"I enjoy the online course work. I can hop on when it is convenient for me."

take your career & your organization to the next level ONINE.

If you are a food industry professional, importer, exporter, distributor, student, attorney, scientist, or government employee engaged in food science or regulation—or if you are involved in consumer food affairs, purchasing, marketing, product development or quality control—knowledge of changing regulatory requirements in the food trade is essential to your career advancement and to the compliance and competitive advantage of your company or organization.

Whether you live a few miles or 10,000 miles from the Michigan State University campus, this program offers you the opportunity to advance your knowledge online—without leaving your home or office. Certified professionals can satisfy required continuing education or CLE credits with these courses.

These course are taught by food science and legal professionals who understand the legal complexities of the flow of food and agricultural products across borders.
