

Trouble viewing CRCnetBASE books?

When initially linking to a book on one of the [CRCnetBASEs](#), only the Table of Contents will display. The chapter titles in the Table of Contents are hyperlinked to the full text of the chapters. If you click on one of the chapter titles in the Table of Contents and get the error message "There was an error opening this document. This file cannot be found", there is a problem with your Adobe Acrobat settings. Adobe Acrobat must be set to open PDF documents from within the browser window for the files to open correctly. To correct this, do the following:

1. Open Adobe Acrobat. If you have Professional and Reader installed on your machine, you will need to change the settings in both programs.
2. From the Edit menu, select Preferences.

3. Select the **Internet** category and make sure the “Display PDF in browser” box is checked.

5. Click **OK**.

6. Close Adobe Acrobat and any open browser windows.

7. If you continue to experience access issues, email libecontent@sandia.gov.
