

Appendix 2. Species susceptibilities to *P. ramorum* as determined by experimental tests

Compiled from the RAPRA Database of potential hosts (as of 9th August 2006) <http://rapra.csl.gov.uk>

Host name	Common name	Host family	Test method	Wounded?	Plant part tested	Symptom	Susceptibility*	Reference
<i>Abies concolor</i>	White fir	Pinaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Details not supplied	Ms	Hansen <i>et al.</i> , 2005
<i>Abies grandis</i>	Grand fir	Pinaceae	Log inoculations	Yes	Inner bark	Inner bark death and bleeding cankers	Ms	Brasier <i>et al.</i> , <i>Personal Communication</i>
<i>Abies grandis</i>	Grand fir	Pinaceae	Leaf dip in zoospore suspension	No	Leaf	Details not supplied	Ms	Hansen <i>et al.</i> , 2005
<i>Abies grandis</i>	Grand fir	Pinaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Details not supplied	Ls	Hansen <i>et al.</i> , 2005
<i>Abies grandis</i>	Grand fir	Pinaceae	Whole plant dip in zoospore suspension	No	Whole plant	Details not supplied	Ms	Hansen <i>et al.</i> , 2005
<i>Abies magnifica</i>	Red fir	Pinaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Details not supplied	Ms	Hansen <i>et al.</i> , 2005
<i>Abies magnifica</i>	Red fir	Pinaceae	Whole plant dip in zoospore suspension	No	Whole plant	Details not supplied	R	Hansen <i>et al.</i> , 2005
<i>Abies procera</i>	Noble Fir	Pinaceae	Sapling stem inoculation	Yes	Stem	Stem lesion	Ms	Denman <i>et al.</i> , <i>Personal Communication</i>
<i>Abies procera</i>	Noble fir	Pinaceae	Detached leaves dipped in zoospore suspensions	No	Leaf	Needles showing necrosis	Hs	Denman <i>et al.</i> , 2005
<i>Abies procera</i>	Noble fir	Pinaceae	Log inoculations	Yes	Inner bark	Inner bark death and bleeding cankers	Ls	Brasier <i>et al.</i> , <i>Personal Communication</i>
<i>Abies procera</i>	Noble fir	Pinaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Details not supplied	Ms	Hansen <i>et al.</i> , 2005
<i>Abies procera</i>	Noble fir	Pinaceae	Whole plant dip in zoospore suspension	No	Whole plant	Details not supplied	R	Hansen <i>et al.</i> , 2005
<i>Abies procera</i>	Noble fir	Pinaceae	Leaf dip in zoospore suspension	No	Leaf	Details not supplied	Hs	Hansen <i>et al.</i> , 2005
<i>Acer campestre</i>	Field maple	Aceraceae	Wounded stem tests using mycelial plugs	Yes	Stem	Bark necrosis	Hs	Vannini, <i>Personal Communication</i>
<i>Acer campestre</i>	Field maple	Aceraceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Acer campestre</i>	Field maple	Aceraceae	Zoospore suspension dipping	No	Stem/Leaf	Lesion not extending much beyond wound	R	Defra, PH0193S
<i>Acer campestre</i>	Field maple	Aceraceae	Mycelial plug inoculum on leaf	Yes	Leaf	Lesion not extending much beyond wound	R	Defra, PH0193S
<i>Acer circinatum</i>	Vine maple	Aceraceae	Details not supplied	Yes	Stem	Details not supplied	Ls	Hansen <i>et al.</i> , 2005

* R, resistance; Ls, low susceptibility; Ms, Moderate susceptibility; Hs, High susceptibility. Note that susceptibilities are from many different experiments and care should be applied with regard to direct comparisons between different pieces of work.

