

Jane Henney, MD, Commissioner  
FDA

2/19/01

Dear Jane,

0555 '01 MAR 19 P3:02

I am very concerned about the levels of antibiotics in our livestock, as well as the excessive use of hormones for growth promotion. Doctors have fewer & fewer tools to treat disease, as many of them become resistant. And we have enough reproductive problems to justify outlawing hormone use. I urge you to act quickly on this - lives are at stake!

Thank you,

Edwina Scholman-Andrews
