# Interdisciplinary Grants in the Mathematical Sciences (IGMS)

# PROGRAM SOLICITATION

NSF 04-518

# REPLACES DOCUMENT(S):

NSF 01-115

#### **National Science Foundation**

Directorate for Mathematical & Physical Sciences Division of Mathematical Sciences

Full Proposal Deadline(s) (due by 5 p.m. proposer's local time):

February 19, 2004

and February 19, annually, thereafter

February 19, 2005

February, Annually Thereafter

# **REVISION NOTES**

A revised version of the *NSF Proposal & Award Policies & Procedures Guide* (PAPPG), *NSF* 09-1, was issued on October 1, 2008 and is effective for proposals submitted on or after January 5, 2009. Please be advised that the guidelines contained in *NSF* 09-1 apply to proposals submitted in response to this funding opportunity. Proposers who opt to submit prior to January 5<sup>th</sup>, 2009, must also follow the guidelines contained in *NSF* 09-1.

One of the most significant changes to the PAPPG is implementation of the mentoring provisions of the America COMPETES Act. Each proposal that requests funding to support postdoctoral researchers must include, as a separate section within the 15-page project description, a description of the mentoring activities that will be provided for such individuals. Proposals that do not include a separate section on mentoring activities within the Project Description will be returned without review (see the PAPP Guide Part I: *Grant Proposal Guide* Chapter II.C.2.d for further information).

The solicitation correctly stated that deadline dates were "February 19, 2004 and February 19, annually, thereafter." The specific deadline dates for 2005 and beyond are now being entered in the deadline dates calendar. This document is not being republished.

# SUMMARY OF PROGRAM REQUIREMENTS

## **General Information**

#### **Program Title:**

Interdisciplinary Grants in the Mathematical Sciences (IGMS)

# Synopsis of Program:

The objective of the Interdisciplinary Grants in the Mathematical Sciences (IGMS) program is to enable mathematical scientists to undertake research and study in another discipline so as to:

- expand their skills and knowledge in areas other than the mathematical sciences;
- · subsequently apply this knowledge in their research; and
- enrich the educational experiences and broaden the career options of their students.

Recipients of an IGMS award are expected to spend full time in a non-mathematical science department in an academic institution or an industrial, commercial or financial organization. The expected outcome is sufficient familiarity with another discipline so as to open opportunities for effective collaboration by the mathematical scientist with researchers in another discipline.

#### Cognizant Program Officer(s):

• Dean M. Evasius, telephone: (703) 292-8132, email: devasius@nsf.gov

#### Applicable Catalog of Federal Domestic Assistance (CFDA) Number(s):

• 47.049 --- Mathematical and Physical Sciences

#### **Award Information**

Anticipated Type of Award: Standard Grant

Estimated Number of Awards: 10 Duration of grants is 12 months.

Anticipated Funding Amount: \$1,000,000 -- Up to \$1 million will be available for this activity each year, subject to the availability

of funds.

# **Eligibility Information**

#### Organization Limit:

Proposals may only be submitted by the following:

· Proposals may be submitted by academic institutions in support of individual investigators.

#### PI Limit:

To be eligible for these awards, the PI must hold a tenured or tenure-track position at the academic institution submitting the proposal and have a strong background in one of the disciplines within the purview of the Division of Mathematical Sciences.

#### Limit on Number of Proposals per Organization:

None Specified

#### Limit on Number of Proposals per PI:

None Specified

# **Proposal Preparation and Submission Instructions**

#### A. Proposal Preparation Instructions

• Letters of Intent: Not Applicable

• Preliminary Proposal Submission: Not Applicable

• Full Proposal Preparation Instructions: This solicitation contains information that supplements the standard NSF Proposal and Award Policies and Procedures Guide, Part I: Grant Proposal Guide (GPG) proposal preparation guidelines. Please see the full text of this solicitation for further information

#### **B. Budgetary Information**

• Cost Sharing Requirements: Cost Sharing is not required under this solicitation.

