4th growing a

green

generation

conference

a day to explore how young children learn through the joy of gardening

University of New Hampshire
Child Study and Development Center
Durham, New Hampshire
<http://horticulture.unh.edu/ggg.html>

Saturday, May 2, 2009

8:30-4:00pm

Workshops will be led by early childhood educators and plant scientists. Participants will learn how young children can be provoked and fascinated by gardening experiences throughout the year, including a focus on nutrition. Following the morning keynote, participants will rotate through three hands-on workshops at the UNH Horticulture Greenhouses and then choose two sessions in the afternoon at the CSDC. The day will include an opportunity to tour the Learning Garden and Natural Playground.

The Growing a Green Generation Project receives funding and support from the Anna and Raymond Tuttle Environmental Horticulture Fund and the College of Life Sciences and Agriculture at the University of New Hampshire.
