TBG-D TRASH BAG (DELUXE)
 21" w x 16" h
 14 total pockets including 2 velcro security pockets. Constructed from heavy-duty nylon.

TBG-S TRASH BAG (STANDARD)
 15" w x 19" h
 1 large pocket with elastic band. Constructed from heavy-duty nylon.

TBT TOOL BELT
 9 3/4" w x 10" h
 4 total pockets including 1 velcro security pocket and 1 large pocket with elastic band. Constructed from heavy-duty nylon.

USC-1 UNDERWATER STEM CUTTER

This portable heavy-duty machine is productive. Each cut removes enough stem length to prevent bacteria and air build-up, and prevents the stem from taking in water. It cuts without tearing or crushing stems. The tub is made of fiberglass and lifts easily from fiberglass tub for easy filling and cleaning.
 11"d x 18"w x 5"h
 Comes with 2 extra blades.

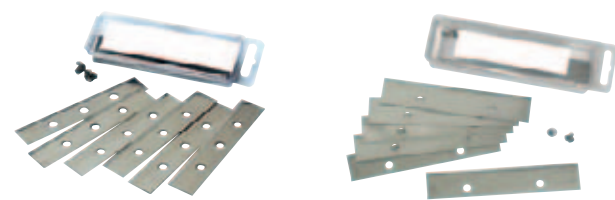

USC-2 UNDERWATER STEM CUTTER

This underwater cutter has three times the cutting capacity that the USC-1 has. The design of the larger size handle reduces the force needed to cut. The larger funnel makes it easier, safer and quicker to place stems into the cutter. Designed to accommodate the largest grower bunches and multiple standard bunches.
 15"d x 24"w x 5"h
 Stainless steel funnel 5" diameter
 Comes with 2 extra blades.

REPLACEMENT TUBS

For USC-1 and USC-2 Underwater Stem Cutters (pictured above.)
 USC-1T 11"d x 18"w x 5"h
 USC-2T 15"d x 24"w x 5"h

USC-1B (for USC-1),
6 blades per pack

USC-2B (for USC-2)
6 blades per pack

WC720-B (for WC720)
12 blades per pack

REPLACEMENT BLADES

Most shops will need about 6 blades per year. Under heavy use, changing the blades once per month makes good sense.

BF790 BUCKET FILLING STATION

Save time and money; fills the exact amount of water and proportioned preservative each time. The filling station is completely portable. The surge tank automatically refills with your preservative or hydration solution. Slide the bucket across the shelf and the water fills automatically, with your selected amount. This filling station will save you labor and increase productivity.
 36" d x 24" w x 72" h
 Water Line: 3/4" hose thread
 Fill Rate: 70 gallons/minute
 Volume: adjustable .5 to 5 gallons
 Trigger: automatic sensor
 Electrical: 110 volt grounded AC
 Pneumatics: operates at 45 psi (air compressor not included)

WC720 POWER-CUT 720

Capable of cutting 60 boxes of flowers per hour at the touch of a button, this pneumatically-powered cutter is a high volume labor saving machine. The 720 sets up easily. Stems are separated from the water reservoir, reducing contamination. Water volume (15 gallons) is automatically regulated during cutting and is quickly recycled. The reservoir is emptied when finished. The operator can choose from two cutting modes to cut off any length of stem. All metal construction. Comes complete with stand and locking casters. Includes 12 replaceable stainless steel blades.
 36" d x 24" w x 52" h
 Funnel height 46"
 Electrical 110 volt grounded AC
 Pneumatics: operates at 90 psi (air compressor not included)

BBC BIG BUNCH CUTTER

Cut and shear flower stems with the razor sharp blade. The gripped handle is leveraged for minimal effort. Includes a safety latch to lock the blade in place when not in use. All powder-coated steel construction including blade guard. Blade is laser sharpened and specially hardened for long lasting sharpness and durability. Blade can be professionally sharpened.
 24" long x 6" high
 Blade 14 1/2" long
 Includes 4 mounting bolts.

DTH DIGITAL THERMO-HYGROMETER

This fast and accurate thermo-hygrometer is ideal for floral coolers where temperature and humidity monitoring is important for the proper storage of flowers. Features include: jumbo display for humidity and temperature; minimum/maximum reading memory; freeze alert; C/F switchable; foldaway stand; wall mounting keyhole. Includes external sensor with 10' sensor cable. Requires 1-AAA battery (included).
