

24 Oct. 2000

Dear Commissioner Henney,

I am a vegetarian very concerned about my health and not eating GMO foods. Foods need to be labeled so that we can make our own choices. We need to have strict regulations for health & safety of testing GMOs. Haven't butterflies died in GMO corn areas? Please, please support the petition filed by the Center for Food Safety. I am especially concerned as a vegetarian about knowing that I am eating soy products that have been genetically modified.

Thank-you for your consideration.
