(Former Name or Former Address, if Changed Since Last Report): _____

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (*see* General Instruction A.2. below):

□ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

□ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

□ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

The information in this report, including information in the exhibits submitted herewith, shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liabilities of Section 18, nor shall it be deemed incorporated by reference into any disclosure document relating to Fannie Mae, except to the extent, if any, expressly incorporated by specific reference in that document.

Item 2.02 Results of Operation and Financial Condition

On May 6, 2007, Fannie Mae (formally known as the Federal National Mortgage Association) issued a news release (the "News Release") reporting the filing of its Form 10-Q for the quarter ended March 31, 2008 and its financial results for the periods covered by the Form 10-Q. The News Release, a copy of which is furnished as Exhibit 99.1 to this report, is incorporated herein by reference.

Item 7.01 Regulation FD Disclosure

The News Release also reported Fannie Mae's plans to issue common and preferred stock, and to reduce its common stock dividend. The news release also reported that the company's regulator, the Office of Federal Housing Enterprise Oversight (OFHEO), had lifted the May 2006 Consent Order.

In addition, on May 6, 2008, Fannie Mae posted to its Web site a 2008 Q1 10-Q Investor Summary presentation consisting primarily of summary historical financial information about the company excerpted from Fannie Mae's Form 10-Q and information about the company's credit book of business. The presentation, a copy of which is furnished as Exhibit 99.2 to this report, is incorporated herein by reference. Fannie Mae's Web site address is www.fanniemae.com. Information appearing on the company's Web site is not incorporated into this report.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits. The exhibit index filed herewith is incorporated herein by reference.

Fannie Mae Reports First Quarter 2008 Results; Announces Equity Offering to Increase Capital And an Expected Reduction in Common Stock Dividend

Janis Smith 202-752-6673

WASHINGTON, DC — Fannie Mae (FNM/NYSE) today reported financial results for the quarter ended March 31, 2008. The company reported a net loss of (\$2.2 billion), compared with a fourth quarter 2007 net loss of (\$3.6 billion). First quarter 2008 results were driven primarily by increased revenues from net interest income and guaranty fee income, which were more than offset by fair value losses and credit-related expenses due to adverse market conditions. These conditions included a significant widening of credit spreads, and higher-than-expected home price declines and loan loss severity during the quarter. The mortgage credit book of business grew by three percent, and estimated market share increased to approximately 50 percent of new single-family mortgage-related securities issued. Core capital totaled \$42.7 billion at the end of the quarter, \$5.1 billion above the company's current regulatory requirements.

The company also announced its plan to raise \$6 billion in new capital through public offerings of common stock, non-cumulative mandatory convertible preferred stock and non-cumulative, non-convertible preferred stock. The new capital will enable Fannie Mae to maintain a strong, conservative balance sheet, enhance long-term shareholder value, and provide stability to the secondary mortgage market.

Fannie Mae said that its regulator, the Office of Federal Housing Enterprise Oversight (OFHEO), had lifted the May 2006 Consent Order, and would reduce the current OFHEO-directed requirement from 20 percent capital to 15 percent upon the successful completion of the company's capital-raising plan. The company said OFHEO also indicated its intention to reduce the capital surplus by an additional 5 percentage points to a 10 percent surplus requirement in September 2008, based upon the company's continued maintenance of excess capital well above OFHEO's regulatory requirement, and no material adverse change to the company's ongoing regulatory compliance.

Fannie Mae Reports First Quarter 2008 Results Page Two

As part of the company's announced plan to raise capital, Fannie Mae's Board of Directors said it intends to reduce the company's quarterly common stock dividend beginning with the third quarter of 2008 to \$0.25 per share, which will make available approximately \$390 million of capital annually.

In addition, Fannie Mae plans to announce a series of new initiatives called "Keys to Recovery" on a conference call with investors and analysts in connection with today's Form 10-Q filing. The new effort is geared toward providing liquidity, stability and affordability to the housing and mortgage markets for the long term, keeping struggling borrowers in their homes, assisting prospective homebuyers with home purchases, and stabilizing communities affected by the mortgage market downturn. The initiatives include 1) a new refinancing option for up-to-date but "underwater" borrowers with loans owned by Fannie Mae that will allow for refinancing up to 120 percent of a property's current value; 2) a renewal and expansion of the company's partnership with the state Housing Finance Agencies to provide \$10 billion in financing for qualified, first-time homebuyers; 3) in partnership with Self-Help Credit Union, a new initiative that allows families in hard-hit communities to reside in foreclosed properties on a rent-to-own basis and 4) new jumbo-conforming loans will be priced flat to conforming for portfolio asset acquisition through the end of the year.

First Quarter 2008 Overview

- Net loss of (\$2.2 billion), or (\$2.57) per diluted share, compared with a (\$3.6 billion) net loss, or (\$3.80) per diluted share, for the fourth quarter of 2007. Key drivers of first quarter results were as follows:
 - <u>Net revenues</u> rose to \$3.8 billion from \$3.1 billion in the fourth quarter of 2007, as guaranty fee income increased by \$131 million and net interest income increased by \$554 million. The increase in net revenues reflects growth in the guaranty business, higher guaranty fees, and lower debt costs.
 - <u>Mark-to-market fair value losses</u> rose to (\$4.4 billion) from (\$3.4 billion) in the fourth quarter of 2007, primarily due to continuing adverse market conditions, including a decline in interest rates that resulted in fair value losses on derivatives, and significant widening of credit spreads that resulted in fair value losses on trading securities.

Fannie Mae Reports First Quarter 2008 Results Page Three

- <u>Credit-related expenses</u> the provision for credit losses plus foreclosed property expenses rose to \$3.2 billion from \$3.0 billion in the fourth quarter of 2007, primarily due to an increase in charge-offs. This reflects higher defaults and average loan loss severities, driven by national home price declines and weak economic conditions in the Midwest.
- **Combined loan loss reserves** increased to \$5.2 billion as of March 31, 2008 from \$3.4 billion as of December 31, 2007, as the company substantially increased its loan loss reserves to reflect losses it believes will be recorded over time in charge-offs.
- **Total mortgage credit book of business** grew by 3 percent during the quarter to \$3.0 trillion as of March 31, 2008, compared with \$2.9 trillion as of December 31, 2007.
- **Core capital** as of March 31, 2008 was \$42.7 billion compared with \$45.4 billion as of December 31, 2007, exceeding the statutory minimum capital requirement by \$11.3 billion, and exceeding the statutory minimum capital requirement plus the 20 percent OFHEO-directed capital surplus requirement by \$5.1 billion.
- Losses on certain guaranty contracts have been eliminated, beginning January 1, 2008, and going forward, in connection with the company's adoption of Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS 157). This change is described starting on page 11 of this release and in the company's Form 10-Q filed today.
- Beginning in April 2008, the company implemented **fair value hedge accounting** with respect to its derivatives used to hedge, for accounting purposes, the interest rate risk related to some of its mortgage assets. This change is described on page 12 in this release.
- Estimated fair value of net assets as of March 31, 2008 was \$12.2 billion, compared with \$35.8 billion as of December 31, 2007. The decline was due primarily to the impact of market volatility and home price declines, and also pricing changes on the company's existing guaranty obligations in connection with the adoption of SFAS 157. This change is described on page 11 of this release.
- Shareholders' equity was \$38.8 billion as of March 31, 2008, compared with \$44.0 billion as of December 31, 2007.

Fannie Mae Reports First Quarter 2008 Results Page Four

"During the first quarter we saw heightened volatility in the secondary mortgage market, credit spreads that widened out to 22-year highs, and home prices that fell faster than expected," said President and Chief Executive Officer Daniel H. Mudd. "Our first quarter results, although an improvement over the last quarter, reflect these challenging market conditions. That said, we achieved another quarter of growth in our book of business and market share, and solid revenue growth from both our guaranty and investment businesses. This is likely to be the story for the months ahead — a painful cure from the housing correction — and incredibly healthy opportunities from our resurgent role at the center of the recovery. Both are happening at the same time."