• Indirect Cost (F&A) Limitations: Not Applicable

· Other Budgetary Limitations: Not Applicable

#### C. Due Dates

• Full Proposal Deadline(s) (due by 5 p.m. proposer's local time):

February 19, 2004

and February 19, annually, thereafter

February 19, 2005

February, Annually Thereafter

# **Proposal Review Information Criteria**

**Merit Review Criteria:** National Science Board approved criteria. Additional merit review considerations apply. Please see the full text of this solicitation for further information.

# **Award Administration Information**

**Award Conditions:** Standard NSF award conditions apply.

**Reporting Requirements:** Standard NSF reporting requirements apply.

#### I. INTRODUCTION

The objective of the Interdisciplinary Grants in the Mathematical Sciences (IGMS) is to enable mathematical scientists to undertake research and study in another discipline so as to:

- expand their skills and knowledge in areas other than the mathematical sciences;
- · subsequently apply this knowledge in their research; and
- enrich the educational experiences and broaden the career options of their students.

Recipients of an IGMS award are expected to spend full time in a non-mathematical science department in an academic institution or an industrial, commercial or financial organization. The expected outcome is sufficient familiarity with another discipline so as to open opportunities for effective collaboration by the mathematical scientist with researchers in another discipline.

These awards are in addition to those available in the Grant Opportunities for Academic Liaison with Industry (GOALI) activity.

# II. PROGRAM DESCRIPTION

It is expected that PIs will immerse themselves in a discipline apart from the mathematical sciences that makes use of the mathematical sciences in a significant way. Hence, PIs must leave their current department to go to a department or laboratory other than the mathematical sciences, either at their institution or at another institution or organization for the duration of the award. NSF expects that the recipients will remain in academia for a minimum of one year following the end of the grant.

#### Requirements

- To help ensure institutional support of these interdisciplinary activities, there should be a co-PI at the level of dean (or higher level university official) at the submitting institution.
- The Pl's home department chair should include a brief description of the expected benefit to the department.
- The proposal must include a statement from the host institution or organization that describes the resources that would be
  made available to the PI. The statement must also identify at least one senior person in the host institution or organization
  who will serve as host to the PI.
- The proposal must include a statement from the senior person who will serve as host to the PI regarding the expectations for this activity.

These items should be submitted in the Supplementary Documentation section of the FastLane proposal (see Section V), but not as an Appendix.

# III. AWARD INFORMATION

The anticipated funding amount for this activity is up to \$1,000,000 each year, subject to the availability of funds. The duration of the award will be for a twelve-month period. It is expected that up to 10 awards will be made depending on the quality of the proposals submitted and the availability of funding. The total grant will not exceed \$100,000 per award.

#### IV. ELIGIBILITY INFORMATION

#### Organization Limit:

Proposals may only be submitted by the following:

• Proposals may be submitted by academic institutions in support of individual investigators.

#### PI Limit:

To be eligible for these awards, the PI must hold a tenured or tenure-track position at the academic institution submitting the proposal and have a strong background in one of the disciplines within the purview of the Division of Mathematical Sciences.

#### Limit on Number of Proposals per Organization:

None Specified

#### Limit on Number of Proposals per PI:

None Specified

#### Additional Eligibility Info:

Proposals may be submitted by academic institutions in support of individual investigators.

The PI must hold a tenured or tenure-track position at the academic institution submitting the proposal and have a strong background in one of the disciplines within the purview of the Division of Mathematical Sciences.

There are no limits on the number of proposals submitted.

#### V. PROPOSAL PREPARATION AND SUBMISSION INSTRUCTIONS

# A. Proposal Preparation Instructions

**Full Proposal Instructions:** Proposals submitted in response to this program solicitation should be prepared and submitted in accordance with the guidelines specified in the NSF Grant Proposal Guide (GPG). The complete text of the GPG is available electronically on the NSF website at:

http://www.nsf.gov/publications/pub\_summ.jsp?ods\_key=gpg. Paper copies of the GPG may be obtained from the NSF Publications Clearinghouse, telephone (703) 292-PUBS (7827) or by e-mail from pubs@nsf.gov.

