Item 7.01. Regulation FD Disclosure.

On September 25, 2007, Fannie Mae (formally known as the Federal National Mortgage Association) issued its monthly financial summary release for the month of August 2007. The summary, a copy of which is furnished as Exhibit 99.1 to this report, is incorporated herein by reference.

The information in this item, including Exhibit 99.1 submitted herewith, shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liabilities of Section 18, nor shall it be deemed incorporated by reference into any disclosure document relating to Fannie Mae, except to the extent, if any, expressly set forth by specific reference in such document.

Item 9.01. Financial Statements and Exhibits.

(d) *Exhibits.* The exhibit index filed herewith is incorporated herein by reference.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, hereunto duly authorized.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

By /s/ David C. Hisey
David C. Hisey
Senior Vice President and Controller

Date: September 26, 2007

EXHIBIT INDEX

The following exhibit is submitted herewith:

<u>Exhibit Number</u>	<u>Description of Exhibit</u>
99.1	Monthly summary release for August 2007 issued by Fannie Mae on September 25, 2007

MONTHLY SUMMARY HIGHLIGHTS

AUGUST 2007

- Fannie Mae's *Book of Business* grew at a compound annualized rate of 15.0 percent in August driven by growth in *Fannie Mae MBS and Other Guarantees*.
- *Fannie Mae MBS and Other Guarantees* rose at a compound annualized rate of 17.1 percent during the month. Growth was attributable to continued strong issuance of Fannie Mae MBS, which rose to \$56.7 billion in August, and a decline in liquidations.
- The Gross Mortgage Portfolio was \$728.9 billion in August. On September 19, 2007, OFHEO announced changes to the methodology for calculating our existing mortgage portfolio cap to provide the company flexibility in managing market-based fluctuations. Effective July 1, 2007, OFHEO increased the portfolio cap to \$735 billion for the third quarter, as measured by unpaid principal balance. Additionally, effective October 1, 2007, OFHEO will allow the gross mortgage portfolio to grow 1 percent in the fourth quarter of 2007 and 0.5 percent in each subsequent quarter, not to exceed 2 percent per annum. Compliance will be determined on a quarterly basis, based on cumulative average monthly portfolio balances.
- The conventional *Single-Family Serious Delinquency Rate* rose four basis points in July to 0.68 percent (latest data available). The *Multifamily Serious Delinquency Rate* rose one basis point to 0.10 percent in July.
- The *Effective Duration Gap* on Fannie Mae's portfolio averaged plus one month in August.

MORTGAGE MARKET HIGHLIGHTS

- Pushed up by seasonal factors as well as the relative strength of the multifamily housing market, total residential mortgage debt outstanding (MDO) grew at a compound annual rate of 8.0 percent during the second quarter, accelerating from 7.4 percent in the first quarter, but down from 12.3 percent during the second quarter of 2006.
- According to the Mortgage Bankers Association's *National Delinquency Survey*, the serious delinquency (loans 90 or more days past due or in the process of foreclosure) rate among subprime loans increased to a 4-year high of 9.27 percent in the second quarter of 2007 while that for prime conventional loans rose to a 9-year high of 0.98 percent.

July 2007	0.37%	1.91%	0.68%	0.10%

ADDITIONAL INFORMATION

As previously announced, on May 23, 2006, Fannie Mae agreed to a consent order issued by its regulator, OFHEO. Under the consent order, Fannie Mae may not increase its “mortgage portfolio” assets above a specified amount, except under specified circumstances at the discretion of OFHEO. On September 19, 2007, OFHEO announced changes to the methodology for calculating Fannie Mae’s existing mortgage portfolio cap to provide the company flexibility in managing market-based fluctuations. Effective July 1, 2007, OFHEO increased the portfolio cap to \$735 billion, as measured by unpaid principal balance (UPB). *The Gross Mortgage Portfolio* reported on Fannie Mae’s monthly summaries, which corresponds to this new measure, reflects the UPB of the portfolio. The UPB measure is a statistical measure rather than an amount computed in accordance with GAAP. Additionally, effective October 1, 2007, OFHEO will allow the gross mortgage portfolio to grow 1 percent in the fourth quarter of 2007 and 0.5 percent in each subsequent quarter, not to exceed 2 percent per annum.

Our “mortgage portfolio” assets (that we report to OFHEO under the consent order) reflect GAAP adjustments, including market valuation adjustments, allowance for loan losses, impairments, and unamortized premiums and discounts, excluding consolidated mortgage-related assets acquired through the assumption of debt. These adjustments are not reflected in the Gross Mortgage Portfolio amounts shown in this report. We estimate that Fannie Mae’s “mortgage portfolio” assets were approximately \$724 billion as of August 31, 2007.

We expect that some of the information in this monthly summary report will change when the financial statements and related audits for the current and prior periods are completed. Management believes that the information may be useful to investors for comparing current business activities with those of prior periods and for reviewing trends in our business, notwithstanding that information may change, perhaps materially, from what is reported herein. Issues that may cause some of this information to change include those related to our securities accounting, loan accounting, consolidation and amortization.

