A New Farm Enterprise Incubator

I've always wanted to farm, but getting started seems so difficult.

The PLANT Farm Enterprise Incubator seeks to revitalize agricultural activity in Orange County & the Piedmont Region through training on small scale sustainable farming techniques with a focus on vegetable production.

All apprentices must complete the 8 week training course and submit an adequate business plan and field crop plan by March 15th.

If needed, land can be requested in ¼ acre increments.

The PLANT @ BREEZE program will provide some equipment and tools.

PLANT @ BREEZE TRAINING SERIES
