**Subject:** RE: mercury Fwd: Re: chem evals

Hi Rick,

Since mercury is ranked high on the NPL list we have actually evaluated it yearly for the last five to six years. After reviewing the chemical evaluation summary with input from the chemical manager, the profile development workgroup makes a recommendation to update the profile or not. I hope this information helps. Feel free to email or call me if you have any questions.

Thanks,  
San

thanks

The attachment shows that a search covered 07/2004 through 07/31/2005. Does the contractor do a search every year or do you have a deliverable that states that they covered 1997 to 2005? I could refer to the email below if you do not have something else.

I'm trying to plan for the questions I expect in our public meeting.

Hi Rick,

**Please see the response from Sarah. Just let me know if you need additional information. I am still waiting on an answer regarding the release of the literature review to the public. I will inform you as soon as I know something.**

Thanks,  
San

Hi Cassandra,

To answer the question you sent to Lisa Davison about mercury:  
Please see the attached table entry for the 2005 chemical evaluation search. (I'm not sure if you were referring to the mercury chemical evaluation FilemakerPro file as well? Its full contents consist of several searches performed from 2002 through 2005, covering the period 1997-7/31/2005, and search strategy may have varied slightly over the years, but were probably similar to 2005.) Let me know if you have any further questions.

Sarah