ENDNOTES

1. The end balances and business activity in this report represent unpaid principal balances (“UPB”), which do not reflect, for example, market valuation adjustments, allowance for loan losses, impairments, unamortized premiums and discounts and the impact of consolidation of variable interest entities.
2. Includes capitalized interest.
3. Includes Fannie Mae mortgage-backed securities (“Fannie Mae MBS”) issued from Fannie Mae’s portfolio. See Table 5 for monthly activity and balances for Fannie Mae MBS held in the mortgage portfolio.
4. Represents new Fannie Mae MBS created from mortgage loans previously held in the mortgage portfolio. These amounts, included in the Issuance balance in Table 4, have been transferred from mortgage loans to securities, and may be included in sales.
5. Reported amounts represent the unpaid principal balance at each reporting period or, in the case of the long-term zero coupon bonds, at maturity. Unpaid principal balance does not reflect the effect of currency adjustments, debt basis adjustments, amortization of discounts, premiums, and issuance costs.
6. Beginning with June 2007, the effective duration gap is weighted based on the proportional fair value weightings of Fannie Mae’s assets and liabilities. In prior months, the duration gap was not calculated on a weighted basis.
7. These measurements show the estimated loss in the pre-tax fair value of Fannie Mae’s assets and liabilities, including debt and derivatives, that would result from an immediate adverse change in the level of LIBOR rates and in the slope of the LIBOR yield curve, expressed in each case as a percentage of the estimated after-tax fair value of Fannie Mae’s net assets, as of December 31, 2006, adjusted for capital transactions since year end. These measurements exclude the sensitivity of the guaranty business.
8. Includes conventional single-family loans three months or more past due or in foreclosure process as a percent of the total number of conventional single-family loans. These rates are based on conventional single-family mortgage loans and exclude reverse mortgages and non-Fannie Mae mortgage securities held in our portfolio.
9. Loans without primary mortgage insurance and/or other credit enhancements.
10. Loans with primary mortgage insurance and/or other credit enhancements.
11. Total conventional single-family serious delinquency rate includes non-credit enhanced and credit enhanced loans.
12. Includes multifamily loans and securities 60 days or more past due and is calculated based on UPB of delinquent multifamily loans owned by Fannie Mae or underlying Fannie Mae guaranteed securities divided by the UPB of multifamily loans owned by Fannie Mae or underlying Fannie Mae guaranteed securities. Data for 2006 have been revised from amounts previously reported to conform to current presentation.

GLOSSARY & OTHER INFORMATION

General

Information Changes. Amounts and rates for 2006 reflect data reclassifications, definitional changes and corrections as well as revisions to this presentation. As a result, these amounts and rates may differ from and may not be shown on a comparable basis to those previously reported in Fannie Mae’s Monthly Summary reports.

Risk Disclosures. In addition to the interest rate risk disclosures provided in Table 8, Fannie Mae’s most recent available information relating to subordinated debt, liquidity management, corporate risk ratings and credit risks is included in its 2006 Form 10-K filed with the Securities and Exchange Commission on August 16, 2007.

Compounded Growth Rate. Monthly growth rates are compounded to provide an annualized rate of growth.

Table 1

Total Book of Business. Sum of the Gross Mortgage Portfolio balance and Total Fannie Mae MBS and Other Guarantees balance, less Fannie Mae MBS held in the mortgage portfolio.

New Business Acquisitions. Sum of MBS issuances and Mortgage Portfolio purchases less Fannie Mae MBS purchases and securitizations of mortgage loans previously held in portfolio.

Table 2

Portfolio Commitments. Represents mandatory commitments entered into during the month. Fannie Mae enters into forward commitments to purchase mortgage securities and mortgage loans, or to sell mortgage securities, for the mortgage portfolio. Purchase commitments typically require mandatory delivery and are subject to the payment of pair-off fees for non-delivery.

Commitments to Purchase, Net. Represents mandatory commitments to purchase mortgage loans and mortgage securities, net of mortgage loans for which a cash pair-off has been paid. Pair-offs occur when loans are not delivered against mandatory commitments.

Commitments to Sell. Represents mandatory commitments to sell mortgage securities.

Net Retained Commitments. Represents mandatory commitments to purchase, less commitments to sell, net of mortgage loans for which a cash pair-off has been paid.

Table 3

Gross Mortgage Portfolio. End balance represents the unpaid principal balance (“UPB”) of the mortgage portfolio that Fannie Mae holds for investment and liquidity purposes.

Purchases. Acquisition of mortgage loans and mortgage securities for the mortgage portfolio.

Sales. Sales of mortgage securities from the mortgage portfolio.

Liquidations. Represents the total amount of repayments, curtailments, payoffs, and foreclosures on mortgage loans and mortgages underlying securities held in the mortgage portfolio.

