Dear Sir:

Or Whom ever this may concern,  
Very early this month I have heard on  
the news, of a substance Bromate; a  
deadly item is in our bread, it is a  
cancer causing agent, why does the  
government permit these CO's to use it  
you are there to protect us from it,  
it may be to late for the older ones  
But what about our children,  
I wonder how many more deadly items  
there are in our food, the food should  
read Pure! - not harmful or deadly,  
--- I want the answer?

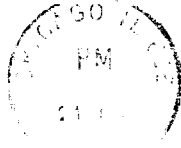

Thank you  
L.P.
