

**FSIS Pathogen Reduction/Hazard Analysis Critical Control Points (PR/HACCP) *Salmonella* Set Results for Individual Establishments (current as of October 06 2008):
Category 3* Young Chicken (Broiler) Establishments**

Product Class	Category	Establishment Number	Name	City	State	Date of Sample Set Analysis Completion	Most Current FSIS Set Result	Previous FSIS Set Result
Broilers	3	01538 P	Wapsie Produce Inc.	Decorah	IA	03/25/2008	FAILED; EXCEEDED STANDARD	PASS; >50% STANDARD
Broilers	3	27297 M-27297 P	Campo Lindo Farms	Lathrop	MO	02/19/2008	FAILED; EXCEEDED STANDARD	PASS; >50% STANDARD

***Only active or seasonal establishments that are currently operating and subject to sampling with the most recent set >50% of the performance standard without exceeding the standard are listed. These establishments remain in full compliance with the performance standard/baseline guidance.**

Notes for Clarification:

- A. On or about the 15th of each month FSIS updates and posts the "Salmonella Set Category Results for Individual Establishments" for sets completed by the end of the prior month.
- B. At this time FSIS is posting set results for broiler carcasses because a primary focus for the Agency in recent years has been to reverse an upward trend in percentage of sample results positive for Salmonella in broilers; Category 2 and 3 results for other product classes are planned for posting at a later date.
- C. Listed establishments are those with sufficient annual production for FSIS to obtain a timely set (see: http://www.fsis.usda.gov/Science/Scheduling_Criteria_Salmonella_Sets/index.asp).
- D. Establishments are sorted by previous FSIS set result, then numerically by establishment number.
- E. Establishments notifying FSIS that they no longer are producing a raw class of product will be removed from the listing in the next monthly update.

Terminology:

- A. "category" means the assigned level of process control for Salmonella results collected by FSIS (see: 71 FR 9772, 2/26/06; 73 FR 4767 1/28/08).
- B. "at or below half" means the number of positives in the set is at or below half the number of acceptable positives as stated in either 9 CFR (310.25(b)(1) or 381.94(b)(1)) or 70 FR 8058, 2/15/2005.
- C. "above half but not exceeding" means the number of positives in the set is above half but not exceeding the number of acceptable positives as stated in either 9 CFR (310.25(b)(1) or 381.94(b)(1)) or 70 FR 8058, 2/15/2005.
- D. "exceeding" means the number of positives in the set is above the number of acceptable positives as stated in either 9 CFR (310.25(b)(1) or 381.94(b)(1)) or 70 FR 8058, 2/15/2005.
