## PERSONNEL SECURITY AND FACILITY CLEARANCE PROGRAMS SUPPORT SERVICES

The estimated date for RFP issuance is 1st Qtr FY09. This solicitation will be a 100% small business set-aside.

The U.S. Department of Energy's (DOE) National Nuclear Security Administration (NNSA) Service Center is committed to meaningfully increasing the involvement of the small business community in supporting its technical, scientific, and security endeavors. As part of this effort, this sources sought announcement is intended to determine whether this acquisition for security and safeguards support services is appropriate for a Small Business set-aside. The NNSA mission includes being a responsible steward of the Nation's nuclear weapons. The NNSA is a vital contributor to reducing the global nuclear danger through its national security, nuclear safety, nonproliferation activities, and nuclear materials stabilization by supporting a safe, secure, reliable stockpile, and the safe dismantlement and disposal of excess nuclear weapons. The multi-disciplined NNSA Service Center security and safeguards programs are the first line of defense against the insider threat and are designed to protect our most vital national assets. These programs directly support weapons and national security objectives through an integrated nuclear weapon technology infrastructure and core competencies that ensure safety, security, and reliability of the enduring stockpile; ensure the safe and secure dismantlement of nuclear weapons; ensure the safe and secure staging of nuclear components and materials awaiting permanent disposition; ensure proper classification and controlled information guidance is provided to the NNSA; and provide for the protection of government property and personnel located at the NNSA Service Center and other sites located on Kirtland Air Force Base in Albuquerque, New Mexico. The NNSA personnel security program is an integral component of the integrated NNSA Service Center security and safeguards program by ensuring that only trustworthy individuals receive/maintain a DOE access authorization to classified matter or special nuclear material. The personnel security program also performs key tasks associated with NNSA Human Reliability Program, Homeland Security Presidential Directive-12, and the Facility Clearance and Foreign Ownership, Control and Influence programs.

A draft performance based work statement (PBWS) for this procurement is provided as an attachment to this web page (scroll to the bottom of the web page) as well as draft RFP paragraphs L003 and M003. The estimated value of this procurement is approximately \$43 to \$50 million over a five-year period, and a

cost plus fixed fee level of effort contract is contemplated.
