## **Schedule of Deductions**

**JANITORIAL SERVICES CONTRACT  
Schedule of Deductions**

The Contractor will be held to the full performance of the contract. Performance requirements will also be used to determine acceptable performance and will be based on quality and schedule (frequency and timeliness). Any task performed to an unsatisfactory level is subject to a performance deduction. Performance deductions are divided into three class levels based on criticality. Each class level has a dollar value associated with it as shown in the table below. Additionally, any task not performed is subject to a non-performance deduction. Non-performance deductions are also divided into three class levels based on both criticality and frequency of service. There is a separate non-performance deduction amount for all “daily” tasks in each of the three classes, as well as a separate non-performance deduction amount for “all other frequencies” regardless of class level. All non-performance deductions are subject to a dollar cap, as indicated below.

<b>CLASS</b>	<b>DEDUCTION AMOUNT</b>	<b>DOLLAR CAP</b>
Perf. Deduction – Class 1	\$50.00	No limit
Non-Perf. Deduction for Daily Frequency Tasks – Class 1	\$125.00	\$500.00
Perf. Deduction – Class 2	\$250.00	No limit
Non-Perf. Deduction for Daily Frequency Tasks – Class 2	\$375.00	\$1,000.00
Perf. Deduction – Class 3	\$500.00	No limit
Non-Perf. Deduction for Daily Frequency Tasks – Class 3	\$750.00	\$2,500.00
Non-Perf. Deduction for All Other Frequency Tasks – Class 1, 2, or 3	\$1,000.00	\$5,000.00

The class level deductions and all contract tasks are incorporated into the Deduction Schedule. There are four columns of information: Quantity, Deduction Class, Task and Frequency.

Quantity refers to the number of buildings/areas this task may occur in. In any building, there may be multiple occurrences of the task, and the deduction may be taken on any one occurrence or on multiple occurrences. For instance, one major task involves emptying all trash receptacles. This occurs in almost all buildings and in many locations within each building. If a building contains 75 trash cans and two trash cans are not completely emptied, a deduction may be taken on both occurrences.

Deduction Class refers to the class level associated with the task. A specific deduction amount is associated with each listed class level and is based on whether the deduction is due to unsatisfactory performance or non-performance.

Task refers to all of the unique tasks found in each building or area per the Building Specifications (Reference Attachment B). The same task may appear more than once on the Deduction Schedule because of different frequencies either within a building or in different buildings.

Frequency denotes the number of times the task must be accomplished.

The Contractor will be given the opportunity to re-perform any task that is performed at a less than satisfactory quality level or to perform any work that was not performed in accordance with

the required schedule (i.e., frequency). When an opportunity to either perform or re-perform a task is given through verbal or written communication by the COTR, the Contractor shall perform or re-perform the task in the time period listed under the "PERIOD OF RE-PERFORMANCE" below based on the "FREQUENCY" of the required task. The COTR shall be notified when the task is complete. Failure to re-perform the task or failure to re-perform the task to a satisfactory level will result in a class level deduction. When a task must be performed on a daily basis, the re-performance must take place on the same day it was scheduled or it will be considered a non-performance.\*

<b>FREQUENCY</b>	<b>PERIOD OF RE-PERFORMANCE**</b>
Three Times Per Day	Within 1 work hour
Twice Per Day	Within 2 work hours
Daily or As Needed	Within the scheduled day
Three Times Per Week	Within 8 work hours
Twice Per Week	Within 8 work hours
Weekly	Within the scheduled week
Upon Request But Not More Than Weekly	Within the scheduled week
Twice Per Month	Within 8 work hours
Once Every Other Week	Within 8 work hours
Monthly	Within 16 work hours
Five Times Over a One Year Period	Within 1 work week
Quarterly	Within 1 work week
Twice Over a One Year Period or Semi-Annually	Within 2 work weeks
Yearly or As Needed/Yearly	Within contract year or considered non-performance
Once Over a Two Year Period	Within two year period or considered non-performance
As Needed	Within 8 work hours

\*Although restroom cleaning is a daily task, it is not subject to the same "PERIOD OF RE-PERFORMANCE" listed in the table above. When a restroom quality complaint is substantiated by the COTR and it cannot be re-performed within the scheduled day, a deduction of \$125.00 will be taken.

\*\*When a period of re-performance falls on a weekend or holiday, period of performance is extended to the next working day.

**JANITORIAL SERVICES CONTRACT  
Deduction Schedule**

Quantity	Deduction Class	Task	Frequency
1	1	All routine cleaning tasks which apply to the Photo Lab. C5A - CE6 routine tasks must be done early in shift.	See frequency for each task as listed above
1	1	All routine cleaning tasks, as specified above, which apply to Control Room 131/Test Section. Includes Mezzanine 1 & 2.	See frequency for each task as listed above
1	1	All routine cleaning tasks, as specified above, which apply to Rooms 112 & 124.	See frequency for each task as listed above
1	1	All routine cleaning tasks, as specified above, which apply to Secured Areas.	As specified
1	1	All routine cleaning tasks, as specified above, which apply to the Credit Union; EAP, LESA & AFGE Offices and PX.	Per required task frequency above
