

ORGANIC LIVESTOCK & GRAZING RESOURCES

UPDATED JANUARY, 2007

Compiled by:

Lisa McCrory, Coordinator for the Northeast Organic Farming Association of Vermont's Dairy Technical Assistance Program

NOFA-VT would like to thank the UVM Center for Sustainable Agriculture's Vermont Pasture Network Program for contributing to this resource listing

With Ohio additions by:

Charlotte Bedet, OEFFA volunteer

Organic Livestock and Grazing Resources

These resources have been put together by the Northeast Organic Farming Association's Dairy Technical Assistance Program, with additions for Ohio by Ohio grazers, educators and researchers. Enclosed you should be able to find numerous alternative animal health products, organic mineral packages, organic fertilizers, organic grain, animal health consultants and other useful tools for your organic operation, as well as resources for grazing systems management. If you have any questions about organic agriculture or production methods you can contact the OEFFA office at 614-421-2022, check out the OEFFA website: <http://www.oeffa.org/certification.php> or email them at organic@oeffa.org. See section 14 of this directory for more information. Thanks to everyone who contributed their time and information!

This directory is growing, and we'd appreciate your additions! Please send them to: Laura Wies, OEFFA, PO Box 82234, Columbus, OH 43202, or to oeffa@oeffa.org, or to 614-421-2022

Please send info to the address listed on page 2 of this directory. Thanks.

8) Milk Testing Labs (important for Milk Urea Nitrogen: MUN)

Dairy Herd Improvement Association: DHIA <http://www.dhia.org/dhialabs.htm>

DHI Cooperative - Columbus, Phone: 614-545-0460, Contact: Brian Winters

DHI Cooperative - Dalton, Phone: 330-828-8882, Contact: Brian Winters

Eastern Lab Services, Phone: 877-357-5227, Contact: John Rhoads

Some milk carriers test for milk urea nitrogen (MUN), but don't include this number on your milk slip. To find out if your carrier is testing for MUN, ask your milk truck driver, check with your Milk Market Administrator, or see the listings that your state Department of Agriculture Dairy Division has compiled of milk carriers and what they are testing for. **These bulk tank MUN readings can provide you with valuable information about the protein/energy balance in your herd.** Talk to your DHIA rep., nutritionist, dairy extension agent or veterinarian for more details. Better yet, get all of them talking together about your MUN's (**especially if you're a grazer**)! See MUN fact sheets for details on testing. Some MUN websites are listed on bottom of page 19 of this directory.

9) Soil and Forage Testing Services and Fertility Recommendations

The following labs are certified to test soil & forage and have completed the NFTA (National Forage Testing Association) certification test. For more labs: http://www.foragetesting.org/certified_labs.php
If you chose a lab based on philosophy rather than credentials, you may be wasting your money!
 For tips on taking your own samples, see extension bulletins in section 13 of this directory.
