C1. Description/Specifications

C1.1. Scope of Work

All LN2 delivered under this contract shall be provided in accordance with Military Specification MIL-PRF-27401E , Type II, Grade B, Propellant Nitrogen dated February 23, 2007. This Specification is incorporated in Attachment 0003.

C2. Inspection and Acceptance

C2.1. Material Inspection and Receiving Report

- (a) At the time of each delivery under this contract, the contractor shall furnish to the Government a Material Inspection and Receiving Report (MIRR), DD Form 250, or equivalent commercial document, prepared in triplicate (original and two copies). The contractor may submit a commercial document provided it contains equivalent information in the same level of detail as the DD250. If the contractor elects to use the DD Form 250, it shall be prepared in accordance with NASA FAR Supplement 1846.672-1. The contractor shall include with each MIRR a laboratory analysis report pertaining to each shipment.

The laboratory analysis shall be performed at the loading point of the conveyance for each shipment made under this contract. In the event laboratory facilities are not available to perform this analysis at the loading point, the contractor will make arrangements to have the analysis performed at a location approved by the contracting officer. In any event, the analysis results shall be attached to the DD Form 250, or equivalent commercial document. The particulate test required by MIL-PRF-27401E (February 23, 2007), may be omitted provided a 10 micron nominal, 40 micron absolute, filter is used between the tanker fill manifold and each tanker. Analysis for particulates is not necessary because in-line filters within the commodity transfer lines accomplish particulate control.

Contractor shall overprint, in an appropriate space on each DD Form 250, or equivalent commercial form, any applicable tanker unloading demurrage invoiced in accordance with this contract. Such demurrage will be certified by personnel of the receiving activity who are not in the employ of the contractor. At the Government's option, and when available, Government personnel may be required to certify demurrage charges.

- (b) A Certificate of Conformance (C of C) shall accompany each delivery to verify product quality and quantity. The contractor's quality assurance representative shall sign and date the Certificate of Conformance to verify quantity, quality, and proper documentation (analysis report, etc.) at origin. The signed Certificate of Conformance shall be attached to, or entered on, copies of the DD Form 250, or equivalent commercial document.

The Certificate of Conformance shall read as follows:

"I certify that on [insert date], the [insert contractor's name] furnished the supplies called for by Contract No. [insert contract no.] via [Carrier] on [identify the bill of lading or shipping document] in accordance with all applicable requirements.

I further certify that the supplies are of the quality specified and conform in all respects with the contract requirements, including specifications, drawings, preservation, packaging, packing, marking requirements, and physical item identification [part number] and are in the quantity shown on this or on the attached acceptance document.”

Date of Execution: _____

Signature: _____

Title: _____

- (c) Upon delivery of product to the destination, each copy of the DD Form 250, or equivalent commercial document, shall be signed and dated by the receiver. The original shall remain with the contractor's driver making the delivery, and two copies shall be retained by the receiving destination as proof of delivery.

A legible copy of the applicable contractor quantity delivered measurement ticket will be attached to each copy of the DD Form 250, or equivalent commercial document, submitted for each delivery. The quantity delivered measurement ticket shall include the associated shipment number and tanker number as cross reference to the DD Form 250, or equivalent commercial document. The foregoing documentation will be submitted with all invoices.

C5. Special Contract Requirements

C5.1. Flash Reports

The contractor shall provide the contracting officer, or his designated representative, with an immediate verbal Flash Report of any accident or incident which may have an adverse impact on the contractor's ability to deliver liquid cryogenic propellant to the Government, such as a plant outage (scheduled or unscheduled), trailer malfunction, or of any other occurrence in which the Government could reasonably be expected to have an interest by virtue of this contract. Such Flash Reports will be confirmed in writing, in appropriate detail. Except as otherwise provided in this contract, the cost of data to be furnished in response to this contract is included in the price of this contract.