The following instructions supplement the GPG guidelines.

The project description must include:

- a well-defined description of the proposed activity and a corresponding implementation plan;
- a statement delineating the PI's expectation of the impact of this experience on the PI's subsequent research and education activities;
- · an approximate time schedule for accomplishing the proposed activities;
- a plan for applying the newly acquired expertise to broaden the research and educational experiences and career options for students;
- · an evaluation phase including plans and metrics to be used to assess the success of the project; and
- a dissemination plan to share the outcome(s) with the community.

The following required elements should be submitted in the Supplementary Documentation section of the FastLane proposal:

- The PI's home department chair should include a brief description of the expected benefit to the department.
- The proposal must include a statement from the host institution or organization that describes the resources that would be made available to the PI. The statement must also identify at least one senior person in the host institution or organization who will serve as host to the PI.
- The proposal must include a statement from the senior person who will serve as host to the PI regarding the
  expectations for this activity.

Proposers are reminded to identify the program solicitation number (NSF 04-518) in the program solicitation block on the NSF Cover Sheet For Proposal to the National Science Foundation. Compliance with this requirement is critical to determining the relevant proposal processing guidelines. Failure to submit this information may delay processing.

# **B. Budgetary Information**

Cost Sharing: Cost sharing is not required under this solicitation.

#### C. Due Dates

• Full Proposal Deadline(s) (due by 5 p.m. proposer's local time):

February 19, 2004

and February 19, annually, thereafter

February 19, 2005

February, Annually Thereafter

# D. FastLane Requirements

Proposers are required to prepare and submit all proposals for this program solicitation through use of the NSF FastLane system. Detailed instructions regarding the technical aspects of proposal preparation and submission via FastLane are available at: <a href="http://www.fastlane.nsf.gov/a1/newstan.htm">http://www.fastlane.nsf.gov/a1/newstan.htm</a>. For FastLane user support, call the FastLane Help Desk at 1-800-673-6188 or e-mail fastlane @nsf.gov. The FastLane Help Desk answers general technical questions related to the use of the FastLane system. Specific questions related to this program solicitation should be referred to the NSF program staff contact(s) listed in Section VIII of this funding opportunity.

Submission of Electronically Signed Cover Sheets. The Authorized Organizational Representative (AOR) must electronically sign the proposal Cover Sheet to submit the required proposal certifications (see Chapter II, Section C of the Grant Proposal Guide for a listing of the certifications). The AOR must provide the required electronic certifications within five working days following the electronic submission of the proposal. Further instructions regarding this process are available on the FastLane Website at: <a href="https://www.fastlane.nsf.gov/fastlane.isp">https://www.fastlane.nsf.gov/fastlane.isp</a>.

# VI. NSF PROPOSAL PROCESSING AND REVIEW PROCEDURES

Proposals received by NSF are assigned to the appropriate NSF program where they will be reviewed if they meet NSF proposal preparation requirements. All proposals are carefully reviewed by a scientist, engineer, or educator serving as an NSF Program Officer, and usually by three to ten other persons outside NSF who are experts in the particular fields represented by the proposal. These reviewers are selected by Program Officers charged with the oversight of the review process. Proposers are invited to suggest names of persons they believe are especially well qualified to review the proposal and/or persons they would prefer not review the proposal. These suggestions may serve as one source in the reviewer selection process at the Program Officer's discretion. Submission of such names, however, is optional. Care is taken to ensure that reviewers have no conflicts of interest with the proposal.

#### A. NSF Merit Review Criteria

All NSF proposals are evaluated through use of the two National Science Board (NSB)-approved merit review criteria: intellectual merit and the broader impacts of the proposed effort. In some instances, however, NSF will employ additional criteria as required to highlight the specific objectives of certain programs and activities.

