Subject:

Docket Number 98P-0151/CP1

Ladies/Gentlemen:

Please prohibit the slaughter of downed animals. There is much cruelty of animals in the Farming Industry. A great deal of evidence to this fact has been sent to me over the last few years. I cannot consume meat without the sound of screaming animals in pain droning in my ears. Can't we legislate more effective standards for the handling of animals in the meat producing facilities in the United States? From everything I've read and seen, our meat producers handle living animals as though they were pieces of inanimate objects. No concern for the animals as living beings is shown by humans operating in these "halls of death and degradation".

I am thoroughly dismayed and disgusted by the lack of humaneness in the quarters of the Farming Industry. Instead, there is much brutality as humans chop and cut into animals many that are still alive and breathing. What God-Awful pain and agony these poor creatures must endure before they breath their last breath.

I cannot be proud of my fellow beings who hack away at these living creatures like savages. I cannot be proud of the individuals who manage and supervise such inhumane practices.

Animals are not inanimate objects. They are living beings who should be shown at least a modicum of compassion and respect. They lose their lives so that we humans can live.

I would like to see our government officials take meaningfull strides to instill humane practices in the Farming Industry, and bring some decency to our meat producing operations.

Sincerely, Maphia Dhe askel

Sophia B. McAskill