C5.2. Scheduled Plant Outages and Annual Turn-Around Maintenance

The contractor may schedule plant outages as required; however, during these outages, the contractor shall continue to deliver Government ordered cryogenic propellants from contractor storage, or from another contractor production facility. The contractor shall provide written notice to the contracting officer at least 30 days prior to enacting such outages.

C5.3. Unforecasted Destinations

The contractor shall deliver product to destinations that are not specified in the contract when

requested by the contracting officer. Orders to unforecasted destinations are subject to the limitations set forth in Delivery-Order Limitations. The contractor shall bill the Government the product price per ton and the transportation price per mile round-trip for such deliveries to unforecasted destinations. The contractor shall base actual miles traveled over the most direct and economical route available, utilizing mileage based on the current issue of the Rand-McNally Practical Routing Mileage Guide. Any alternate means of mileage measurement utilized shall have prior written approval of the contracting officer.

When a requirement to an unforecasted destination becomes known, the contracting officer has the authority to contract with any source to obtain the lowest price to the Government, (i.e., delivered product price to requiring location).

The transportation price/mile for unforecasted destinations stated in [Attachment 001. RFQ Priced Sheet](#) shall also be used to compute the transportation price for the Government's inability to accept delivery in accordance with [C5.5. Government's Inability to Accept Delivery](#).

C5.4. Demurrage

The Government will pay the contractor demurrage for all delays in unloading propellant delivery tankers in excess of three (3) hours after arrival and check-in at place of delivery, if such delay is without the fault or negligence of the contractor and is not caused by the failure of the contractor's equipment. If more than one tanker is scheduled for the same arrival time, demurrage charges shall begin three hours after arrival time of the last trailer in the group, and end at the release of the last trailer in the group. This unloading demurrage charge will be paid the contractor per quarter-hour or fraction thereof. No demurrage charges will be billed or paid for the loading of any propellant delivery tankers. If the free time has been exceeded, the driver, upon leaving the site, will leave the consignee written documentation showing the date, time of arrival, time of departure, cause of delay, if known, and information identifying the shipment. The driver will sign such documentation and will request the consignee to do likewise. A copy thereof, as proof of delay, will accompany all invoices for demurrage. Reasons for such delay shall be annotated in Block 23C of the DD Form 250, or in an appropriate place on equivalent commercial document, and signed by the driver.

Contractor will ensure that all deliveries from a multi-source operation will be effected at the lowest overall cost to the Government.

C5.5. Government's Inability to Accept Delivery

When the contractor makes a delivery to a single destination and the tanker cannot be accepted due to storage tank problems or for other reasons under the control of the receiving organization, and through no fault of the contractor, product charges will not be incurred; however, transportation charges will be based on the round-trip miles set forth below at the transportation price/mile for unforecasted destinations set forth in [C5.3. Unforecasted Destinations](#). The round-trip mileage from the primary plant source identified in [C4.4. Plant Source](#) to each specified receiving destination shall be based on the current Rand-McNally Practical Routing Mileage Guide.

C5.6. Determination of Billing

The delivered product price per unit includes all product and transportation costs for the quantities delivered and accepted. The unit price shall be F.O.B. destination. Scales or meters

used in determining weight or volume shall be certified and must meet all specifications and user requirements and tolerance as stated in the National Institute of Standards and Technology (NIST) Handbook 44. Such scales or meters shall be calibrated annually and records of this calibration shall be maintained for a minimum of one year and made available to the contracting officer or designated representative upon request.

After delivery of product, quantity delivered in units measured by scale or meter shall be annotated on DD form 250, or equivalent commercial document. If units measured by scale or meter are not tons then the quantity delivered shall be converted into tons and also annotated. An employee of the receiving destination will acknowledge receipt of the shipment and indicated quantity by executing a dated signature in Block 22 of the appropriate DD Form 250, or equivalent commercial document.

The contractor's method of product measurement must be acceptable to the contracting officer.