Mudd added, "The additional capital we're raising will bolster our 'protect and grow' strategy — it will allow us to maintain a strong, conservative balance sheet through the housing correction, pursue growth opportunities to enhance long-term shareholder value, and provide liquidity and stability to the secondary market. Having a larger capital cushion will permit us to operate and grow from a position of strength."

Fannie Mae Reports First Quarter 2008 Results Page Five

"Our revenues grew and our net loss narrowed in the first quarter, but our results were driven overwhelmingly by market-valuation losses on derivatives and trading securities, and our increase in charge-offs and the provision for credit losses," Executive Vice President and Chief Financial Officer Stephen M. Swad said. "Going forward, we expect our financial results to continue to be affected by the difficult market. However, the implementation and adoption of new accounting standards and business practices should have the effect of reducing the market-related volatility impact on capital."

<u>Net revenues</u>: First quarter 2008 net revenues of \$3.8 billion represent a 21.8 percent increase from the fourth quarter of 2007 and a 38.2 percent increase from the first quarter of 2007. Key drivers included:

- **Guaranty fee income** rose to \$1.8 billion, or 8.1 percent over the fourth quarter of 2007, reflecting three percent quarterly growth in the guaranty book of business, and a one basis point, or 3.5 percent, increase in the average effective guaranty rate, to 29.5 basis points. The increase in average effective guaranty fee rate was due in part to accretion of guaranty obligation related to losses recognized at the inception of certain guaranty contracts into income, which totaled \$297 million for the first quarter of 2008.
- Net interest income rose to \$1.7 billion, or 48.8 percent, over the fourth quarter of 2007, as the tax-equivalent net interest yield increased to 86 basis points from 62 basis points. Lower debt costs contributed to the increase in net interest yield. The largest impact on net interest income during the quarter resulted from the redemption of step-rate debt, at levels greater than prior quarters, and the reversal of interest accrued on the debt because it was called before all the interest was paid. Backing out this item in each quarter, the tax-equivalent net interest yield grew 12 basis points over the fourth quarter, and net interest income grew by 29.1 percent.

Losses and expenses: First quarter 2008 losses and expenses of \$8.9 billion represent a 4.1 percent decrease from the fourth quarter of 2007, and compare with \$1.8 billion in the first quarter of 2007. Key drivers included:

Fannie Mae Reports First Quarter 2008 Results Page Six

- **Credit-related expenses**, which totaled \$3.2 billion, including a \$1.8 billion addition to the combined loss reserves, compared with \$3.0 billion (including a \$2.0 billion addition to the loss reserves) in the fourth quarter of 2007. Credit losses for the quarter were driven primarily by loans originated between 2005 and 2007 in states experiencing home price declines or economic weakness.
- Net fair value losses, which increased to \$4.4 billion, compared with \$3.4 billion in the fourth quarter of 2007. The primary driver was derivatives fair value losses as interest rates fell during the quarter. A second driver was an increase in fair value losses on trading securities, primarily due to a significant widening of credit spreads during the first quarter of 2008, which more than offset the positive impact that the decline in interest rates during the quarter had on the value of these securities.

Business Overview

- Single-Family Credit Guaranty book of business grew by three percent during the quarter to \$2.7 trillion as of March 31, 2008, compared with \$2.6 trillion at the end of the fourth quarter of 2007. The market share of new single-family mortgage-related securities issued reached an estimated 50.1 percent for the first quarter, compared to 48.5 percent for the fourth quarter of 2007. The serious delinquency rate in the single-family book as of March 31, 2008, increased to 1.15 percent, from 0.98 percent as of December 31, 2007, and single-family credit-related expenses increased by 9.8 percent from the previous quarter to \$3.3 billion.
- Housing and Community Development's multifamily guaranty book of business grew by 3.6 percent in the first quarter to \$153.9 billion as of March 31, 2008, compared with \$148.6 billion as of December 31, 2007. Multifamily credit-related expenses decreased from an expense of \$10 million in the fourth quarter of 2007 to income of \$11 million in the first quarter of 2008.
- **Capital Markets**' mortgage portfolio balance remained relatively flat at \$716.5 billion as of March 31, 2008, driven by liquidations of \$23.6 billion, portfolio sales of \$13.5 billion, and purchases of \$35.5 billion.

Capital Update

Fannie Mae's stockholders' equity was \$38.8 billion as of March 31, 2008, compared with \$44.0 billion as of December 31, 2007.

Core capital as of March 31, 2008 was an estimated \$42.7 billion, compared with \$45.4 billion as of December 31, 2007. The company's capital exceeded the statutory minimum by \$11.3 billion, or 36.2 percent, and the statutory minimum plus the OFHEO-directed 20 percent surplus by \$5.1 billion, or 13.5 percent.

On March 19, 2008, OFHEO reduced the capital surplus requirement established by Fannie Mae's May 2006 Consent Order with OFHEO from 30 percent to 20 percent. OFHEO also announced that Fannie Mae was in full compliance with the Consent Order. In addition, OFHEO removed the limitation on the size of Fannie Mae's mortgage portfolio, effective March 1, 2008. Subsequent actions regarding the capital surplus requirement are described on page one of this release.

<u>Capital-raising plan</u>: Fannie Mae is raising \$6 billion in new capital through underwritten public offerings of new securities. The company commences today two offerings totaling \$4 billion of common stock and non-cumulative mandatory convertible preferred stock. This offering will be followed in the very near future by an offering of non-cumulative, non-convertible preferred stock.

Net proceeds of the offerings will be used for general corporate purposes, including to enable the company to maintain a strong, conservative balance sheet, enhance long-term shareholder value, and provide stability to the secondary mortgage market, as noted on page one of this release.

All of the common stock is being newly issued by the company. Fannie Mae has granted the underwriters 30-day options to purchase from the company up to an additional 15 percent each of the common stock and non-cumulative mandatory convertible preferred stock.

Fannie Mae Reports First Quarter 2008 Results Page Eight

The common stock and mandatory convertible preferred stock offerings will be managed by Lehman Brothers Inc., and J.P. Morgan Securities Inc., as joint book-running managers. Copies of the preliminary Offering Circulars are available on Fannie Mae's Web site and can be obtained from both underwriters at the following addresses:

- Lehman Brothers Inc., c/o Broadridge, Integrated Distribution Services, 1144 Long Island Avenue, Edgewood, NY 11717; fax 631-254-7140, or email: <u>qiana.smith@broadridge.com</u>.
- J.P. Morgan Securities Inc., 4 Chase Metrotech Center, CS Level, Brooklyn, NY 11245, Attention: Chase Distribution & Support Service Northeast Statement Processing Phone: (718) 242-8002.

Credit Update

Fannie Mae's credit-related expenses continued to increase in the first quarter of 2008 as a result of higher charge-offs, defaults and average loan loss severities.

<u>Total Credit-Related Expenses</u>. Credit-related expenses increased to \$3.2 billion in the first quarter of 2008 from \$3.0 billion for the fourth quarter of 2007. The key drivers are as follows:

- The provision for credit losses attributable to the guaranty book of business increased to \$2.3 billion for the first quarter of 2008, from \$2.2 billion for the fourth quarter of 2007.
- The provision for credit losses attributable to fair value losses on loans purchased from MBS trusts ("SOP-03-3") increased to \$728 million for the first quarter of 2008 from \$559 million for the fourth quarter of 2007.
- Foreclosed property expenses decreased to \$170 million for the first quarter of 2008, from \$179 million for the fourth quarter of 2007.

<u>Credit Loss Ratio</u>. Management assesses the company's credit performance by reviewing the company's credit loss ratio, which consists of loan charge-offs (net of recoveries and excluding losses on loans purchased from MBS trusts) plus foreclosed property expenses, as a percentage of the average guaranty book of business.

Fannie Mae Reports First Quarter 2008 Results Page Nine

For the first quarter of 2008, the credit loss ratio was 12.6 basis points, compared with 8.1 basis points in the fourth quarter of 2007. If the fair value losses on loans purchased from MBS trusts were included, the credit loss ratio would have been 20.7 basis points for the first quarter of 2008, compared with 14.8 basis points for the fourth quarter of 2007.

