## ACCESS TO QFR DATA

This press release can be viewed today in portable document format (.pdf) at our QFR internet website http://www.census.gov/econhelp/qfr. Data in the release are drawn from a more comprehensive data set published in the Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations - First quarter 2007 (QFR-07-1). This quarterly publication is available for downloading at our QFR internet website under "Press Releases and Publications". The quarterly publication includes summary statements of income and retained earnings, balance sheets, and related financial and operating ratios for manufacturing, mining and trade corporations. Data presented are classified by industry and asset size.

## SAMPLING

Data in this press release are based on quarterly financial reports from approximately 8,400 U.S. corporations. The data are estimated from a sample survey and therefore are subject to sampling variability as well as nonsampling variability such as response error, nonreporting, and coverage errors. Estimates of sampling variability are presented in this release. A statement such as "up $\$ 2.5( \pm 0.2)$ billion," appearing in the text, indicates the range ( $+\$ 2.3$ to $+\$ 2.7$ billion) in which the actual change is likely to have occurred. The range given for the change is a $90 \%$ confidence interval that accounts only for sampling variability. If the range had contained zero (0), it would have been uncertain whether there was an increase or decrease; that is, the change would not have been statistically significant. For any comparison cited without a confidence interval, the change is statistically significant at the $90 \%$ confidence level. The quarterly publication, Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations - First quarter 2007 (QFR-07-1), includes more detailed explanations of confidence intervals and sampling variability, along with additional measures of sampling variability.

Beginning with the publication in the third quarter of 2006, the methodology for calculating the sample variance has changed. See the Survey Methodology section of the Introduction in the quarterly publication for information on this change in methodology.