Host name	Common name	Host family	Test method	Wounded?	Plant part tested	Symptom	Susceptibility*	Reference
<i>Acer circinatum</i>	Vine maple	Aceraceae	Whole plant dip in zoospore suspension	No	Whole plant	Details not supplied	R	Hansen <i>et al.</i> , 2005
<i>Acer circinatum</i>	Vine maple	Aceraceae	Leaf dip in zoospore suspension	No	Leaf	Details not supplied	Ls - R	Hansen <i>et al.</i> , 2005
<i>Acer macrophyllum</i>	Bigleaf maple	Aceraceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Details not supplied	Ms	Hansen <i>et al.</i> , 2005
<i>Acer macrophyllum</i>	Bigleaf maple	Aceraceae	Leaf inoculation by pinning a mycelial plug to the upper surface of leaves	Yes	Leaf	Leaf lesions	Ms	Garbelotto <i>et al.</i> , 2003
<i>Acer macrophyllum</i>	Bigleaf maple	Aceraceae	Whole plant dip in zoospore suspension	No	Whole plant	Details not supplied	R	Hansen <i>et al.</i> , 2005
<i>Acer macrophyllum</i>	Bigleaf maple	Aceraceae	Log inoculations	Details not supplied	Inner bark	Details not supplied	Ls	Hansen <i>et al.</i> , 2005
<i>Acer macrophyllum</i>	Bigleaf maple	Aceraceae	Leaf dip in zoospore suspension	No	Leaf	Details not supplied	Ms	Hansen <i>et al.</i> , 2005
<i>Acer monspessulanum</i>	Montpellier maple	Aceraceae	Wounded stem tests using mycelial plugs	Yes	Stem	Bark necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Acer monspessulanum</i>	Montpellier maple	Aceraceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Acer monspessulanum</i>	Montpellier maple	Aceraceae	Zoospore point inoculation	Yes	Detached leaf	Leaf necrosis	Ls	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Acer monspessulanum</i>	Montpellier maple	Aceraceae	Log inoculation	Yes	Inner bark	Inner bark necrosis	Ls	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Acer palmatum</i>	Japanese maple	Aceraceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Hs	Parke <i>et al.</i> , 2002a
<i>Acer platanoides</i>	Norway maple	Aceraceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Acer platanoides</i>	Norway maple	Aceraceae	Wounded stem tests using mycelial plugs	Yes	Stem	Bark necrosis	Ms	Vannini, <i>Personal Communication</i>
<i>Acer pseudoplatanus</i>	Sycamore	Aceraceae	Detached leaves dipped in zoospore suspensions	No	Leaf	Low proportion with necrosis, high level of back isolation	Ls	Denman <i>et al.</i> , 2005
<i>Acer pseudoplatanus</i>	Sycamore	Aceraceae	Mycelial plug inoculum on leaf	Yes	Leaf	Lesion extension slight	Ls	Defra, PH0193S
<i>Acer pseudoplatanus</i>	Sycamore	Aceraceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Lesion extension slight	Ls	Defra, PH0193S
<i>Acer pseudoplatanus</i>	Sycamore	Aceraceae	Zoospore suspension dipping	No	Stem/Leaf	Lesion extension slight	Ls	Defra, PH0193S
<i>Acer pseudoplatanus</i>	Sycamore	Aceraceae	Log inoculations	Yes	Inner bark	Inner bark death and bleeding cankers	Ls	Brasier <i>et al.</i> , 2002
<i>Acer</i> sp.	Maple	Aceraceae	Details not supplied	Details not supplied	Details not supplied	Details not supplied	Ls	Inman <i>et al.</i> , 2002
<i>Aesculus californica</i>	California buckeye	Hippocastanaceae	Leaf inoculation by pinning a mycelial plug to the upper surface of leaves	Yes	Leaf	Leaf lesions	Ms	Garbelotto <i>et al.</i> , 2003
<i>Aesculus hippocastanum</i>	Horse chestnut	Hippocastanaceae	Detached leaves dipped in zoospore suspensions	No	Leaf	High proportion with necrosis, high level of back isolation	Hs - Ms	Denman <i>et al.</i> , 2005

