

# GOALS II

## Statement of Difference Output File Format

pflt\_sod510: returns flat-file data for the sod 510 (IPAC) report.

--- Input:

--- @appl\_user\_id: user identifier; if null or blank, superuser access.  
--- @alc: agency location code; if null or blank, all are selected.  
--- @acctng\_year: YYYY format.  
--- @acctng\_month: MM format.  
--- @sort\_order 1: doc\_num, doc\_date; 2: doc\_date, doc\_num.

--- Notes:

--- Temp table columns named nseq (node sequence) and ndiv (node division)  
--- build an ordered tree (parent-child relationships), and are used for  
--- setting up the proper #lines output sequence.