The two NSB-approved merit review criteria are listed below. The criteria include considerations that help define them. These considerations are suggestions and not all will apply to any given proposal. While proposers must address both merit review criteria, reviewers will be asked to address only those considerations that are relevant to the proposal being considered and for which the reviewer is qualified to make judgements.

# What is the intellectual merit of the proposed activity?

How important is the proposed activity to advancing knowledge and understanding within its own field or across different fields? How well qualified is the proposer (individual or team) to conduct the project? (If appropriate, the reviewer will comment on the quality of the prior work.) To what extent does the proposed activity suggest and explore creative, original, or potentially transformative concepts? How well conceived and organized is the proposed activity? Is there sufficient access to resources?

# What are the broader impacts of the proposed activity?

How well does the activity advance discovery and understanding while promoting teaching, training, and learning? How well does the proposed activity broaden the participation of underrepresented groups (e.g., gender, ethnicity, disability, geographic, etc.)? To what extent will it enhance the infrastructure for research and education, such as facilities, instrumentation, networks, and partnerships? Will the results be disseminated broadly to enhance scientific and technological understanding? What may be the benefits of the proposed activity to society?

Examples illustrating activities likely to demonstrate broader impacts are available electronically on the NSF website at: http://www.nsf.gov/pubs/gpg/broaderimpacts.pdf.

NSF staff also will give careful consideration to the following in making funding decisions:

# Integration of Research and Education

One of the principal strategies in support of NSF's goals is to foster integration of research and education through the programs, projects, and activities it supports at academic and research institutions. These institutions provide abundant opportunities where individuals may concurrently assume responsibilities as researchers, educators, and students and where all can engage in joint efforts that infuse education with the excitement of discovery and enrich research through the diversity of learning perspectives.

# Integrating Diversity into NSF Programs, Projects, and Activities

Broadening opportunities and enabling the participation of all citizens -- women and men, underrepresented

minorities, and persons with disabilities -- is essential to the health and vitality of science and engineering. NSF is committed to this principle of diversity and deems it central to the programs, projects, and activities it considers and supports.

#### Additional Review Criteria:

In addition to the National Science Board merit review criteria, reviewers will be asked to apply several equally-weighted activity specific criteria when reviewing IGMS proposals. These criteria are:

- Competence: The quality of independent research and accomplishment of the PI in his or her own area of expertise.
- 2. Movement: The degree of movement by the PI beyond his or her own areas of expertise. Bolder moves will be favored over minor, incremental changes or additions.
- Consequence: The degree of expected impact of the grant activity on the PI's own research, as well as on the development of students in both disciplines involved.

#### **B. Review and Selection Process**

Proposals submitted in response to this program solicitation will be reviewed by Ad hoc Review and/or Panel Review.

Reviewers will be asked to formulate a recommendation to either support or decline each proposal. The Program Officer assigned to manage the proposal's review will consider the advice of reviewers and will formulate a recommendation.

After scientific, technical and programmatic review and consideration of appropriate factors, the NSF Program Officer recommends to the cognizant Division Director whether the proposal should be declined or recommended for award. NSF is striving to be able to tell applicants whether their proposals have been declined or recommended for funding within six months. The time interval begins on the deadline or target date, or receipt date, whichever is later. The interval ends when the Division Director accepts the Program Officer's recommendation.

A summary rating and accompanying narrative will be completed and submitted by each reviewer. In all cases, reviews are treated as confidential documents. Verbatim copies of reviews, excluding the names of the reviewers, are sent to the Principal Investigator/Project Director by the Program Officer. In addition, the proposer will receive an explanation of the decision to award or decline funding.