Host name	Common name	Host family	Test method	Wounded?	Plant part tested	Symptom	Susceptibility*	Reference
<i>Aesculus hippocastanum</i>	Horse chestnut	Hippocastanaceae	Log inoculations	Yes	Inner bark	Inner bark death and bleeding cankers	Ls	Brasier <i>et al.</i> , 2002
<i>Alnus glutinosa</i>	Alder	Betulaceae	Wounded stem tests using mycelial plugs	Yes	Stem	Bark necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Alnus glutinosa</i>	Alder	Betulaceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Alnus glutinosa</i>	European alder, black alder	Betulaceae	Mycelial plug inoculum on leaf	Yes	Leaf	Lesion not extending much beyond wound	R	Defra, PH0193S
<i>Alnus glutinosa</i>	European alder, black alder	Betulaceae	Log inoculations	Yes	Inner bark	Inner bark death and bleeding cankers	Ls	Brasier <i>et al.</i> , <i>Personal Communication</i>
<i>Alnus glutinosa</i>	European alder, black alder	Betulaceae	Detached leaves dipped in zoospore suspensions	No	Leaf	Low proportion with necrosis, low level of back isolation	Ls	Denman <i>et al.</i> , 2005
<i>Alnus incana</i>	Gray alder	Betulaceae	Wounded stem tests using mycelial plugs	Yes	Stem	Bark necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Alnus rhombifolia</i>	White alder	Betulaceae	Leaf dip in zoospore suspension	No	Leaf	Details not supplied	Ms	Hansen <i>et al.</i> , 2005
<i>Alnus rhombifolia</i>	White alder	Betulaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Details not supplied	R	Hansen <i>et al.</i> , 2005
<i>Alnus rhombifolia</i>	White alder	Betulaceae	Whole plant dip in zoospore suspension	No	Whole plant	Details not supplied	Ls	Hansen <i>et al.</i> , 2005
<i>Alnus rubra</i>	Red alder	Betulaceae	Whole plant dip in zoospore suspension	No	Whole plant	Details not supplied	R	Hansen <i>et al.</i> , 2005
<i>Alnus rubra</i>	Red alder	Betulaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Details not supplied	Ls	Hansen <i>et al.</i> , 2005
<i>Alnus rubra</i>	Red alder	Betulaceae	Detached leaf dip in zoospore suspension	No	Leaf	Details not supplied	Ls	Hansen <i>et al.</i> , 2005
<i>Alnus rubra</i>	Red alder	Betulaceae	Log inoculations	Details not supplied	Inner bark	Details not supplied	Ls - Ms	Hansen <i>et al.</i> , 2005
<i>Alnus sp.</i>	Alder	Betulaceae	Leaf inoculation	Details not supplied	Leaf	Details not supplied	R	Inman <i>et al.</i> , 2002
<i>Andromeda polifolia</i>	Bog rosemary	Ericaceae	Details not supplied	Details not supplied	Leaves and stems	Stem lesions	Ls	Orlikowski & Szkuta, 2003
<i>Andromeda polifolia</i>	Bog rosemary	Ericaceae	Details not supplied	Details not supplied	Leaves and stems	Leaf necrosis	R	Orlikowski & Szkuta, 2003
<i>Arbutus canariensis</i>	Canary madrone	Ericaceae	Mycelial plug inoculum on leaf	Yes	Detached leaf	Leaf necrosis	Ms	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Arbutus menziesii</i>	Madrone	Ericaceae	Leaf inoculation by pinning a mycelial plug to the upper surface of leaves	Yes	Leaf	Leaf lesions	Hs	Garbelotto <i>et al.</i> , 2003
<i>Arbutus unedo</i>	Strawberry Tree	Ericaceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Ms	Vannini, <i>Personal Communication</i>
<i>Arbutus unedo</i>	Strawberry tree	Ericaceae	Zoospore point inoculation	Yes	Detached leaf	Leaf necrosis	Ls	Moralejo <i>et al.</i> , <i>Personal Communication</i>

