STANDARD FORM 30 (REV. 10-83) ES Prescribed by GSA FAR (48 CFR) 53.243						

1. This amendment is issued to
  - a. Clarify the fact that the spreadsheet posted on 28 October 2008, without an accompanying SF30, to correct Attachment J.1(b)3, represents Amendment 01 to the solicitation.
  - b. Correct the first paragraph of M.2(b)(1) to read as follows:

Mission Suitability Factor. The Mission Suitability factor indicates, for each Offeror, the merit or excellence of the work to be performed and the ability of the Offeror to accomplish what is offered, or the product to be delivered. The overall Mission Suitability Factor will be numerically scored, and the Mission Suitability Subfactors will be rated by adjective and numerically weighted and scored in accordance with NFS 1815.305(a)(3), "Technical Evaluation," and the following table:
  - c. Correct the first paragraph of M.2(c) to read as follows:

**Mission Suitability Factor (Volume I).** The Offeror's Mission Suitability proposal will be evaluated based on the Offeror's ability to fulfill the technical requirements while meeting quality, schedule, and safety requirements and the Offeror's management and business approaches. The compatibility between the proposed technical and management approaches, and the overall resources proposed to accomplish the work will be an important consideration in the evaluation of this factor. In addition, proposal risk will be evaluated with respect to cost, performance, technical approach, and management approach. The overall Mission Suitability Factor will be numerically scored, and the Mission Suitability Subfactors will be rated by adjective and numerically weighted and scored. Information submitted in Volume I of the proposal that is not relevant to the Mission Suitability factor will not be evaluated, except that if the SEC determines that a proposal does not adequately demonstrate that the offeror will be able to perform the work with the resources proposed, the SEC may determine this to be a mission suitability weakness as well as require an adjustment for probable cost. This integration between mission suitability findings and probable cost adjustments is critical to accomplishing cost realism.
  - d. Correct M.3(b) to read as follows:

(b) The overall Mission Suitability factor will be numerically scored, and the Mission Suitability subfactors will be numerically weighted and scored in accordance with the numerical system established below. The other factors (i.e., Past Performance and Cost/Price) are not similarly weighted or scored. Past Performance is assigned a level of confidence rating. Cost/Price will be evaluated for realism, a probable cost adjustment will be made if appropriate, and a confidence level rating will be assigned. The Source Selection Authority's (SSA) decision shall be based on a comparative assessment of proposals pursuant to source selection criteria prescribed in this solicitation. While the SSA may use reports and analyses prepared by others, the source selection decision shall represent the SSA's independent judgment.
2. All other requirements remain unchanged.