C6. Other Contract Clauses

C6.1. FAR 52.216-21 Requirements (Oct 1995)

(a) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(c) Except as this contract otherwise provides, the Government shall order from the Contractor all the supplies or services specified in the Schedule that are required to be purchased by the Government activity or activities specified in the Schedule.

(d) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(e) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(f) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract

shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; *provided*, that the Contractor shall not be required to make any deliveries under this contract after 30 days.

C6.2. FAR 52.252-2 Clauses Incorporated by Reference (Feb 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. When requested, the ombudsman will maintain strict confidentiality as to the source of the concern. The existence of the ombudsman is not to diminish the authority of the contracting officer, the Source Evaluation Board, or the selection official. Further, the ombudsman does not participate in the evaluation of proposals, the source selection process, or the adjudication of formal contract disputes. Therefore, before consulting with an ombudsman, interested parties must first address their concerns, issues, disagreements, and/or recommendations to the contracting officer for resolution.

C6.4. 1852.223-70 Safety and Health (APR 2002)

- (a) Safety is the freedom from those conditions that can cause death, injury, occupational illness, damage to or loss of equipment or property, or damage to the environment. NASA's safety priority is to protect: (1) the public, (2) astronauts and pilots, (3) the NASA workforce (including contractor employees working on NASA contracts), and (4) high-value equipment and property.
- (b) The contractor shall take all reasonable safety and occupational health measures in performing this contract. The contractor shall comply with all Federal, State, and local laws applicable to safety and occupational health and with the safety and occupational health standards, specifications, reporting requirements, and any other relevant requirements of this contract.
- (c) The contractor shall take, or cause to be taken, any other safety, and occupational health measures the contracting officer may reasonably direct. To the extent that the contractor may be entitled to an equitable adjustment for those measures under the terms and conditions of this contract, the equitable adjustment shall be determined pursuant to the procedures of the changes clause of this contract; provided, that no adjustment shall be made under this Safety and Health clause for any change for which an equitable adjustment is expressly provided under any other clause of the contract.
- (d) The contractor shall immediately notify and promptly report to the contracting officer or a designee any accident, incident, or exposure resulting in fatality, lost-time occupational injury, occupational disease, contamination of property beyond any stated acceptable limits set forth in the contract Schedule; or property loss of \$25,000 or more, or Close Call (a

situation or occurrence with no injury, no damage or only minor damage (less than \$1,000) but possesses the potential to cause any type mishap, or any injury, damage, or negative mission impact) that may be of immediate interest to NASA, arising out of work performed under this contract. The contractor is not required to include in any report an expression of opinion as to the fault or negligence of any employee. In addition, service contractors (excluding construction contracts) shall provide quarterly reports specifying lost-time frequency rate, number of lost-time injuries, exposure, and accident/incident dollar losses as specified in the contract Schedule.

- (e) The contractor shall investigate all work-related incidents, accidents, and Close Calls, to the extent necessary to determine their causes and furnish the contracting officer a report, in such form as the contracting officer may require, of the investigative findings and proposed or completed corrective actions.
- (f)
 - (1) The contracting officer may notify the contractor in writing of any noncompliance with this clause and specify corrective actions to be taken. When the contracting officer becomes aware of noncompliance that may pose a serious or imminent danger to safety and health of the public, astronauts and pilots, the NASA workforce (including contractor employees working on NASA contracts), or high value mission critical equipment or property, the contracting officer shall notify the contractor orally, with written confirmation. The contractor shall promptly take and report any necessary corrective action.
 - (2) If the contractor fails or refuses to institute prompt corrective action in accordance with subparagraph (f)(1) of this clause, the contracting officer may invoke the stop-work order clause in this contract or any other remedy available to the Government in the event of such failure or refusal.
- (g) The contractor (or subcontractor or supplier) shall insert the substance of this clause, including this paragraph (g) and any applicable Schedule provisions and clauses, with appropriate changes of designations of the parties, in all solicitations and subcontracts of every tier, when one or more of the following conditions exist:
 - (1) The work will be conducted completely or partly on premises owned or controlled by the Government.
 - (2) The work includes construction, alteration, or repair of facilities in excess of the simplified acquisition threshold.
 - (3) The work, regardless of place of performance, involves hazards that could endanger the public, astronauts and pilots, the NASA workforce (including contractor employees working on NASA contracts), or high value equipment or property, and the hazards are not adequately addressed by Occupational Safety and Health Administration (OSHA) or Department of Transportation (DOT) regulations (if applicable).
 - (4) When the contractor (or subcontractor or supplier) determines that the assessed risk and consequences of a failure to properly manage and control the hazard(s) warrants use of the clause.

