iEdison Ver. 2.0.6.0 Release Notes

General Updates

1. A web service has been created that will allow Extramural Web users to upload iEdison Invention and Patent Reports without requiring any manual intervention on the part of the user. This service requires that the user's Institution have the capability to perform a batch upload. The service will perform a similar function to the "Upload iEdison Invention Report Datastream" menu item in the Extramural Web. The service will utilize the user's pre-existing login credentials for the Extramural Web.

To view the Web Services Description Language (WSDL) document for this web service, please visit the following URL.

https://s-edison.info.nih.gov/iEdison/officerWebService?wsdl

The WSDL is an XML document that describes the parameters required by the web service, as well as the possible results returned from the service.

Add Utilization Report

1. Previously, the iEdison system did not allow the creation of a Utilization Report without first entering the year of first commercial sale. This has been corrected so that Utilization Reports without a first commercial sale year may be created.
