

Communicating FDA Science to the Public

May 18th: 3:30-5:00PM

Washington Convention Center

Many consumers, advocacy groups, non-scientists and other FDA stakeholders have expressed interest in learning more about FDA science but have found that the general sessions presented at the FDA Science Forum are too technical. The purpose of this session will be to present information about some FDA science topics of greatest interest to our stakeholders through clear and concise "plain language" presentations.

Format: The session will be 90 minutes in length. Three FDA science topics will be presented in short, 15 minute talks followed by questions and answers.

Target Audience: FDA and other government scientists or non-scientists, consumers, advocacy groups, science press, science teachers and students and other stakeholders interested in FDA science issues.

PROGRAM

Communicating FDA Science to the Public

Chair: Lester Crawford, DVM, PhD
Acting FDA Commissioner
Office of the Commissioner, FDA

The Importance of Innovation to FDA's Public Health Mission

Lester Crawford, DVM, PhD
Acting FDA Commissioner
Office of the Commissioner, FDA

Personalized Medicine:

The Power of Proteomics and What It means to the Consumer

Emanuel Petricoin, PhD
Co-Director, NCI-FDA Clinical Proteomics Program
Center for Biologics Research & Evaluation, FDA

Is It Really Safe? Understanding Food Safety for the Non Scientist

Robert E. Brackett, PhD
Center Director
Center for Food Safety and Applied Nutrition, FDA

Registration: There is no charge for this event. However you must register to attend. Please fill out the attached registration form and fax to 301-827-3042. If you have any questions, please contact Dr. Suzanne Fitzpatrick at 301-827-4591.

Note: If you are already registered for the Science Forum, you do not need to register separately for the session on "Communicating Science to the Public."
