¹ We anticipate that any new federal funding for CCDBG included in an economic recovery package would be considered Discretionary funding and subject to the rules of that funding stream. Discretionary funds do not require a state match. Funds must be obligated (or legally committed) within two years and spent within three years.

² These figures are based on estimated FFY 2009 CCDBG Funding Allocations (Prior to Appropriation), which are based on the President's FY 2009 budget request and are subject to change (<http://www.acf.hhs.gov/programs/ccb/law/allocations/current/state2009/2009allocations.htm>).

³ FY 2007 data are preliminary estimates, and the most recent available data from HHS, of the number of children served with federal and state CCDBG expenditures (including TANF transfers to CCDBG). Data on the number of children served through other sources, including TANF direct funds, are not available.

⁴ These estimates are the number of additional children who could receive child care assistance with the new available funding based on the state 2006 cost per child (the latest year data are available). Under CCDBG, states may choose how they spend these funds, and may use them in ways that result in more, or less, slots than we have estimated.

⁵ U.S. funding amounts do not equal the sum of state allocations shown here due to funding for territories, tribes, and targeted funds. The number of children served does not equal the sum of children by state due to territories, tribes, and rounding.
