Dear Sirs:

I had a heart attack in 1985 and four more in the 90's. I am a diabetic - so I have a strong interest in news that explains anything about the causes of heart attacks. News Nutrition Action magazine explained about trans fat. I was troubled by learning that some of the foods I eat are dangerous to my health and tens of thousands of others.

I want to add my vote to the others who will insist that the FDA will demand that labels on cans will list the trans fat in with that of saturated fat. It's serious to me!

Gratefully,
Mrs A. H. Rose