<u>Credit Loss Concentration</u>. Credit losses on Fannie Mae's single-family credit guaranty book of business were concentrated in states experiencing large home price declines or economic weakness, including California, Florida, Michigan and Ohio. For example, loans from Michigan made up 3.1 percent of the single-family conventional mortgage credit book of business, but 22.9 percent of credit losses in the first quarter of 2008, while loans from California made up 15.3 percent of the single-family conventional mortgage credit book of business, but 18.6 percent of credit losses, in the first quarter of 2008. Because the home price declines began in 2006 in some states, or accelerated in 2006 in other states, loans originated in 2006 and 2007 have a significantly higher loss rate than previous years' originations. On a product basis, single-family Alt-A loan products have experienced significant losses compared to their percentage of the book both because the majority were originated at the recent peak of the national home prices, and they have higher risk characteristics such as lower documentation and a higher percentage of interest-only loans. Alt-A loans made up about 11.2 percent of the single-family conventional mortgage credit book of business and 42.7 percent of the credit losses.

Further information about the credit quality and loss experience of different portions of Fannie Mae's single-family conventional mortgage credit book is available in the company's Investor Summary, which is provided on the company's Web site with this release.

<u>Alt-A and Subprime Private-Label Securities</u>. Fannie Mae recognized \$1.1 billion in losses during the first quarter of 2008 on mortgage-related securities backed by Alt-A and subprime loans that were classified as trading securities.

Fannie Mae Reports First Quarter 2008 Results Page Ten

In addition, the company recorded \$52 million of other-than-temporary impairment on \$751 million of unpaid principal balance of subprime private-label securities classified as available-for-sale (AFS). This decision was made after management concluded (based on credit analysis including internal stress test scenarios on these securities) that it was no longer probable that the company would collect all of the contractual principal and interest amounts due, or no longer intended to hold the securities until recovery. Gross unrealized losses related to Alt-A and subprime securities classified as AFS totaled \$8.0 billion as of March 31, 2008, compared with \$3.3 billion as of December 31, 2007, driven by widening credit spreads in the market.

<u>Management Actions on Credit</u>. The company continues to pursue and implement additional measures intended to help homeowners succeed. These measures include reduced participation in higher-risk mortgage segments, and tightening underwriting and eligibility standards, including requiring higher credit scores, lower loan-to-value ratios and increased documentation, and significantly reducing Alt-A acquisitions. Loss mitigation efforts include increasing company credit operations staff dedicated to on-site oversight at the offices of its largest loan-servicers to help guide loss mitigation decisions and ensure adherence to Fannie Mae policies. The company also has extended the maximum collection forbearance period for delinquent loans from four to six months, and provides incentives to attorneys and servicers to pursue alternatives to foreclosure. In addition, the company has purchased credit enhancement on riskier loans, primarily in prior quarters, and also actively monitors counterparties.

In the first quarter of 2008, Fannie Mae announced new mortgage eligibility and pricing updates for loans underwritten through Desktop Underwriter[®] with the release of Version 7.0, and for manually underwritten loans. These updates become effective on June 1, 2008 and include 1) new or revised credit score requirements and lower maximum loan-to-value ratio requirements for manually underwritten loans; 2) a minimum credit score of 580 for most mortgage loans delivered; 3) a longer time period (increased from four to five years) before loans are accepted from borrowers with a prior foreclosure; and 4) no further acceptance of borrowers with excessive prior mortgage delinquencies.

Fair Value Update

Fair value of net assets: Fannie Mae also reported a \$23.6 billion decline in the non-GAAP estimated fair value of its net assets, from \$35.8 billion at year-end 2007 to \$12.2 billion as of March 31, 2008. The widening of mortgage-to-debt spreads caused a decline of roughly \$8.4 billion. In addition, the fair value of guaranty obligations increased by approximately \$16.0 billion. This increase resulted both from an increase in the underlying risk in the company's credit guaranty book of business, as declining home prices continued to adversely affect mark-to-market loan-to-value ratios, and from an increase in the estimate of the risk premium required to take mortgage credit risk in the current market, as indicated by the pricing of new guaranty business.

Changes in Fair Value Accounting

Fannie Mae's financial results for the first quarter of 2008 were affected by its adoption of the following new accounting standards relating to the valuation of the financial instruments it holds.

- *Fair Value Option*. In connection with its adoption of Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159), effective January 1, 2008, Fannie Mae elected to report a larger portion of its financial instruments at fair value, with changes in the fair value of these instruments included in its results of operations. In connection with the company's election to report additional financial instruments at fair value, it now reports all changes in the fair value of its trading securities, debt and derivatives collectively in the "Fair value losses, net" line item of its condensed consolidated statement of operations.
- *Fair Value Measurements.* In connection with the company's adoption of SFAS No. 157, *Fair Value Measurements* (SFAS 157), on January 1, 2008, Fannie Mae implemented a prospective change in its method of measuring the fair value of the guaranty obligations it incurs when it enters into guaranty contracts. Accordingly, the company no longer recognizes losses or records deferred profit in its financial statements at inception of its guaranty contracts issued after December 31, 2007.

Fannie Mae Reports First Quarter 2008 Results Page Twelve

This change had a favorable impact on the company's results of operations for the quarter. Although the company no longer recognizes losses at the inception of its guaranty contracts, it will continue to accrete previously recognized losses into its guaranty fee income over time until these losses have been fully amortized. The change in the company's method of measuring the fair value of its guaranty obligations contributed to a significant decline in the non-GAAP estimated fair value of its net assets as of March 31, 2008.

<u>Hedge accounting</u>. Beginning in April 2008, Fannie Mae implemented fair value hedge accounting with respect to its derivatives to hedge, for accounting purposes, the interest rate risk related to some of its mortgage assets. The company believes the application of hedge accounting will allow it to offset the fair value gains or losses on some of its derivative instruments against the corresponding fair value losses or gains attributable to changes in interest rates on the specific hedged mortgage assets. As a result, the company expects a reduction in the level of volatility in its financial results that is attributable to changes in interest rates. However, the company's implementation of hedge accounting will not affect its exposure to spread risk or the volatility in its financial results that result from changes in credit spreads.

Outlook

Fannie Mae expects severe weakness in the housing market to continue in 2008. The company believes this housing weakness will lead to increased delinquencies, defaults and foreclosures on mortgage loans, and slower growth in U.S. residential mortgage debt outstanding, in 2008. Based on this market outlook, Fannie Mae currently has the following expectations about its financial performance in 2008:

• <u>Credit</u>. Management's preliminary estimate is that home prices declined by approximately 3 percent during the first quarter of 2008, which exceeded the pace of the decline anticipated when the company provided its full year forecast of home price declines of 5 to 7 percent for 2008. Therefore, the company is updating its full-year estimate for home price declines in 2008 to a range of 7 to 9 percent on a national basis, with significant regional differences in the rate of home price declines.

Fannie Mae Reports First Quarter 2008 Results Page Thirteen

Based on this and related increases in anticipated loan loss severity on foreclosures during the first quarter, management now expects that the credit loss ratio will be between 13 and 17 basis points for the full year 2008.

- <u>Capital</u>. Management believes that the additional capital being raised, as described in this release, will enable the company to pursue growth and investment opportunities while also maintaining a prudent capital cushion in a volatile and challenging market through 2008 and 2009. Although future credit conditions are difficult to predict, the company plans capital using stress scenarios that, among other things, assume credit losses that are significantly higher than its current estimates, including default rate assumptions developed from the company's experience with the economic conditions in California in the 1990s, extrapolated for most of the nation. Management believes that credit losses will increase in 2009 relative to 2008.
- <u>Business growth</u>. Management believes that Fannie Mae's single-family guaranty book of business will continue to grow faster than the rate of overall growth in U.S. residential mortgage debt outstanding, and that guaranty fee income will also grow in 2008 as compared to 2007. Single-family business volume has benefited in recent months from a significant reduction in competition from private issuers of mortgage-related securities and reduced demand for mortgage assets from other market participants. Fannie Mae also has experienced and expects to continue to experience increased competition from the Federal Housing Administration (FHA) due to the recent increase in the maximum loan limit for FHA-insured loans in specified high-cost metropolitan areas to \$729,750 from a previous limit of \$362,790 pursuant to the Economic Stimulus Act of 2008. This increased competition may negatively affect the company's single-family business volume in 2008. Single-family business volume may also be reduced by the additional price increases and underwriting changes the company is implementing this year.

