

Is your commute costing you an arm leg ?

Riding the bus is a great value when compared with the cost of driving. And now you can save even more when you commute on any public transit (bus, train, vanpool or ferry).

Cut the cost of your monthly fare 20– 40% just by signing up for our new “pre-tax commuter benefit.” (The name sounds complicated; the concept isn’t.)

Here’s how it works: when you buy a pass or ticketbook on your own, you are using dollars that have already been taxed. With the pre-tax commuter benefit, you can buy your pass or ticketbook through a payroll deduction *before* taxes are applied to your earnings.

You could save hundreds of dollars every year—and get the convenience of receiving your transit pass right at work!
