

INCIDENT OPERATION STANDARDS WORKING TEAM

April 26, 2006

To: NWCG Members, Working Groups, Geographic Area Training Representative

From: NWCG Incident Operations Standards Working Team

Subject: Posting of refined April 2006 version of the National Interagency Incident Management System Wildland Fire Qualification System Guide PMS 310-1

In order to produce a printable version of the National Interagency Incident Management System Wildland Fire Qualification System Guide PMS 310-1 some formatting refinements were required.

The content of the updated version, April 2006, is the same as the previous January 2006 version with updated web site addresses and one modification. Physical fitness levels for Single Resource Firing Boss have been changed from “Arduous” to “Moderate”.

Please replace any existing copies of the January 2006 PMS 310-1 you have printed with the April 2006 version or order printed copies from the Publication Management System.
