Stuart R. Davis  
National States Geographic Information Council  
2105 Laurel Bush Road, Suite 200  
Bel Air, Maryland 21015

Mr. Davis,

I am proud to inform you that the MidAmerica GIS Consortium (MAGIC) has approved an endorsement for the National States Geographic Information Council's initiative titled Imagery for the Nation. The Consortium recognizes the importance this initiative has for the eight state region represented by MAGIC in addition to the benefit to individual states and the entire nation.

MAGIC believes that this program is an excellent starting point for a sustainable imagery program that plans for the future and will work with partners in our region to make this program a reality. Imagery is a key component for geospatial activities in many state, local, and federal programs in our region and one that we continue to foster cooperation and coordination of. The establishment of a National program will enhance these efforts and provide better service to our citizens. We look forward to helping make this initiative a reality.

Sincerely,

A handwritten signature in black ink that reads "James W. Langtry". The signature is written in a cursive, flowing style.

James W. Langtry, Consortium Chair
