Instructions for implementing the DRVS 7.1.3 Upgrade

The DRVS 7.1.3 upgrade adds Crystal Report and Microsoft Excel Data Only formats in the "Save as type" dropdown in the export window, which were missing in DRVS 7.1.1 (see below):

To implement the upgrade, the files in DRVS_7.1.3.zip must be copied into C:\Program Files\DRVS\WIAnLX\bin through the following steps:

1. Download the DRVS_7.1.3.zip file from ETA's website (<u>http://www.doleta.gov/performance/reporting/tools_datavalidation.cfm</u>).

2. Double-click on the zip file and extract the 3 WIAnLX files into the C:\Program Files\DRVS\WIAnLX\bin folder (or comparable location if the state installed the DRVS in a different location). Click "Yes to all" if asked whether you want to replace already existing files in that folder.

If you have any questions or need assistance, please contact <u>WIATA@mathematica-mpr.com</u> and cc your regional ETA staff.