Fannie Mae Reports First Quarter 2008 Results Page Fourteen

• <u>Net interest income</u>. Management expects that if the interest-rate yield curve continues to remain steep throughout 2008, and if optionadjusted spreads on mortgage assets remain at historically high levels, the company's taxable-equivalent net interest yield for the full year would increase over the taxable-equivalent net interest yield of 61 basis points for 2007. If current market conditions continue, the company expects its tax-equivalent net interest yield (excluding the benefit received from the redemption of step-rate debt securities during the first quarter of 2008) to continue to increase for the remainder of 2008.

The company provides additional detail on trends that may affect the result of operations, financial condition, liquidity and regulatory capital position in future periods in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" section of the Form 10-Q.

"As the market correction continues, we will continue to play both offense and defense," Mudd said. "Defense means building and conserving our capital, helping homeowners succeed, controlling our credit losses, and maintaining adequate reserves for further credit losses as the correction plays out. Offense means using our capital to help the market through this period and pursuing extraordinary opportunities to purchase and guarantee high-quality, well-priced mortgage assets. By helping the market bridge this crisis and get to recovery, Fannie Mae can build a strong book of business and shareholder value for the future."

Conference Call

Fannie Mae will host a conference call for the investment community today at 10:30 a.m., Eastern Time. Mary Lou Christy, Senior Vice President, Investor Relations, will host the call. Daniel H. Mudd, President and Chief Executive Officer, Stephen M. Swad, Executive Vice President and Chief Financial Officer, and Robert Levin, Executive Vice President and Chief Business Officer, will address investors and analysts and will be available for a question-and-answer session along with other members of senior management.

Fannie Mae Reports First Quarter 2008 Results Page Fifteen

The dial-in number for the call is **1-877-209-9922** or, for international callers, **612-332-0932**. The confirmation code is **9200753**. Please dial in 5 to 10 minutes prior to the start of the call. A replay of the call will be available for 30 days starting at 1:00 p.m. Eastern Time on May 6, through midnight Eastern Time on June 3.

The replay number for the call is **1-800-475-6701**, or for international callers, **320-365-3844**. The confirmation code is **920753**. The conference call will also be Web cast at *www.fanniemae.com* and will be available for 30 days after the call.

###

Certain statements in this press release, including those relating to future performance, income, credit-related expenses, credit losses, net interest yield, guaranty fees, fair value of assets, other expenses, income and losses; current view of industry trends and our expectations for the industry; future plans; the volatility of financial results; plans to raise capital and the amount, as well as planned use of the net proceeds; and future business activities, may be considered forward-looking statements within the meaning of the federal securities laws. Although Fannie Mae believes that the expectations set forth in these statements are based upon reasonable assumptions, Fannie Mae's future plans, operations and its actual performance may differ materially from what is indicated in any forward-looking statements. Additional information that could cause actual results to differ materially from these statements are detailed in Fannie Mae's quarterly report on Form 10-Q for the period ended March 31, 2008, and its annual report on Form 10-K for the year ended December 31, 2007, including the "Risk Factors" section in these reports, and in its reports on Form 8-K.

All forms Fannie Mae filed with the SEC can also be obtained on the company's web site at www.fanniemae.com/ir/sec/.

Fannie Mae is a shareholder-owned company with a public mission. We exist to expand affordable housing and bring global capital to local communities in order to serve the U.S. housing market. Fannie Mae has a federal charter and operates in America's secondary mortgage market to ensure that mortgage bankers and other lenders have enough funds to lend to home buyers at low rates. In 2008, we mark our 70th year of service to America's housing market. Our job is to help to those who house America.

This press release does not constitute an offer to sell or the solicitation of an offer to buy securities of Fannie Mae. Nothing in this press release constitutes advice on the merits of buying or selling a particular investment. Any investment decision as to any purchase of securities referred to herein must be made solely on the basis of information contained in Fannie Mae's applicable offering documents, and that no reliance may be placed on the completeness or accuracy of the information contained in this press release.

You should not deal in securities unless you understand their nature and the extent of your exposure to risk. You should be satisfied that they are suitable for you in the light of your circumstances and financial position. If you are in any doubt you should consult an appropriately qualified financial advisor.

See Explanation and Reconciliation of Non-GAAP Measures to GAAP Measures

Explanation and Reconciliation of Non-GAAP Measures to GAAP Measures

- (1) Each of the amounts listed as a "fair value adjustment" represents the difference between the carrying value included in our GAAP condensed consolidated balance sheets and our best judgment of the estimated fair value of the listed item.
- ⁽²⁾ Certain prior period amounts have been reclassified to conform to the current period presentation.
- (3) We determined the estimated fair value of these financial instruments in accordance with the fair value guidelines outlined in SFAS No. 157, as described in "Notes to Condensed Consolidated Financial Statements—Note 16, Fair Value of Financial Instruments." In Note 16, we also disclose the carrying value and estimated fair value of our total financial assets and total financial liabilities as well as discuss the methodologies and assumptions we use in estimating the fair value of our financial instruments.
- (4) We have separately presented the estimated fair value of "Mortgage loans held for sale," "Mortgage loans held for investment, net of allowance for loan losses," "Guaranty assets of mortgage loans held in portfolio" and "Guaranty obligations of mortgage loans held in portfolio," which, taken together, represent total mortgage loans reported in our GAAP condensed consolidated balance sheets. In order to present the fair value of our guarantees in these non-GAAP consolidated fair value balance sheets, we have separated (i) the embedded fair value of the guaranty assets, based on the terms of our intra-company guaranty fee allocation arrangement, and the embedded fair value of the obligation from (ii) the fair value of the mortgage loans held for sale and the mortgage loans held for investment. We believe this presentation provides transparency into the components of the fair value of the mortgage loans associated with the activities of our guaranty businesses and the components of the activities of our capital markets business, which is consistent with the way we manage risks and allocate revenues and expenses for segment reporting purposes. While the carrying values and estimated fair values of the individual line items may differ from the amounts presented in Note 16 of the condensed consolidated financial statements, the combined amounts together equal the carrying value and estimated fair value for as in Note 16.
- (5)In our GAAP condensed consolidated balance sheets, we report the guaranty assets associated with our outstanding Fannie Mae MBS and other guarantees as a separate line item and include buy-ups, master servicing assets and credit enhancements associated with our guaranty assets in "Other assets." The GAAP carrying value of our guaranty assets reflects only those guaranty arrangements entered into subsequent to our adoption of FIN No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others (an interpretation of FASB Statements No. 5, 57, and 107 and rescission of FIN No. 34) ("FIN 45"), on January 1, 2003. On a GAAP basis, our guaranty assets totaled \$9.8 billion and \$9.7 billion as of March 31, 2008 and December 31, 2007, respectively. The associated buy-ups totaled \$985 million and \$944 million as of March 31, 2008 and December 31, 2007, respectively. In our non-GAAP supplemental consolidated fair value balance sheets, we also disclose the estimated guaranty assets and obligations related to mortgage loans held in our portfolio. The aggregate estimated fair value of the guaranty asset-related components totaled \$16.7 billion and \$18.1 billion as of March 31, 2008 and December 31, 2007, respectively. These components represent the sum of the following line items in this table: (i) Guaranty assets of mortgage loans held in portfolio; (ii) Guaranty obligations of mortgage loans held in portfolio, (iii) Guaranty assets and buy-ups; and (iv) Master servicing assets and credit enhancements. See "Critical Accounting Policies and Estimates-Change in Measuring the Fair Value of Guaranty Obligations"
- (6) The line items "Master servicing assets and credit enhancements" and "Other assets" together consist of the assets presented on the following five line items in our GAAP condensed consolidated balance sheets: (i) Accrued interest receivable; (ii) Acquired property, net; (iii) Deferred tax assets; (iv) Partnership investments; and (v) Other assets. The carrying value of these items in our GAAP condensed consolidated balance sheets together totaled \$48.1 billion and \$41.9 billion as of March 31, 2008 and December 31, 2007, respectively. We deduct the carrying value of the buy-ups associated with our guaranty obligation, which totaled \$985 million and \$944 million as of March 31, 2008 and December 31, 2007, respectively in our GAAP condensed consolidated balance sheets because buy-ups are a financial instrument that we combine with guaranty assets in our SFAS 107 disclosure in Note 16.
- (7) With the exception of partnership investments and deferred tax assets, the GAAP carrying values of other assets generally approximate fair value. While we have included partnership investments at their carrying value in each of the non-GAAP supplemental consolidated fair value balance sheets, the fair values of these items are generally different from their GAAP carrying values, potentially materially. Our LIHTC partnership investments included in partnership investments had a carrying value of \$7.7 billion and \$8.1 billion and an estimated fair value of \$8.7 billion and \$9.3 billion as of March 31, 2008 and December 31, 2007, respectively. We assume that certain other assets, consisting primarily of prepaid expenses, have no fair value. Our GAAP-basis deferred tax assets are described in "Notes to Condensed Consolidated Financial Statements—Note 10, Income Taxes." We adjust the GAAP-basis deferred income taxes for purposes of each of our non-GAAP supplemental consolidated fair value balance sheets to include estimated income taxes for the difference between our non-GAAP supplemental consolidated fair value balance sheets net assets, including deferred taxes from the GAAP condensed consolidated balance sheets, and our GAAP condensed consolidated balance sheets equity. Because our adjusted deferred income taxes are a net asset in each year, the amounts are included in our non-GAAP fair value balance sheets.
- (8) Includes short-term debt and long-term debt at fair value totaling \$4.5 billion and \$15.1 billion, respectively, as of March 31, 2008.
- (9) The line item "Other liabilities" consists of the liabilities presented on the following four line items in our GAAP condensed consolidated balance sheets: (i) Accrued interest payable; (ii) Reserve for guaranty losses; (iii) Partnership liabilities; and (iv) Other liabilities. The carrying value of these items in our GAAP condensed consolidated balance sheets together totaled \$23.5 billion and \$20.5 billion as of March 31, 2008 and December 31, 2007, respectively. The GAAP carrying values of these other liabilities generally approximate fair value. We assume that certain other liabilities, such as deferred revenues, have no fair value.
- (10) "Preferred stockholders' equity" is reflected in our non-GAAP supplemental condensed consolidated fair value balance sheets at the estimated fair value amount.
- (11) "Common stockholders' equity" consists of the stockholders' equity components presented on the following five line items in our GAAP consolidated balance sheets: (i) Common stock; (ii) Additional paid-in capital; (iii) Retained earnings; (iv) Accumulated other comprehensive loss; and (v) Treasury stock, at cost. "Common stockholders' equity" is the residual of the excess of the estimated fair value of total assets over the estimated fair value of total liabilities, after taking into consideration preferred stockholders' equity and minority interest in consolidated subsidiaries.