In all cases, after programmatic approval has been obtained, the proposals recommended for funding will be forwarded to the Division of Grants and Agreements for review of business, financial, and policy implications and the processing and issuance of a grant or other agreement. Proposers are cautioned that only a Grants and Agreements Officer may make commitments, obligations or awards on behalf of NSF or authorize the expenditure of funds. No commitment on the part of NSF should be inferred from technical or budgetary discussions with a NSF Program Officer. A Principal Investigator or organization that makes financial or personnel commitments in the absence of a grant or cooperative agreement signed by the NSF Grants and Agreements Officer does so at their own risk

# VII. AWARD ADMINISTRATION INFORMATION

## A. Notification of the Award

Notification of the award is made to *the submitting organization* by a Grants Officer in the Division of Grants and Agreements. Organizations whose proposals are declined will be advised as promptly as possible by the cognizant NSF Program administering the program. Verbatim copies of reviews, not including the identity of the reviewer, will be provided automatically to the Principal Investigator. (See Section VI.B. for additional information on the review process.)

#### **B.** Award Conditions

An NSF award consists of: (1) the award letter, which includes any special provisions applicable to the award and any numbered amendments thereto; (2) the budget, which indicates the amounts, by categories of expense, on which NSF has based its support (or otherwise communicates any specific approvals or disapprovals of proposed expenditures); (3) the proposal referenced in the award letter; (4) the applicable award conditions, such as Grant General Conditions (GC-1); \* or Research Terms and Conditions and (5) any announcement or other NSF issuance that may be incorporated by reference in the award letter. Cooperative agreements also are administered in accordance with NSF Cooperative Agreement Financial and Administrative Terms and Conditions (CA-FATC) and the applicable Programmatic Terms and Conditions. NSF awards are electronically signed by an NSF Grants and Agreements Officer and transmitted electronically to the organization via e-mail.

\*These documents may be accessed electronically on NSF's Website at <a href="http://www.nsf.gov/awards/managing/award\_conditions.jsp?org=NSF">http://www.nsf.gov/awards/managing/award\_conditions.jsp?org=NSF</a>. Paper copies may be obtained from the NSF Publications Clearinghouse, telephone (703) 292-7827 or by e-mail from pubs@nsf.gov.

More comprehensive information on NSF Award Conditions and other important information on the administration of NSF awards is contained in the NSF Award & Administration Guide (AAG) Chapter II, available electronically on the NSF Website at <a href="http://www.nsf.gov/publications/pub\_summ.jsp?ods\_key=aag">http://www.nsf.gov/publications/pub\_summ.jsp?ods\_key=aag</a>.

# C. Reporting Requirements

For all multi-year grants (including both standard and continuing grants), the Principal Investigator must submit an annual project

report to the cognizant Program Officer at least 90 days before the end of the current budget period. (Some programs or awards require more frequent project reports). Within 90 days after expiration of a grant, the PI also is required to submit a final project report.

Failure to provide the required annual or final project reports will delay NSF review and processing of any future funding increments as well as any pending proposals for that PI. PIs should examine the formats of the required reports in advance to assure availability of required data.

Pls are required to use NSF's electronic project-reporting system, available through FastLane, for preparation and submission of annual and final project reports. Such reports provide information on activities and findings, project participants (individual and organizational) publications; and, other specific products and contributions. Pls will not be required to re-enter information previously provided, either with a proposal or in earlier updates using the electronic system. Submission of the report via FastLane constitutes certification by the PI that the contents of the report are accurate and complete.

#### **VIII. AGENCY CONTACTS**

General inquiries regarding this program should be made to:

• Dean M. Evasius, telephone: (703) 292-8132, email: devasius@nsf.gov

For questions related to the use of FastLane, contact:

FastLane Help Desk, telephone: 1-800-673-6188; e-mail: fastlane@nsf.gov.

#### IX. OTHER INFORMATION

The NSF Website provides the most comprehensive source of information on NSF Directorates (including contact information), programs and funding opportunities. Use of this Website by potential proposers is strongly encouraged. In addition, MyNSF (formerly the Custom News Service) is an information-delivery system designed to keep potential proposers and other interested parties apprised of new NSF funding opportunities and publications, important changes in proposal and award policies and procedures, and upcoming NSF Regional Grants Conferences. Subscribers are informed through e-mail or the user's Web browser each time new publications are issued that match their identified interests. MyNSF also is available on NSF's Website at http://www.nsf.gov/mynsf/.

