utility: An enterprise that is engaged in the generation, transmission, or distribution of electric energy

primarily for use by the public and that is the major power supplier within a designated service area. Electric utilities include investor-owned, publicly-owned, cooperatively-owned, and government-owned (municipals, Federal agencies, State projects, and public power districts) systems.

Electric Utility Consumption: Gas used as fuel in electric utility plants.

Exports: Natural gas deliveries out of the continental United States and Alaska to foreign countries.

Extraction Loss: The reduction in volume of natural gas due to the removal of natural gas liquid constituents such as ethane, propane, and butane at natural gas processing plants.

Flared: Natural gas burned in flares at the base site or at gas-processing plants.

Gas Condensate Well: A gas well that produces from a gas reservoir containing considerable quantities of liquid hydrocarbons in the pentane and heavier range generally described as "condensate."

Gas Well: A well completed for the production of natural gas from one or more gas zones or reservoirs.

Gross Withdrawals: Full well-stream volume, including all natural gas plant liquids and all nonhydrocarbon gases, but excluding lease condensate.

Heating Value: The average number of British thermal units per cubic foot of natural gas as determined from tests of fuel samples.

Imports: Gas receipts into the United States from a foreign country.

Industrial Consumers: Establishments engaged in a process which creates or changes raw or unfinished materials into another form or product. Generation of electricity, other than by electric utilities, and agricultural uses are included.

Industrial Consumption: Natural gas used by manufacturing and mining establishments and for agricultural purposes for heat, power, and chemical feedstock.

Intransit Deliveries: Redeliveries to a foreign country of foreign gas received for transportation across U.S. territory and deliveries of U.S. gas to a foreign country for transportation across its territory and redelivery to the United States.

Intransit Receipts: Receipts of foreign gas for transportation across U.S. territory and redelivery to a foreign country and redeliveries to the United States of U.S. gas transported across foreign territory.

Lease Fuel: Natural gas used in well, field, and lease operations such as gas used in drilling operations, heaters, dehydrators, and field compressors.

Liquefied Natural Gas (LNG): Natural gas (primarily methane) that has been liquefied by reducing its temperature to minus 260 degrees Fahrenheit at atmospheric pressure.

Manufactured Gas: A gas obtained by destructive distillation of coal, or by the thermal decomposition of oil, or by the reaction of steam passing through a bed of heated coal or coke. Examples are coal gases, coke oven gases, producer gas, blast furnace gas, blue (water) gas, carbureted water gas. Btu content varies widely.

Marketed Production: Gross withdrawals less gas used for repressuring, quantities vented and flared, and nonhydrocarbon gases removed in treating or processing operations.

Natural Gas: A mixture of hydrocarbon compounds and small quantities of various nonhydrocarbons existing in the gaseous phase or in solution with crude oil in natural underground reservoirs at reservoir conditions.

Natural Gas, Wet After Lease Separation: The volume of natural gas remaining after removal of lease condensate in lease and/or field separation facilities, if any, and after exclusion of nonhydrocarbon gases where they occur in sufficient quantity to render the gas unmarketable. Natural gas liquids may be recovered from volumes of natural gas, wet after lease separation, at natural gas processing plants.

Nonhydrocarbon Gases: Typical nonhydrocarbon gases which may be present in reservoir natural gas, such as carbon dioxide, helium, hydrogen sulfide, and nitrogen.

Nonutility Power Producers: A company which owns electric generating capacity and is not an electric utility. Nonutility power producers include qualifying cogenerators, qualifying small power producers, and other nonutility generators including independent power producers.

Offshore Reserves and Production: Unless otherwise indicated, reserves and production that are in either State or Federal domains, located seaward of the coastline.

Oil Well (Casinghead) Gas: Associated and dissolved gas produced along with crude oil from oil completions.

Outer Continental Shelf: Offshore Federal domain.

Pipeline: A continuous pipe conduit, complete with such equipment as valves, compressor stations, communications systems, and meters, for transporting natural and/or supplemental gas from one point to another, usually from a point in or beyond the producing field or processing plant to another pipeline or to points of use. Also refers to a company operating such facilities.

Pipeline Fuel: Gas consumed in the operation of pipelines, primarily in compressors.

Plant Fuel: Natural gas used as fuel in natural gas processing plants.

Production, Wet After Lease Separation: Gross withdrawals less gas used for repressuring and nonhydrocarbon gases removed in treating or processing operations.

Propane-air: A mixture of propane and air resulting in a gaseous fuel suitable for pipeline distribution.

Proved Reserves: The estimated quantities that analysis of geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known oil and gas reservoirs under existing economic and operating conditions.

Receipts: Gas physically transferred into the responding company's transportation, storage, and/or distribution facilities.

Refinery Gas: Noncondensate gas collected in petroleum refineries.

Repressuring: The injection of gas into oil or gas reservoir formations to effect greater ultimate recovery.

Residential Consumption: Gas used in private dwellings, including apartments, for heating, air-conditioning, cooking, water heating, and other household uses.

Storage Additions: Volumes of gas injected or otherwise added to underground natural gas reservoirs or liquefied natural gas storage.

Storage Withdrawals: Volumes of gas withdrawn from underground storage or liquefied natural gas storage.

Supplemental Gaseous Fuels Supplies: Synthetic natural gas, propane-air, coke oven gas, refinery gas, biomass gas, air injected for Btu stabilization, and manufactured gas commingled and distributed with natural gas.

Synthetic Natural Gas (SNG): A manufactured product chemically similar in most respects to natural gas, resulting from the conversion or reforming of petroleum hydrocarbons or from coal gasification. It may easily be substituted for or interchanged with pipeline quality natural gas.

Therm: One hundred thousand British thermal units.

Underground Storage: The storage of natural gas in underground reservoirs at a different location from which it was produced.

Underground Storage Injections: Gas from extraneous sources put into underground storage reservoirs.

Underground Storage Withdrawals: Gas removed from underground storage reservoirs.

Unit Value, Consumption: Total price per specified unit, including all taxes, at the point of consumption.

Unit Value, Wellhead: The wellhead sales price, including charges for natural gas plant liquids subsequently removed from the gas, gathering and compression charges, and State production, severance, and/or similar charges.

Vented: Gas released into the air on the base site or at processing plants.