2008 Q1 10-Q Investor Summary Fannie Mae

May 6, 2008

- 10-Q for the quarter ended March 31, 2008 ("2008 Q1 Form 10-Q"). These materials should be reviewed together with the 2008 Q1 Form 10-Q, copies including information contained in Fannie Mae's Quarterly Report on Form of which are available on the company's Web site at www.fanniemae.com These materials present tables and other information about Fannie Mae, under the "Investor Relations" section of the Web site.
- 2008 Q1 Form 10-Q, which also includes more detailed explanations and segments, financial condition and results of operations is contained in its More complete information about Fannie Mae, its business, business presentation. Footnotes to the included tables have been omitted. additional information relating to the information contained in this

private-label mortgage-related securities investments; further declines in home prices in excess of our current share and credit losses; our strategy; the fair value of our net assets; our expectations regarding the housing, customers; widening of credit spreads; and changes in interest rates, as well as others described in the "Risk osses on the mortgages we hold or guaranty; impairments, delinquencies and losses on loans that back our differ materially from what is indicated in these forward-looking statements. Factors that could cause actual Factors" sections in Fannie Mae's annual report on Form 10-K for the year ended December 31, 2007 ("2007 institutional counterparties on its obligations to us; the loss of business volume from any of our key lender position, financial performance and condition, ability to take advantage of business opportunities, market credit and mortgage markets; volatility in our results; and our future credit loss ratio. Future results may This presentation includes forward-looking statements, including statements relating to our future capital results to differ materially include, but are not limited to, greater than expected delinquencies and credit expectations; a recession or other economic downturn; a default by one or more of our significant Form 10-K") and 2008 Q1 Form 10-Q and in its reports on Form 8-K.

Other terms used but not defined in this presentation may be defined in our 2007 Form 10-K or 2008 Q1 Form 10-O

2008 Q1 Executive Summary

- Net loss decreased \$1.4 billion from (\$3.6 billion) in 2007 Q4 to (\$2.2 billion) in 2008 Q1.
 - Net revenues grew \$0.7 billion or 21.8%, driven by increases in guaranty fee income and net interest income.
- Fair value losses increased \$0.9 billion or 27.3% from \$3.4 billion to \$4.4 billion driven by wider spreads on trading assets and interest rate declines that caused derivatives losses to remain high.
- The provision for credit losses plus foreclosed property expenses rose to \$3.2 billion from \$3.0 billion in 2007 Q4 primarily due to an increase in charge-offs. This reflects higher defaults and average loss severities, driven by national home price declines and weak economic conditions in the Midwest.
- EPS increased \$1.23 from (\$3.80) in 2007 Q4 to (\$2.57) in 2008 Q1.
- Capital in excess of the OFHEO mandated 20% surplus increased to \$5.1 billion in 2008 Q1 versus \$3.9 billion in 2007 Q4 primarily due to the reduction of the surplus requirement from 30% to 20%.
 - Progress with regulator on reducing excess capital levels.
- Fannie Mae announced plans to raise \$6 billion in new capital.
- Public offerings of common stock, non-cumulative mandatory convertible preferred stock and, in the very near future, noncumulative, non-convertible preferred stock.
- New capital will enable us to maintain a strong conservative balance sheet, enhance long-term shareholder value, and provide stability to the secondary mortgage market.
- Credit remains a top focus of the company.
- Management continues to tighten eligibility standards and actively mitigate credit losses.
- Addressing market-related volatility impact on capital
- Eliminated losses on certain guaranty contracts as a result of adopting new accounting standard, SFAS 157.
- On January 1, 2008, in connection with a new accounting standard, SFAS 159, we re-designated \$18.1 billion of agency securities as trading which we expect will have the effect of reducing the impact of changing interest rates on our derivatives marked-tomarket.
- In mid-April, we implemented hedge accounting which we expect will have the effect of decreasing the impact of derivative mark to market changes.
- Implemented HomeSaver AdvanceTM initiative which we expect will allow homeowners to stay in their homes and also will mitigate losses on loans purchased from MBS trusts.

Tax-Equivalent Net Interest Income and Yield

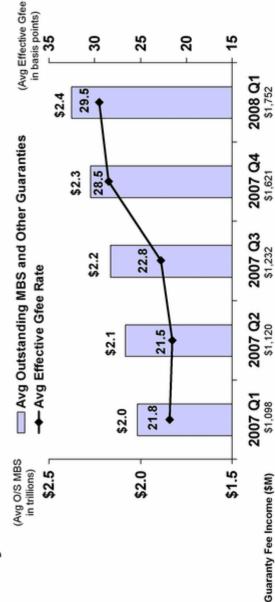

Average Interest Earning Assets

- Redemption of step rate debt added 17 bps, on an annualized basis, to the net interest yield in 2008 Q1. This reflects the reversal of interest accrued on step-rate debt because the debt was called before all the interest was paid.
- SOP 03-3 accretion increased net interest income by \$35 million in 2008 Q1 (2 bps positive impact on net interest yield), \$38 million in 2007 Q4 (2 bps), \$21 million in 2007 Q3 (1 bp), \$14 million in 2007 Q2 (1 bp), and \$7 million in 2007 Q1 (less than 1 bp).
- If current market conditions continue, we expect net interest yield (excluding the benefit received from the redemption of step rate debt securities during 2008 Q1) to continue to increase for the remainder of 2008.

Our net interest yield reflected the benefits of a steeper yield curve as we shifted our funding mix to a higher proportion of lower-rate, short-term debt.

Guaranty Fee Income

- million in 2007 Q4, \$144 million in 2007 Q3, \$91 million in 2007 Q2, and \$92 million in 2007 Q1. These accretion amounts will be more than the cumulative LCGC recognized in previous periods due to the treatment of upfront cash items and credit enhancements received at the inception of the Accretion of previously recognized losses on certain guaranty contracts (LCGC) increased guaranty fee income by \$297 million in 2008 Q1, \$276 guaranty contracts.
- Amortization of deferred fees accounted for a substantial portion of the increase in effective guaranty fee rate from 2007 Q3 to 2007 Q4. Such amortization was roughly flat in 2008 Q1 versus 2007 Q4.
- Average charged guaranty fee on new business was 25.9 bps in 2008 Q1 versus 29.2 bps in 2007 Q4. Average charged fee for March 2008 was 27.9 bps from 26.5 bps for December 2007 and 25.6 bps for March 2007
- Price increases went into effect on March 1, 2008, and an additional price increase is scheduled to go into effect in June 2008. The impact of the March price increase was partially offset by a decline in acquisitions of higher-risk, higher-priced product such as Alt-A.

Growth in guaranty fee income driven primarily by book growth and an increase in average effective guaranty fee rate.

ø

Fair Value Items

Effect on 2008 Q1 Results of Operations of Significant Market-Based Valuation Adjustments

(dollars in millions)	2008 Q1	2007 Q4	2007 Q3	2007 Q2	200	2007 Q1
Derivatives fair value gains (losses), net Gains (losses) on trading securities, net Debt foreign exchange gains (losses), net Debt fair value gains, net Fair value gains (losses), net SOP 03-3 fair value losses Losses on certain guaranty contracts Total	\$ (3,003) (1,227) (157) (157) (157) (157) (128) (728) - \$ (5,105)	\$ (3,222) (215) (2) (2) (3,439) (559) (559) (386) \$ (4,384)	\$ (2,244) 290 (133) (133) (133) (133) (133) (133) (570) (670) (570) (570) (570)	\$ 1,916 (501) 9 1,424 (66) (461) \$ 897	ო ო	(563) 61 (64) (64) (566) (69) (918)

Principal reasons for fair value declines:

- Reduced levels of liquidity in the mortgage and credit markets resulted in wider credit spreads creating significant losses - primarily on our CMBS, subprime, Alt-A, and non-mortgage trading securities.

Declines in interest rates drove derivative losses with only partial offsets from trading securities.

Reducing market-related volatility impact on capital:

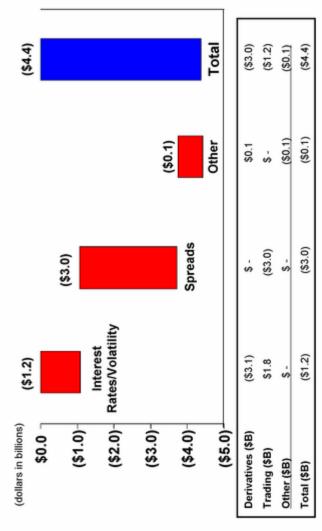

- Implemented hedge accounting in April 2008, which should have the effect of reducing capital fluctuations associated with changes in interest rates.

Eliminated losses on certain guaranty contracts as a result of adopting SFAS 157 on January 1, 2008.

🌊 FannieMae

Fair Value Items

Effect on 2008 Q1 Results of Operations of Significant Market-Based Valuation Adjustments

Actions to reduce future interest rate volatility associated with these items:

- In connection with adoption of SFAS 159, moved selected agency MBS to MTM accounting to reduce the impact of changing interest rates on derivative MTM.
 - Implemented hedge accounting in April 2008.

Wider credit spreads caused trading losses and lower interest rates triggered derivative losses. Hedge accounting is expected to have the effect of reducing volatility created by interest rates. Spread risk remains in trading portfolio.

⁽¹⁾ Certain amounts have been reclassified to conform with the current p	It period	presenta	tion.							

2007 Q4 other-than-temporary impairment (\$736 million) was driven by impairment of securities in our liquid investment portfolio. Beginning in 2008 Q1, these securities were re-designated as trading and marked-to-market through fair value gains (losses).

Lower impairment losses drove the reduction in investment losses in 2008 Q1.

(1) We previously calculated our credit loss ratio based on annualized credit losses as a percentage of our mortgage credit book of business, which includes non-Fannie Mae mortgage-related securities held in our mortgage investment portfolio that we do not guarantee. Because losses related to non-Fannie Mae mortgage-related securities are not reflected in our credit losses, we revised the calculation of our credit loss ratio to reflect credit losses as a percentage of our business. All ratios are annualized.	redit losses as a antee. Because itage of our guar	r percentage losses relat anty book o	of our morts led to non-Fa f business.	gage credit t innie Mae m All ratios are	ook of busin ortgage-relat annualized.	ess, which ir ed securăie	iciudes non-l	Fannie Mae n ected in our c	nortgage-n redit losse	blated s, we revised

Credit loss ratio (excluding the impact of SOP 03-3) increased to 12.6 bps in 2008 Q1 from 8.1 bps in 2007 Q4.

- The company expects the 2008 credit loss ratio of 13 to 17 basis points (excluding the impact of SOP 03-3) based on home price declines in 2008 of 7 to 9 percent. We also expect peak-to-trough declines in home prices of 15 to 19 percent.
- Allowance for loan losses and reserve for guaranty losses are influenced by a variety of factors such as delinquency trends, borrower behavior in rapidly declining markets, and the pace and depth of home price declines, particularly pronounced in certain regions. If the current negative trend in the housing market continues, we expect a further increase in our loss reserves during 2008 due to higher delinquencies, defaults, and loan loss severities
- We expect credit losses to increase in 2009 relative to 2008.

Increased realized credit losses drive higher credit-related expenses. Credit remains a key focus of the company.

	Current ⁽¹⁾	Defaults (2)	90 days or more delinquent	Total	⁽⁵⁾ In our experience, it generally takes at least 18 to 24 months to assess the utilimate re-performance loan. Accordingly, these re-performance statistics as of March 31, 2008 for delinquent loans purchased trusts during 2008 and 2007 may not be indicative of the utimate long-term performance of these loans. ⁽²⁾ Consists of foreclosures, preforeclosure sales, sales to third parties and deeds in lieu of foreclosures.

- Despite a reduction in the number of seriously delinquent loans purchased from MBS trusts, SOP 03-3 losses increased in 2008 Q1 as the average fair value of loans purchased fell from 70% in Q4 2007 to 62% in Q1 2008.
- Going forward, we expect that HomeSaver AdvanceTM, initiated in March 2008, will reduce the number of loans that we otherwise would have purchased out of MBS trusts in 2008.

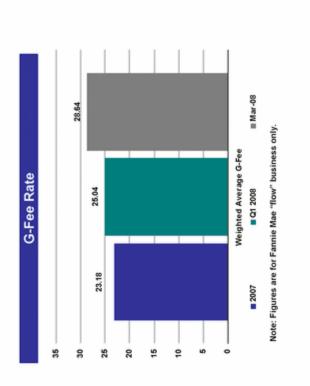

Increased losses on seriously delinquent loans purchased from MBS trusts driven by declines in average market price.

