

## HEALTHY WORLD

- *Infrastructure:* Participants felt strongly that building infrastructure and capacity worldwide is key to global health protection. Participants suggested that CDC develop sound infrastructure and drop the “baggage” of diplomacy.
- *CDC role:* Clearly defining CDC’s niches and expertise was viewed as essential.
- *Don’t Make Assumptions:* Participants warned against the Objectives’ tone that makes assumption about international priorities their comments were similar to one made at the Partners’ Meeting.
- *International Disaster Response:* According to some, CDC should improve responses to international disasters.
- *Additions:* This group also stressed the long-term impact of global warming, and the need to address access to medical care versus just stressing quality of care.
