

Navajo & Apache County Recycling

Welcome. Here is a fairly inclusive list of recycling in our area that I hope to keep up-to-date with input from you. Please contact me, Maria, at donaghy@frontiernet.net if you have additional information.

Thanks!

Paper/Cardboard/Woodchips

We have two facilities that collect paper for recycling: One is the Pinetop-Lakeside Sanitary District's "Digester" in Lakeside that composts Paper/Cardboard, Woodchips and Dewatered Bio Solids for high quality compost that will be sold to the public. Tours of the digester are available upon request. Contact PLSD at 368.5370 ext. 227 for more info. The other is the Catalyst Paper Corporation formally known as Abitibi Paper Mill that processes newspaper and magazines to make paper. The 250 bone dry tons of waste recycled paper fibers generated daily by Abitibi will now be sent to the new bio mass facility, Snowflake White Mountain Power, SWMP, as additional fuel for their boiler used to produce electricity. Go to <http://www.nzlegacy.com/biomass.htm> for more info.

Paper/Cardboard for Pinetop-Lakeside Sanitary District:

Paper includes any junk mail, cardboard boxes, milk and other cardboard containers, cereal boxes, paper towels, towel rolls, newspapers . . .

There are Waste Management Bins for Paper products & Cardboard at various businesses and throughout Navajo county. Note: these bins have signs that say recyclables only or cardboard only but they are for any kind of paper and cardboard. If you have a business and an account with Waste Management you can get a free bin (there are five sizes to choose from, 2,3,4,6, & 8 yards. The 2 yd bin is the size of about 2 small desks and the 8 about 4 small desks). These bins will be emptied once even twice per week if needed. If you are a business and have a contract with Waste Management, Contact Phil Hayes at Pinetop-Lakeside Sanitary District for a free bin at 368.5370 ext. 227.