Host name	Common name	Host family	Test method	Wounded?	Plant part tested	Symptom	Susceptibility*	Reference
<i>Arbutus unedo</i>	Strawberry tree	Ericaceae	Detached leaf dip in zoospore suspension	No	Leaf	Necrotic lesions followed by extensive blight.	Ms - Hs	Moralejo & Hernandez, 2002
<i>Arbutus unedo</i>	Strawberry tree	Ericaceae	Mycelial plug on twig	Yes	Twig cutting	Blight	Ms	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Arbutus unedo</i>	Strawberry tree	Ericaceae	Log inoculation	Yes	Inner bark	inner bark necrosis	Ms	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Arbutus xalapensis</i>	Madrone	Ericaceae	Whole plant dip in zoospore suspension	No	Whole plant	Dieback	Hs	Hansen <i>et al.</i> , 2005
<i>Arbutus xalapensis</i>	Madrone	Ericaceae	Log inoculations	Details not supplied	Inner bark	Details not supplied	Ls - R	Hansen <i>et al.</i> , 2005
<i>Arbutus xalapensis</i>	Madrone	Ericaceae	Leaf dip in zoospore suspension	No	Leaf	Details not supplied	Hs	Hansen <i>et al.</i> , 2005
<i>Arbutus xalapensis</i>	Madrone	Ericaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Girdled	Hs	Hansen <i>et al.</i> , 2005
<i>Arctostaphylos manzanita</i>	Manzanita	Ericaceae	Leaf inoculation by pinning a mycelial plug to the upper surface of leaves	Yes	Leaf	Leaf lesions	Ms	Garbelotto <i>et al.</i> , 2003
<i>Arctostaphylos uva-ursi</i>	Bearberry	Ericaceae	Heathland species also tested by zoospore suspension dipping	No	Leaf	Lesion well developed	Ms	Defra, PH0193S
<i>Arctostaphylos uva-ursi</i>	Bearberry	Ericaceae	Mycelial plug inoculum on leaf	Yes	Leaf	Lesion well developed	Ms	Defra, PH0193S
<i>Arctostaphylos uva-ursi</i>	Bearberry	Ericaceae	Detached leaf dip in zoospore suspension	Details not supplied	Leaf	Details not supplied	Ms	Tooley & Englander, 2002
<i>Aucuba japonica</i>	Japanese laurel	Aucubaceae	Mycelial plug inoculum on leaf	Yes	Leaf	No necrosis or necrosis only in damaged tissue	Virtually immune	Defra, PH0193S
<i>Betula pendula</i>	European white birch, Silver birch	Betulaceae	Detached leaves dipped in zoospore suspensions	No	Leaf	Low proportion with leaf necrosis, low level of back isolation	Ls	Denman <i>et al.</i> , 2005
<i>Betula pendula</i>	European white birch, Silver birch	Betulaceae	Log inoculations	Yes	Inner bark	Inner bark death and bleeding cankers	Ls	Brasier <i>et al.</i> , <i>Personal Communication</i>
<i>Buddleja davidii</i>	Butterfly bush, Summer lilac	Loganiaceae	Mycelial plug inoculum on leaf	Yes	Leaf	No necrosis or necrosis only in damaged tissue	Virtually immune	Defra, PH0193S
<i>Buddleja davidii</i>	Butterfly bush, Summer lilac	Loganiaceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Hs	Parke <i>et al.</i> , 2002a
<i>Calluna vulgaris</i>	Heather	Ericaceae	Dipped in zoospore suspension	No	Shoots with leaves	Shoot necrosis	Hs	Wagner <i>et al.</i> , 2005
<i>Calluna vulgaris</i>	Heather	Ericaceae	Details not supplied	Details not supplied	Stems	Stem lesions	Ms	Orlikowski & Szkuta, 2003
<i>Calluna vulgaris</i>	Heather	Ericaceae	Mycelial discs on wounded petioles, stem bases or shoots	Yes	Petioles, stem bases, shoots	Details not supplied	Not given	Orlikowski & Szkuta, 2002
<i>Calluna vulgaris</i>	Heather	Ericaceae	Mycelial plugs	Details not supplied	Apical tip of shoots	Necrosis	Ms	Orlikowski & Szkuta, 2004
<i>Calluna vulgaris</i>	Heather	Ericaceae	Unwounded and wounded; zoospore suspension dipping	Yes and No	Leaves and stems	Leaf necrosis	Hs	Defra, PH0193S
<i>Calluna vulgaris</i> 'Winter chocolate'	Heather	Ericaceae	Unwounded and wounded; zoospore suspension dipping	Yes and No	Leaves and stems	Leaf necrosis	Hs	Defra, PH0193S