Grants.gov provides an additional electronic capability to search for Federal government-wide grant opportunities. NSF funding opportunities may be accessed via this new mechanism. Further information on Grants.gov may be obtained at <a href="http://www.grants.gov">http://www.grants.gov</a>.

#### ABOUT THE NATIONAL SCIENCE FOUNDATION

The National Science Foundation (NSF) is an independent Federal agency created by the National Science Foundation Act of 1950, as amended (42 USC 1861-75). The Act states the purpose of the NSF is "to promote the progress of science; [and] to advance the national health, prosperity, and welfare by supporting research and education in all fields of science and engineering."

NSF funds research and education in most fields of science and engineering. It does this through grants and cooperative agreements to more than 2,000 colleges, universities, K-12 school systems, businesses, informal science organizations and other research organizations throughout the US. The Foundation accounts for about one-fourth of Federal support to academic institutions for basic research.

NSF receives approximately 40,000 proposals each year for research, education and training projects, of which approximately 11,000 are funded. In addition, the Foundation receives several thousand applications for graduate and postdoctoral fellowships. The agency operates no laboratories itself but does support National Research Centers, user facilities, certain oceanographic vessels and Antarctic research stations. The Foundation also supports cooperative research between universities and industry, US participation in international scientific and engineering efforts, and educational activities at every academic level.

Facilitation Awards for Scientists and Engineers with Disabilities provide funding for special assistance or equipment to enable persons with disabilities to work on NSF-supported projects. See Grant Proposal Guide Chapter II, Section D.2 for instructions regarding preparation of these types of proposals.

The National Science Foundation has Telephonic Device for the Deaf (TDD) and Federal Information Relay Service (FIRS) capabilities that enable individuals with hearing impairments to communicate with the Foundation about NSF programs, employment or general information. TDD may be accessed at (703) 292-5090 and (800) 281-8749, FIRS at (800) 877-8339.

The National Science Foundation Information Center may be reached at (703) 292-5111.

The National Science Foundation promotes and advances scientific progress in the United States by competitively awarding grants and cooperative agreements for research and education in the sciences, mathematics, and engineering.

To get the latest information about program deadlines, to download copies of NSF publications, and to access abstracts of awards, visit the NSF Website at <a href="http://www.nsf.gov">http://www.nsf.gov</a>

#### PRIVACY ACT AND PUBLIC BURDEN STATEMENTS

The information requested on proposal forms and project reports is solicited under the authority of the National Science Foundation Act of 1950, as amended. The information on proposal forms will be used in connection with the selection of qualified proposals; and project reports submitted by awardees will be used for program evaluation and reporting within the Executive Branch and to Congress. The information requested may be disclosed to qualified reviewers and staff assistants as part of the proposal review process; to proposer institutions/grantees to provide or obtain data regarding the proposal review process, award decisions, or the administration of awards; to government contractors, experts, volunteers and researchers and educators as necessary to complete assigned work; to other government agencies or other entities needing information regarding applicants or nominees as part of a joint application review process, or in order to coordinate programs or policy; and to another Federal agency, court, or party in a court or Federal administrative proceeding if the government is a party. Information about Principal Investigators may be added to the Reviewer file and used to select potential candidates to serve as peer reviewers or advisory committee members. See Systems of Records, NSF-50, "Principal Investigator/Proposal File and Associated Records," 69 Federal Register 26410 (May 12, 2004), and NSF-51, "Reviewer/Proposal File and Associated Records," 69 Federal Register 26410 (May 12, 2004). Submission of the information is voluntary. Failure to provide full and complete information, however, may reduce the possibility of receiving an award.

An agency may not conduct or sponsor, and a person is not required to respond to, an information collection unless it displays a valid Office of Management and Budget (OMB) control number. The OMB control number for this collection is 3145-0058. Public reporting burden for this collection of information is estimated to average 120 hours per response, including the time for reviewing instructions. Send comments regarding the burden estimate and any other aspect of this collection of information, including suggestions for reducing this burden, to:
