

## Profile: Joyce Merritt

Joyce Merritt is a graduate student in the Doctor of Plant Medicine program and is enrolled in the Certificate in Plant Pest Risk Assessment and Management program. She has worked as a publications specialist at IPM Florida since October 2006. She received a B.S. in Biology from Loma Linda University and a M.S. in Biology from California State University Northridge. Joyce is interested in both sustainable and regulatory agriculture. She believes that Integrated Pest Management techniques provide the key toward practicing any kind of agriculture in a way that minimizes harm to the environment. Joyce's hobbies include hiking, backpacking, and reading. One of her goals is to someday climb to the top of Mt. Whitney.