Annualized Liquidation Rate. The liquidation rate is calculated as liquidations divided by the prior period ending balance of the mortgage portfolio, annualized.

Table 4

Fannie Mae Guaranteed Securities and Mortgage Loans. Consists of securities and mortgage loans for which Fannie Mae manages credit risk. This table excludes non-Fannie Mae securities held in the mortgage portfolio, which are shown in Table 5.

Total Fannie Mae MBS. Includes Fannie Mae MBS, private label wraps, whole loan REMICs, and Multifamily discount MBS (DMBS) that Fannie Mae guarantees, regardless of whether those MBS are held in the mortgage portfolio or held by investors other than Fannie Mae. If an MBS has been resecuritized into another MBS, the principal amount is only included once in this total.

Issuances. Represents the total amount of Fannie Mae MBS created during the month, including lender-originated issues and

Fannie Mae MBS created from mortgage loans previously held in Fannie Mae's portfolio. Fannie Mae MBS may be held in portfolio after their creation.

Liquidations. Represents the total amount of repayments, curtailments, payoffs, and foreclosures on mortgages underlying Fannie Mae MBS, including Fannie Mae MBS held in the mortgage portfolio.

Other Fannie Mae Guarantees. Outstanding balance of Fannie Mae guarantees, other than Fannie Mae MBS. This primarily includes credit enhancements we provide on multifamily mortgage assets and Ginnie Mae securities.

Annualized Liquidation Rate. The liquidation rate is calculated as liquidations divided by the prior period ending balance of total Fannie Mae MBS, annualized.

Table 5

Mortgage Portfolio Composition. Shows the primary components of Fannie Mae's mortgage portfolio and activity relating to Fannie Mae MBS held in the mortgage portfolio.

Non-Fannie Mae Agency Securities. Represents mortgage-related securities issued by Freddie Mac and Ginnie Mae.

Non-Fannie Mae Non-Agency Securities. These are commonly referred to as "private-label securities."

Table 6

Liquid Investments. Liquid investments serve as Fannie Mae's primary source of liquidity and an investment vehicle for surplus capital. This balance includes high-quality securities that are short-term or readily marketable, such as commercial paper, asset-backed securities and corporate floating-rate notes. The balance shown does not include cash and cash-equivalents, which are also used for liquidity purposes.

Table 7

Debt Activity. For more information about Fannie Mae's debt activity, please visit www.fanniemae.com/markets/debt/debt_activity.

Table 8

Effective Duration Gap. The effective duration gap estimates the net sensitivity of the fair value of Fannie Mae's assets and liabilities to movements in interest rates. This statistic is expressed as a number of months, based on the daily average for the reported month. Beginning with June, the methodology has been updated such that a duration gap of zero implies that the change in the fair value of assets from an interest rate move will be offset by an equal move in the fair value of liabilities, including debt and derivatives, resulting in no change in the fair value of the net assets. The calculation excludes any sensitivity of the guaranty business.

Market Value Sensitivity to Rate Level Shock (50bp). This measurement shows the estimated loss in pre-tax market value of Fannie Mae's assets and liabilities, expressed as a percentage of the after-tax fair value of Fannie Mae's net assets (calculated as described in Endnote (8) above), from an immediate adverse 50 basis point shift in the level of LIBOR rates. The measurement excludes any sensitivity of the guaranty business but the after-tax fair value of Fannie Mae's net assets includes an estimate of the fair value of the guaranty business. Fannie Mae tracks the daily average of this measurement for the reported month.

Market Value Sensitivity to Rate Slope Shock (25bp). This measurement shows the estimated loss in pre-tax market value of Fannie Mae's assets and liabilities, expressed as a percentage of the after-tax fair value of Fannie Mae's net assets (calculated as described in Endnote (8) above), from an immediate adverse 25 basis point change in the slope of the LIBOR yield curve. To calculate the "adverse" change in the slope of the LIBOR yield curve, the company calculates the effect of a 25 basis point change in slope that results in a steeper LIBOR yield curve and the effect of a 25 basis point change in slope that results in a flatter LIBOR yield curve, and reports the more adverse of the two results. The measurement excludes any sensitivity of the guaranty business but the after-tax fair value of Fannie Mae's net assets includes an estimate of the fair value of the guaranty business. Fannie Mae tracks the daily average of this measurement for the reported month.

Table 9

Serious Delinquency Rates. A measure of credit performance and indicator of future defaults for the single-family and multifamily mortgage credit books. We classify single-family loans as seriously delinquent when a borrower has missed three or more consecutive monthly payments, and the loan has not been brought current or extinguished through foreclosure, payoff, or other resolution. A loan referred to foreclosure but not yet foreclosed is also considered seriously delinquent. We include all of the conventional single-family loans that we own or that back Fannie Mae MBS in our single-family delinquency rate, including those with substantial credit enhancement. We classify multifamily loans as seriously delinquent when payment is 60 days or more past due.