- (h) The contractor (or subcontractor or supplier) may exclude the provisions of paragraph (g) from its solicitation(s) and subcontract(s) of every tier when it determines that the clause is not necessary because the application of the OSHA and DOT (if applicable) regulations constitute adequate safety and occupational health protection. When a determination is made to exclude the provisions of paragraph (g) from a solicitation and subcontract, the contractor must notify and provide the basis for the determination to the contracting officer. In subcontracts of every tier above the micro-purchase threshold for which paragraph (g) does not apply, the contractor (or subcontractor or supplier) shall insert the substance of paragraphs (a), (b), (c), and (f) of this clause.
- (i) Authorized Government representatives of the contracting officer shall have access to and the right to examine the sites or areas where work under this contract is being performed in order to determine the adequacy of the contractor's safety and occupational health measures under this clause.
- (j) The contractor shall continually update the safety and health plan when necessary. In particular, the contractor shall furnish a list of all hazardous operations to be performed, and a list of other major or key operations required or planned in the performance of the contract, even though not deemed hazardous by the contractor. NASA and the contractor shall jointly decide which operations are to be considered hazardous, with NASA as the final authority. Before hazardous operations commence, the contractor shall submit for NASA concurrence -
 - (1) Written hazardous operating procedures for all hazardous operations; and/or
 - (2) Qualification standards for personnel involved in hazardous operations.

E1.5. Quote Preparation

The quoter shall provide all price information required on [Attachment 001. RFQ Priced Sheet](#) that follows these instructions. Do not enter pricing information in [B4.3 Best Estimated Quantities](#). Quoter shall complete attachment as follows:

- (a) Table 001. Priced Quote
 - (1) CLIN 1001: Quoter shall enter their product price per ton for delivery of LN2 to supply the delivery point's requirement. The price shall include all product costs, storage, transportation, indirect costs, and profit as applicable. Quotes that fail to state a product unit price will be considered a "no-quote" for the requirement. Quoter shall enter the city and state of the plant source (transfill, distribution, or refinery) that will service the delivery point.
 - (2) CLIN 1002: If quoter elects to quote on the total requirement, they shall enter their product price per ton for delivery of the total requirement of LN2 to supply to the delivery point. The price shall include all product costs, storage, transportation, indirect costs, and profit as applicable. Quotes that fail to state a product unit price will be considered a "no-quote" for the requirement. Quoters who elect to quote on the total requirement must also quote on half the requirement to be considered for either. Quoter shall enter the city and state of the plant source (transfill, distribution, or refinery) that will service the delivery point.
 - (3) CLIN 1003: Quoter shall enter their product price per ton for delivery of half the requirement of LN2 to supply to the delivery point. The price shall include all product costs, storage, transportation, indirect costs, and profit as applicable. Quoters that fail to state a product unit price will be considered a "no-quote" for the requirement. Offers may quote on half the requirement without quoting on the total requirement. Quoters

shall enter the city and state of the plant source (transfill, distribution, or refinery) that will service the delivery point.

