

**Watershed Rehabilitation Partnership Project Proposal – FY 2009
Black Hills National Forest**

Submitted by (contact person, organization, address, e-mail, telephone):

State:

County:

Date:

Description of Project: (Please include legal description, detailed location on map or GPS location information; attach one or two photos, if available; describe type of work that may be needed)

Describe source, amount and status of partner contributed funds (\$\$ amount and/or description of non-monetary, in-kind contributions):

Describe any site rehabilitation partner experience that may be available:

Additional information (if needed):

Project Consideration (for agency use):

Additional Project Funding and Other Information or Needs:	
NEPA/Planning Needs?	
Design/Contract Prep/Contract Admin Needs?	
Contract Estimate	
Total Project Estimate	

Watershed Function: Can project be expected to contribute to remediation of water quality problems in watersheds listed by EPA as impaired under Section 303d of the Clean Water Act or address other water quality issues of concern.

Reducing Risks to Human Health and Public Safety: Does the project have the potential to reduce risks to community drinking water, human health, or traveler safety?

Aquatic Habitat: Will the proposed project remove aquatic blockages?

Sediment Production Reduced. Does the project minimize sediment production and/or reduce the amount of sediment accessing perennial streams?

Project Readiness and Likelihood of Success: Projects that can be completed or funds obligated in FY 2009 can be expected to receive higher consideration. Likelihood that proposal activities can be considered successful in reducing sediment production and that some level of vegetation cover can be restored.

Other Benefits (brief):
