Subject: What's in your food?

Dear Corporate and Government Leaders,

Genetically engineered food ingredients or crops should not be allowed on the market until:

- 1) Independent safety testing demonstrates they have no harmful effects on human health or the environment,
- 2) They are labeled to ensure the consumer's right-to-know, and
- 3) The biotechnology corporations that manufacture them are held responsible for any harm.

Overwhelmingly, the public wishes to know the origins of their food and to have the right to make a choice to consume or not consume GMOs. If you will not protect us from corporate greed, let the public have the information they need to do it themselves.

Sincerely

Nori Hudson
