

**US Coral Reef Task Force Meeting
Washington D.C.
5 May 2006**

Human Dimensions: How It Can Inform Coral Reef Management

**David K. Loomis, Ph.D., Director
Human Dimensions of Marine and Coastal Ecosystems Program
Department of Natural Resources Conservation
University of Massachusetts, Amherst
Loomis@forwild.umass.edu**

Presentation Outline

- Human Dimensions Introduction: What is it, why is it important?
- Integrative Complexity: Users, The Public, and Managers
- History of Resource Management
 - Eras and Changes
 - Integrated Resource Management of Today
 - Kennedy and Thomas Model
- Some Conceptual Frameworks From Among Many
 - Values
 - Held vs. Assigned
 - Recreation Specialization
 - The Average User Does Not Exist
 - The Allocation of Scarce Resources
 - Distributive Justice
 - Procedural Justice
 - Normative Approach to Management Alternatives
 - User Conflict and Crowding
 - Research Methods
 - Basic Issues
 - Basic Designs
 - Data Collection Techniques