- (b) Table 002. Demurrage: Quoter shall complete the demurrage sheet by inserting the applicable demurrage terms as appropriate. Any special conditions regarding demurrage shall be explained by the quoter. Quoter is authorized to insert ALL in the delivery point field, only if the applicable charges apply to all delivery locations.
- (c) Table 003. Inability to Accept Delivery: Quoter shall complete the table by inserting the applicable information in the appropriate fields. Quoter shall enter round-trip miles between the primary plant source and the receiving destination based on the current Rand-McNally Practical Routing Mileage Guide. Quoter shall enter their transportation price per mile. Quoter is authorized to insert ALL in the delivery point field, only if the applicable charges apply to all delivery locations.
- (d) Table 004. Unforecasted Destinations: Quoter shall insert the applicable information in the appropriate fields.
- (e) Table 005. Discount Terms: Quoter shall enter discount terms. If no discount is provided, enter NT30 (Net 30 days) in the discount field. Quoter is authorized to insert ALL in the delivery point field, only if the applicable charges apply to all delivery locations.

E1.6. Evaluation

Selection and award will be made to the lowest priced quoter with acceptable past performance as described below.

- (a) Lowest price
 - (1) Award will be based on the lowest evaluated price per CLIN except as described in paragraph (a)(2) of this section for CLINS 1002 and 1003, based on the best estimated quantities specified in [Attachment 001. RFQ Priced Sheet](#) for the basic requirement. Quoter is advised that the Government will determine the most advantageous price for requirements by multiplying the quoter's unit price per year times the best estimated.
 - (2) Determination of lowest price for CLIN 1002 and 1003: In addition to the provisions contained in FAR 52.212-1, quoters are advised that the Government may award one contract for total LN2 for Stennis Space Center, or two separate contracts; one for each half of the LN2 requirement for Stennis Space Center. The Government will determine the most advantageous price by multiplying the quoters unit price times the Best Estimated Quantities specified in [B4.3. Best Estimated Quantities](#). The quote for the total requirement will be compared to the sum of the lowest 2 quotes for half the requirement.
- (b) Past Performance
 - (1) Past performance information should identify the three most relevant contracts performed one year (minimum) prior to issuance of this solicitation for the same or similar requirement. As a minimum, past performance references should include the following:

- (i) Brief narrative of work performed and an explanation of what aspects of the contract is deemed relevant to the proposed effort; customer (company name); contract number; performance period; total contract value; technical point of contact and phone number; and business point of contact and phone number.
 - (ii) The quoter has both the duty and discretion to determine which of its prior contracts are most relevant to the currently described requirements. If the quoter is unable to submit three relevant contracts for past performance evaluation, it may submit a lesser number. If the quoter possesses no relevant past performance, it should affirmatively state this fact. If applicable, the quoter shall also provide information on problems encountered on the identified contracts and the quoter's corrective actions.
- (2) The Government may obtain additional information for use in the evaluation of past performance from any source, including sources outside of the Government. The Government may obtain whatever information it deems most relevant to the required effort by telephonic and/or written inquiry. This information may include reviewing the Past Performance Information Retrieval System (PPIRS) or past performance information from any source whatsoever.

Although the Government has the ability to seek information from any source, this does not place any duty upon the Government to locate past performance information. The burden of providing all such information is always upon the quoter in question.

The ability of the Government to seek past performance information from any source is not limited by any restrictions upon the quoter in the solicitation regarding the number or nature of contracts to be submitted for review. For example, if the solicitation limits each quoter to submitting three relevant contracts performed during the past two years, the Government may nevertheless independently locate and evaluate four contracts performed by the quoter in the past three years.

The Government will seek to engage in an even-handed and fair evaluation process; however the Government has absolutely no obligation to engage in "equal" comparisons of past performance of all quoters. For example, if the Government receives information from outside sources regarding the past performance of two additional contracts of a quoter, the Government is not then obligated to search for the past performance of two additional contracts for every other quoter.