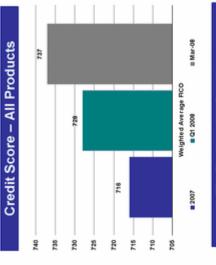

Proactive Credit Management

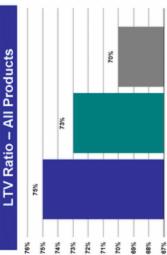

- Tightening underwriting and eligibility standards / reduced participation in riskier segments
- Stricter eligibility requirements increasing FICOs, lowering LTVs and increasing documentation requirements i
- Significantly reduced Alt-A acquisitions
- Increasing loss mitigation efforts
- Focused on work-outs
- Encourage servicers to ramp up work-outs and outreach programs to delinquent borrowers
- Provide incentives to attorneys and servicers to pursue alternatives to foreclosure i
- Benefiting from credit enhancement on riskier loans; credit enhancement purchased primarily in prior quarters.
- Actively monitoring counterparties and enhancing counterparty collateral requirements
- Credit enhancement providers
- Servicers

Substantial loss mitigation efforts are underway.

Single-Family Pricing and Credit

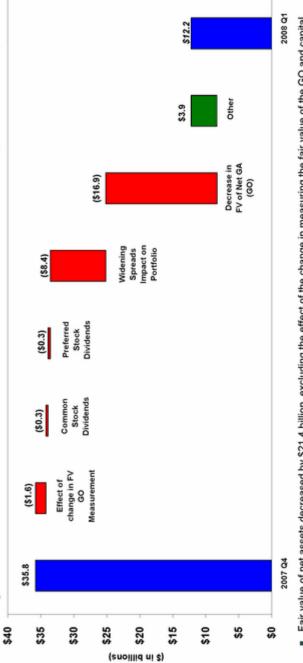

Improved credit and pricing metrics on new acquisitions, at the same time market share increases.

2007

Change in Estimated After-Tax Fair Value of Net Assets (Non-GAAP)

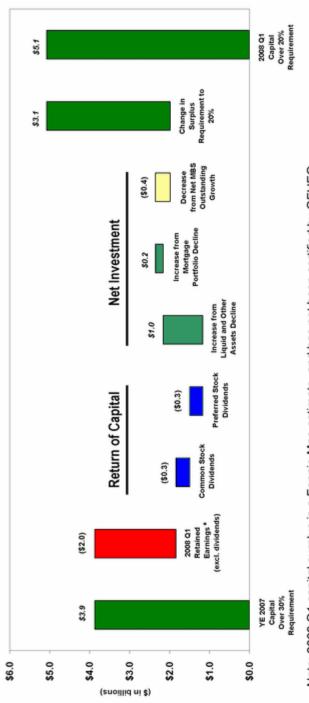

- Fair value of net assets decreased by \$21.4 billion, excluding the effect of the change in measuring the fair value of the GO and capital transactions, driven by change in GO and widening spreads.
- Under our new methodology, the GO value is estimated based on our most recent pricing for issuance of our guaranty.
- Approximately 40% of the increase in the fair value of our net guaranty obligation resulted from an increase in the underlying risk in our credit guaranty book as delinquencies increased and home prices declined; the remaining approximately 60% of the increase resulted from an increase in the risk premium required to take mortgage credit risk in the current market, as indicated by the pricing of our new guaranty business.

Increase in guaranty obligation and wider credit spreads reduced the fair value of net assets.

The estimated fair value of our net assets (non-GAAP) represents the estimated fair value of total assets less the estimated fair value of total liabilities. We reconcile the estimated fair value of our net assets (non-GAAP) to total stockholders' equity (GAAP) in Appendix II (pg 49) and Table 32 of our 2008 Q1 Form 10-Q.

Numbers may not foot due to rounding

2008 Q1 Capital Surplus - Sources and Uses of Excess Capital

Note: 2008 Q1 capital surplus is a Fannie Mae estimate, and has not been certified by OFHEO

Includes impact of adopting SFAS 157 and SFAS 159 effective January 1, 2008.

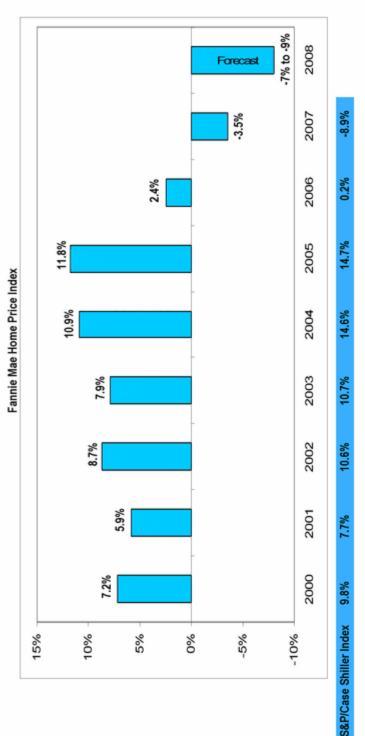

At March 31, 2008, Fannie Mae had \$42.7 billion of core capital and a \$5.1 billion capital surplus.

Numbers may not foot due to rounding

17

APPENDIX I – Credit

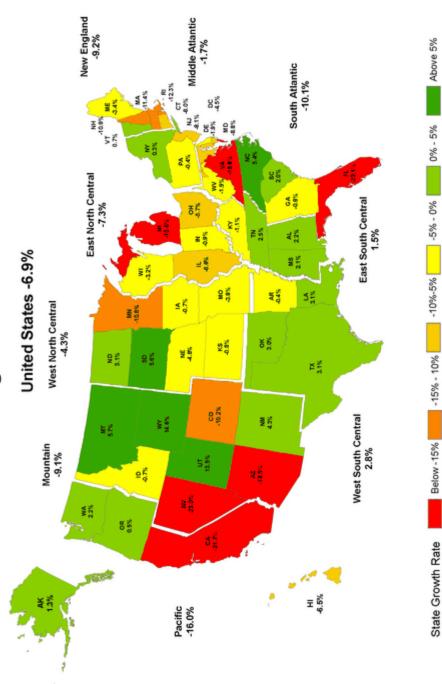

Home Price Growth Rate in the U.S.

Growth rates are from period-end to period-end.

home price decline would be 10-13% (vs. 7-9%); our expected peak-to-trough decline would be 20-25% (vs. 15-19%). The S&P/Case-Shiller Index is metropolitan areas. In addition, the S&P/Case Shiller index includes foreclosure sales; foreclosure sales are excluded from the Fannie Mae index Note: Using the S&P/Case-Shiller weighting method, but excluding the increased impact of foreclosure sales on that index, our 2008 expected value-weighted, whereas the Fannie Mae index is unit-weighted; hence the S&P/Case-Shiller index places greater weight on higher cost and from this forecast. Foreclosure sales tend to depress the S&P/Case Shiller index relative to the Fannie Mae index.

Home Price Changes from 2006 Q2 to 2008 Q1

Below -15%

State Growth Rate

20

Credit Loss Ratio/Delinquency Rates

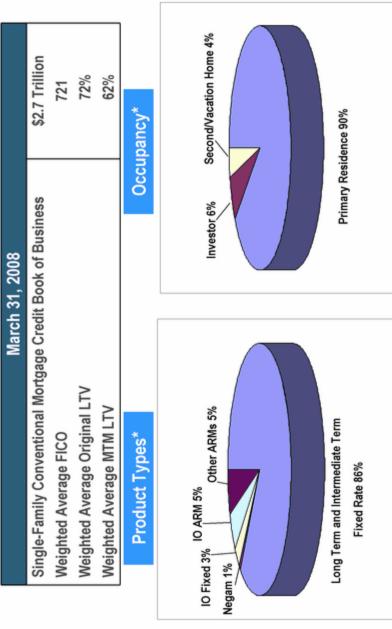

Note: As of 3/31/08, 21% of Fannie Mae's Single-Family guaranty book of business was credit enhanced.

Higher credit loss ratio primarily due to worsening decline in home prices, particularly in the Midwest, California, Florida, Nevada, and Arizona, economic weakness in the Midwest, and rising delinquencies in our Alt-A book and 2006-2007 vintages. Our credit loss ratio excludes the impact of SOP 03-3

Fannie Mae expects its 2008 credit loss ratio to be within a range of 13-17 bps, factoring in a significant increase in loan default and severity rates, and a significant increase in acquisitions of foreclosed properties, as well as a 7 to 9% nationwide decline in home prices * Note: Credit loss ratio is defined as [Net charge-offs (excluding impact of SOP 03-3) + Foreclosed Property Expense (excluding impact of SOP 03-3)]/Average Guaranty Book of Business

Conventional Mortgage Credit Book of Business Characteristics of Fannie Mae Single-Family

Data as of March 31, 2008

Certain data contained in this presentation are based upon information that Fannie Mae receives from third-party sources. Although Fannie Mae generally considers this information reliable, it does not guarantee that it is accurate or suitable for any particular purpose. Fannie Mae access to detailed loan-level information on approximately 95% of our conventional single-family mortgage credit book of business. Excludes non-fannie Mae securities held in portfolio.

