

YRBSS

National Youth Risk Behavior Survey: 1991-2005

Trends in the Prevalence of Suicide Ideation and Attempts

What Is the National Youth Risk Behavior Survey (YRBS)?

The national YRBS monitors priority health risk behaviors that contribute to the leading causes of death, disability, and social problems among youth and adults in the United States. The national YRBS is conducted every two years during the spring semester and provides data representative of 9th through 12th grade students in public and private schools throughout the United States.