Host name	Common name	Host family	Test method	Wounded?	Plant part tested	Symptom	Susceptibility*	Reference
<i>Calocedrus decurrens</i>	Incense cedar	Cupressaceae	Whole plant dip in zoospore suspension	No	Whole plant	Details not supplied	R	Hansen <i>et al.</i> , 2005
<i>Calocedrus decurrens</i>	Incense cedar	Cupressaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Details not supplied	R	Hansen <i>et al.</i> , 2005
<i>Camellia japonica</i>	Common camellia	Ericaceae	Detached foliage dipped into a suspension of mycelial fragments and sporangia	No	Leaf	Leaf necrosis, petiole lesions	Ms	Orlikowski & Szkuta, 2003
<i>Camellia japonica</i>	Common camellia	Ericaceae	Mycelial plug inoculum on leaf	Yes	Leaf	Lesions very extensive	Hs	Defra, PH0193S
<i>Camellia japonica</i>	Common camellia	Ericaceae	Zoospore suspension dipping	No	Stem/Leaf	Lesions very extensive	Hs	Defra, PH0193S
<i>Camellia japonica</i>	Common camellia	Ericaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Lesions very extensive	Hs	Defra, PH0193S
<i>Camellia japonica</i>	Common camellia	Ericaceae	Detached leaf dip in zoospore suspension	Details not supplied	Leaf	Details not supplied	R	Linderman <i>et al.</i> , 2002
<i>Camellia japonica</i>	Common camellia	Ericaceae	Detached foliage dipped in zoospore suspension	No	Leaf	Leaf and petiole necrosis	Ms	Pintos Varela <i>et al.</i> , 2003
<i>Camellia sasanqua</i>	Sasanqua Camellia	Theaceae	Mycelial plugs	Yes	Leaf	Foliage with necrosis, bud and stem death, necrotic lesions, leaf abscission	Ms	Parke <i>et al.</i> , 2004
<i>Camellia</i> sp.	Camellia	Ericaceae	Leaf inoculation	Details not supplied	Leaf	Details not supplied	Hs	Inman <i>et al.</i> , 2002
<i>Camellia</i> sp.	Camellia	Ericaceae	Not reported	Details not supplied	Detached leaf	Leaf necrosis (blight)	Not rated, just given as susceptible	Beales <i>et al.</i> , 2004a
<i>Carpinus betulus</i>	Hornbeam	Betulaceae	Log inoculations	Yes	Inner bark	Inner bark death and bleeding cankers	R	Brasier <i>et al.</i> , <i>Personal Communication</i>
<i>Carpinus betulus</i>	Hornbeam	Betulaceae	Detached leaves dipped in zoospore suspensions	No	Leaf	Low proportion with leaf necrosis, high level of back isolation	Ls	Denman <i>et al.</i> , 2005
<i>Castanea sativa</i>	Sweet chestnut	Fagaceae	Zoospore point inoculation	Yes	Detached leaf	Leaf necrosis	Ls	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Castanea sativa</i>	Sweet chestnut	Fagaceae	Log inoculations	Yes	Inner bark	Inner bark death and bleeding cankers	More susceptible	Brasier <i>et al.</i> , <i>Personal Communication</i>
<i>Castanea sativa</i>	Sweet chestnut	Fagaceae	Sapling stem inoculation	Yes	Stem	Stem lesion	Hs	Denman <i>et al.</i> , <i>Personal Communication</i>
<i>Castanea sativa</i>	Sweet chestnut	Fagaceae	Detached leaves dipped in zoospore suspensions	No	Leaf	High proportion with leaf necrosis, high level of back isolation	Ms	Denman <i>et al.</i> , 2005
<i>Castanopsis chryophylla</i>	Giant chinquapin, Giant chinkapin, Golden chinkapin	Fagaceae	Log inoculations	Yes	Inner bark	Inner bark necrosis	Ls - Hs	Hansen <i>et al.</i> , 2005
<i>Ceanothus impressus</i>	Californian lilac, Santa Barbara	Rhamnaceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Hs	Parke <i>et al.</i> , 2002a
<i>Celtis australis</i>	Nettle tree	Ulmaceae	Mycelial plug inoculum on leaf	Yes	Detached leaf	Leaf necrosis	Ms - Hs	Moralejo <i>et al.</i> , <i>Personal Communication</i>

