

Ecofin, LLC
(Subsidiary to Alltech Inc.)

Corporate HQ: Nicholasville, Kentucky

Proposed Facility Location: Washington County, Kentucky

Description:

To design, construct, operate, and validate the feasibility of commercializing an environmentally sound integrated process that uses novel, solid-state enzyme complexes to convert a potentially wide range of lignocellulosic feedstocks to ethanol and other vendible products.

CEO or Equivalent: Dr. Pearse Lyons, Alltech Inc Founder and CEO

Participants: University of Cincinnati, University of Kentucky, Alltech Inc.

Production:

- Capacity of more than 1 million gallons per year of cellulosic ethanol

Technology and Feedstocks:

- Solid state fermentation process developed by Alltech
- Corncobs

State of Readiness:

- Estimated to be operational in 2010
