

ENTOMOLOGY SEMINAR SCHEDULE

FALL 2008

Tuesdays 4:00–5:00 p.m., East Campus Union
Refreshments - 3:45 p.m.

- September 16 Integrated management of cereal stem borers in Ethiopia
Belay Kondidie, Entomology Graduate Student
- September 23 OPEN DATE
- September 30 Catching insects in the act: remote sensing applications in entomology
Abby Stilwell, Entomology Graduate Student
- October 7 Complex signaling and variable female preferences in wolf spiders
Dr. Eileen Hebets, School of Biological Sciences, UNL
- October 14 Fitness costs of insect resistance to *Bacillus thuringiensis*
Dr. Aaron Gassmann, Dept. of Entomology, Iowa State University
- October 21 Fall Break
- October 28 The insect orders: what are the real lineages?
Jesus Orozco-Araujo, Entomology Graduate Student
- November 4 Pregnant women, mosquitoes, and malaria: why pregnant women are more attractive to malaria vectors
Amanda Fujikawa, Entomology Graduate Student
- November 11 Blackboard: not just for distance
Terry Workman, Instructional Design Tech Specialist
Extended Education and Outreach, UNL
- November 18 No seminar, ESA meetings, Reno, NV
- November 25 Insect immunity: new questions, genomic answers
Tim Husen, Entomology Graduate Student
- December 2 West Nile virus and its presence in the United States of America
Ralph Narain, Entomology Graduate Student
- December 9 Effect of climatic factors on vector borne diseases transmitted by *Aedes* mosquitos in Thailand
"Kim" Tangtrakulwanich, Entomology Graduate Student