Host name	Common name	Host family	Test method	Wounded?	Plant part tested	Symptom	Susceptibility*	Reference
<i>Ceratonia siliqua</i>	Carob, St. John's Bread	Leguminosae	Wounded stem tests using mycelial plugs	Yes	Stem	Bark necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Ceratonia siliqua</i>	Carob, St. John's Bread	Leguminosae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Ceratonia siliqua</i>	Carob, St. John's Bread	Leguminosae	Mycelial plug inoculum on leaf	Yes	Detached leaf	Leaf necrosis	Ls - Ms	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Ceratonia siliqua</i>	Carob, St. John's Bread	Leguminosae	Detached leaf dip in zoospore suspension	No	Leaf	Necrotic lesions followed by extensive blight.	Hs	Moralejo & Hernandez, 2002
<i>Ceratonia siliqua</i>	Carob, St. John's Bread	Leguminosae	Mycelial plug on twig	Yes	Twig cutting	Bark necrosis	Ls	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Cercis siliquastrum</i>	Judas tree	Leguminosae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Hs	Vannini, <i>Personal Communication</i>
<i>Cercis siliquastrum</i>	Judas tree	Leguminosae	Wounded stem tests using mycelial plugs	Yes	Stem	Bark necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Chaenomeles speciosa</i>	Flowering quince	Rosaceae	Detached leaf dip in zoospore suspension	No	Leaf	No symptoms were observed	R	Parke <i>et al.</i> , 2002a
<i>Chamaecyparis lawsoniana</i>	Port-Orford cedar, Lawson's cypress	Pinaceae	Log inoculations	Yes	Inner bark	Inner bark death and bleeding cankers	More susceptible	Brasier <i>et al.</i> , <i>Personal Communication</i>
<i>Chamaecyparis lawsoniana</i>	Port-Orford cedar, Lawson's cypress	Pinaceae	Detached leaf dip in zoospore suspension	Details not supplied	Leaf	Details not supplied	Ms	Zanzot <i>et al.</i> , 2002
<i>Chamaecyparis lawsoniana</i>	Port-Orford cedar, Lawson's cypress	Pinaceae	Detached leaves dipped in zoospore suspensions	No	Leaf	Needles generally unaffected	R	Denman <i>et al.</i> , 2005
<i>Chamaecyparis lawsoniana</i>	Lawsons cypress	Pinaceae	Sapling stem inoculation	Yes	Stem	Stem lesion	Ls	Denman <i>et al.</i> , <i>Personal Communication</i>

<i>Viburnum tinus</i>	Laurustinus	Caprifoliaceae	Spraying sporangia	No	Leaf	Foliar necrosis which could be limited or large	Not given	Delatour <i>et al.</i> , 2002
<i>Viburnum tinus</i>	Viburnum	Caprifoliaceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Ls	Vannini, <i>Personal Communication</i>
<i>Viburnum tinus</i>	Laurustinus	Caprifoliaceae	Mycelial plug on twig	Yes	Twig cutting	Bark necrosis	Hs	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Viburnum tinus</i>	Laurustinus	Caprifoliaceae	Zoospore point inoculation	Yes	Detached leaf	Leaf necrosis	Hs	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Viburnum tinus</i>	Viburnum	Caprifoliaceae	Stem susceptibility by wound inoculation with mycelial plugs	Yes	Stem	Lesion well developed	Ms	Defra, PH0193S
<i>Viburnum tinus</i>	Viburnum	Caprifoliaceae	Mycelial plug inoculum on leaf	Yes	Leaf	Lesion well developed	Ms	Defra, PH0193S
<i>Viburnum tinus</i>	Viburnum	Caprifoliaceae	Detached leaf dip in zoospore suspension	No	Leaf	Foliar necrosis	Hs	Parke <i>et al.</i> , 2002a
<i>Viburnum tinus</i> subsp. <i>rigidum</i>	Guelder Rose	Caprifoliaceae	Mycelial plug inoculum on leaf	Yes	Detached leaf	Leaf necrosis	Hs	Moralejo <i>et al.</i> , <i>Personal Communication</i>
<i>Viburnum x bodnantense</i>	Viburnum	Ericaceae	Young plants inoculated through stem or leaf tissue	Not specified	Stem/leaf	Free of damage	R	de Gruyter <i>et al.</i> , 2002
<i>Visnea mocanera</i>	Mocan	Lauraceae	Mycelial plug inoculum on leaf	Yes	Detached leaf	Leaf necrosis	R	Moralejo <i>et al.</i> , <i>Personal Communication</i>

Host name	Common name	Host family	Test method	Wounded?	Plant part tested	Symptom	Susceptibility*	Reference
<i>Vitis vinifera</i>	Grapevine	Vitaceae	Mycelial plug inoculum on leaf	Yes	Leaf	No necrosis or necrosis only in damaged tissue	Virtually immune	Defra, PH0193S
<i>Weigela</i> sp.	Weigela	Caprifoliaceae	Mycelial plug inoculum on leaf	Yes	Leaf	No necrosis or necrosis only in damaged tissue	Virtually immune	Defra, PH0193S
<i>Zenobia pulverulenta</i>	Dusty zenobia	Ericaceae	Detached leaf dip in zoospore suspension	No	Leaf	Leaf lesion	Not given	Tooley & Englander, 2002
