Attachment L.17-1 KEY / CRITICAL PERSONNEL RESUME

Complete one form for each proposed Key Person. The resume shall not exceed three pages and does not count toward the page limitation.

- 1. Name
- 2. Education
 - a. Degrees, dates, majors, schools
 - b. Other education or training and dates
 - c. Licenses, certifications, or professional designations (locations)
- 3. Proposed assignment: title and organizational element
- 4. Current position and beginning date
- 5. Current significant responsibilities or projects
- 6. Previous positions (last five years)
 - a. Firm and period of employment
 - b. Significant experience
 - c. Specific projects
- 7. Professional activities and achievements
 - a. Awards
 - b. Significant publications
 - c. Professional societies
 - d. Significant achievements
- 8. Unique qualifications. Summarize any relevant unique experience, education, or personal characteristics which may not be evident from the above information.
 - 9. Evidence of commitment to the program.

Attachment L.17-2 HISTORICAL TECHNICAL STAFFING AND SKILLS

Note: The historical staffing matrix offered below is provided for reference only. The offeror is cautioned not to assume historical staffing is reflective of the needs for the MESC. The Government is interested in innovative approaches to staffing. In addition the Government expects mission and contract changes as well as new requirements that are reflected in this RFP which would make other approaches to staffing prudent. No historical data is provided in this exhibit reflecting the current level of effort for management and administrative functions. Only technical positions are identified.

WBS 2.0 Medical 43.4 WYE

Skills: Physician Nursing

Employee Assistance Counseling

Health & Wellness Program coordination

Medical Training Administration

Workers' Compensation Case management

Medical logistics Cardiovascular testing Pulmonary function testing

Vision testing Audiometry

X-ray technology

Studies, biomedical support

Quality Assurance Fitness instruction

Musculoskeletal Rehabilitation trainer

WBS 3.0 Environmental Health Services 45 WYE

Skills: Quality Assurance

Systems Analysis Health physics Industrial hygiene Microscopist Sanitarians Microbiologists

WBS 4.0 Environmental Services 58 WYE

Skills: Environmental engineering

Environmental specialist

Hazardous waste management and disposal

Environmental sampling and analysis

Environmental remediation

NEPA Compliance

ATTACHMENTS L.17-1 – L.17-4

Air Quality

Plant, Wildlife and Fisheries ecology

Atmospheric sciences

Geographers

Computer sciences, programming & database development

Geographical information systems

Laboratory analysis

Recycling

Affirmative Procurement

WBS 5.0 Agency Occupational Health 10.5 WYE

Skills: Physician

Nurse

Health Physics Industrial Hygiene Web site design Database design Clinical informatics

WBS 6.0* Air Force Services

^{*} Historical Air Force support and skills are covered in the WBS 2.0, 3.0 and 4.0 estimates above. Historically the Air Force has not received dedicated medical, health or environmental support

ATTACHMENTS L.17-1 – L.17-4

Attachment L.17-4 SAMPLE PROBLEMS

Responses to questions are limited to three pages per question.

- 1. Due to the intense environmental regulatory scrutiny that the Kennedy Space Center experiences, how will you ensure that your operations meet all Federal, State and local regulations and avoid any adverse impact associated with non-compliances?
- 2. How does your staffing model address resource variability associated with changes in Mission and customer base (e.g. Air Force) at the Center?
- 3. A conflict has arisen relative to the backlog of support requests from two major resident contractors. Both companies are indicating that they are facing mission impacts associated with not receiving that service. How will you manage that situation?
- 4. In the unlikely event of a catastrophic shuttle incident, a potential exposure concern exists for the astronauts, employees and visitors. As the principle medical provider, you are faced with requirements for treatment of astronauts, employees and visitors. How would you provide services in this complex emergency environment, including providing medical direction to non-MESC contractor employees?
- 5. As the Government's industrial hygiene consultant, you provide full-service IH consultation for all contractors operating at the Kennedy Space Center. An increasing number of support requests have created a growing backlog of baseline health hazard assessments for operations and processes. Budget constraints prevent increased staffing. Significant changes to the approach to conducting hazard assessments are required. What alternate methods or innovations would you propose in order to meet the growing demand?