Fannie Mae Subprime and Alt-A Exposure

"Alt-A mortgage loam" generally refers to a mortgage loan that can be underwritten with reduced or alternative procumentation that trequired for a full documentation mortgage loan but may also include other alternative product features. As a result, Alt-A mortgage loans such as a Alt-A based on default than non-Alt-A mortgage loans. In reporting our Alt-A exposure, we have classified mortgage loans as Alt-A if the loaders that deliver the mortgage loans to us have classified the loans as Alt-A based on documentation or other product features. We have classified private-label mortgage loans to alt-A if investment portfolio as Alt-A if the accurities were labeled as such when issued.

"Subprime mortgage loam" generally refers to a mortgage loam made to a borrower with a weaker credit profile than that of a prime borrower. As a result of the weaker credit profile, subprime borrowers have a higher likelihood of default than prime borrower. Subprime mortgage loans are typically originated by lenders specializing in this type of business or by subprime divisions of large lenders, using processes unique to subprime loans. In reporting our subprime exposure, we have classified mortgage loans as subprime if the mortgage loans are originated by one of these specially lenders or a subprime division of a large lender. We have classified mortgage loans as subprime if the scorrises have a subprime division of a large lender.

"*citu-it mortgage loam*" generally refers to a mortgage loan that can be underwritten with reduced or alternative documentation than that required for a full documentation mortgage loan but may also include other alternative product features. As a result, Alt-A mortgage loans generally have a higher risk of default than non-Alt-A mortgage loans. In reporting our Alt-A exposure, we have classified mortgage loans as Alt-A if the leaders that deliver the mortgage loans to us have classified the loans as Alt-A if

(1) Defined as UPB of Alt-A loans with credit enhancement as a percent of UPB of all Alt-A loans. At 3/31/08, 8.9% of UPB of Alt-A loans carried only primary MI (no deductible). 27.1% had only pool insurance (which is generally subject to a deductible), 3.3% had primary MI and pool insurance, and 0.7% carried other credit enhancement such as lender recourse.

Fannie Mae's Alt-A guaranteed book of business has more favorable credit characteristics than the loans backing Alt-A Private Label Securities (PLS). All data and CDRs for Q1:08 are based on Jan-08 data. Private Label Security data are from First American CoreLogic, LoanPerformance. LoanPerformance estimates it captures 96 percent of Alt-A PLS. The PLS data includes some loans that Fannie Mae holds in its Alt-A securities portfolio. All summary collateral characteristics are weighted averages using current loan balances. Certain amounts have been calculated by Fannie Mae.

Data as of March 31, 2008

Counterparty Exposure

Counterparty Type	Exposure as of March 31, 2008	Notes ⁽¹⁾
Mortgage Insurers	\$111.5 billion of primary and pool mortgage insurance coverage ("risk in force").	8 mortgage insurance companies provided over 99% of our mortgage insurance; 4 are rated AA- or higher, 3 are rated A, and 1 is rated BB.
Financial Guarantors	Beneficiary of financial guaranties of \$11.1 billion on securities held in investment portfolio or securities guaranteed and sold to third parties.	Manage exposure through in-depth analyses of their financial position and stress analyses of their financial guaranties and available capital. On a case-by-case basis, may restrict types of business we will do with a company, or suspend the company as an acceptable counterparty.
Custodial Depository Institutions	A total of \$51 billion in deposits for scheduled single-family MBS payments were received in March 2008 and held by 317 custodial depository institutions.	97% were held by institutions rated as investment grade by S&P, Moody's, and Fitch as of March 31, 2008.
Derivatives Counterparties	Credit exposure on risk management derivatives net of collateral we held was \$500 million. ⁽²⁾	\$332 million of exposure to firms with AA+/AA/AA- ratings and \$50 million to firms with A+/A/A- ratings.
$^{(1)}$ Ratings are as of May 2, 2008 unless otherwise noted. $^{(2)}$ Exposure is defined as the cost to replace outstanding where applicable.	⁽¹⁾ Ratings are as of May 2, 2008 unless otherwise noted. ^[2] Exposure is defined as the cost to replace outstanding derivatives contracts in gain positions taking into account netting arrangements where applicable.	s taking into account netting arrangements

" Insurance coverage amounts provided for each counterparty may include coverage provided by consolidated subsidiaries of the counterparty.

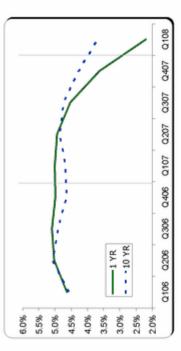

⁽²⁾ Maximum coverage refers to the aggregate dollar amount of insurance coverage (i.e. "risk in force") on single-family loans in our guaranty book of business and represents our maximum potential loss recovery under the applicable mortgage insurance policies.

(3) CMG Mortgage Insurance Company is a joint venture owned by PMI Mortgage Insurance Co. and CUNA Mutual Investment Corporation.

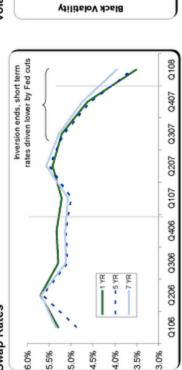

APPENDIX II – Other

Economic Environment – Interest Rates

1-Year and 10-Year Treasuries

 Net interest yield increased due to reduced funding costs and the retirement of step rate debt in 2008 Q1.

 Swap rate declines triggered net losses on derivatives. Widening credit spreads caused overall fair value losses on trading securities, more than offsetting the positive impact of falling rates.

Treasury information: FNM Economic Forecast, March 2008. Swap and Volatility: Capital Markets group.

⁽³⁾ Credit loss ratio excludes the impact of SOP 03-3, which requires that loans purchased from MBS trusts be recorded at fair value at aquisition.

Income Exposures Due to Changes in Interest Rates

- Overall effect Addressing market-related volatility impact on capital
- adoption of SFAS 159 (Fair Value Option) and implementation of hedge accounting in April Anticipate significant reduction in rate driven income statement volatility as a result of 2008.
- Ongoing interest rate exposure to net income is balanced
- Fair Value Hedge Accounting The change in the FV of the hedged assets, due to interest rates, will be included in net income.
- Continue to have income statement exposure to changes in interest rates, although significantly reduced, and spread risk on our trading assets.

Option Adjusted Spreads (OAS) – Lehman

48

The following sets forth a reconciliation of the estimated fair value of our net assets (non-GAAP) to total stockholders' equity (GAAP). A more detailed reconciliation is contained in Table 32 of the 2008 Q1 Form 10-Q.

(dollars in millions)	As of End of Quarter	uarter
	2008 Q1	2007 Q4
Total Stockholders' Equity (GAAP)	\$ 38,836 \$	\$ 44,011
Fair value adjustments	(26,626) ⁽¹⁾	(8,212) ⁽²⁾
Estimated Fair Value of Net Assets, net of tax effect (non-GAAP)	\$ 12,210 \$	\$ 35,799
⁽¹⁾ Represents fair value increase of \$23.5 billion to total assets of \$843.2 billion less a fair value increase of \$50.1 billion to total liabilities of \$804.2 billion.	of \$843.2 billion less a fa	iir value
⁽²⁾ Represents fair value increase of \$11.0 billion to total assets of \$879.4 billion less a fair value increase of \$19.2 billion to total liabilities of \$835.3 billion.	of \$879.4 billion less a fa	iir value

Impairment Summary

(dollars in millions)	200	2008 Q1	200	2007 Q4	200	2007 Q3	2007 Q2	02	2007 Q1	<u>a</u> 1
