Total Number of Grantees with Data	143	143	143	144	141

NOTE: Some grantees are excluded from the calculations each year due to missing data, or because they are participating in Public Law 102-477 and are thus exempted from DOL's reporting requirements. For this reason, comparisons over time can be misleading.

¹Average wages of those placed in jobs were weighted by grantee size and exclude grantees reporting values of less than \$5.00 or more than \$50.00

²Average pre-program wages were weighted by grantee size and exclude grantees reporting values of more than \$50.00. Values equal to \$0.00 are retained, because these could represent persons who were not employed.

³Data on total funding was provided by DOL and need not represent actual expenditures.
