TARGETED HIGH UNEMPLOYMENT AREAS IN CALIFORNIA
FISCAL YEAR 2008-09

The Panel will target those areas of the State which, based on the most recent LMID unemployment statistics, contain unemployment rates significantly higher than the unemployment rate for California. These areas account for about one-third of the unemployed in California, and include unemployment rates that significantly exceed the state average. For the State fiscal year **2008-09**, there are two major groupings of HUAs:

1) Counties with unemployment rates that are 25 percent higher than the state average, based on LMID data from EDD. As of **July 18 2008,** counties must have an unemployment rate of at least **8.75** percent, which is 25 percent higher than the State average of **7** percent. Based on this criteria, HUAs include, but are not limited to, the following counties:

COUNTIES WITH RATES 25% HIGHER THAN STATE AVERAGE
Alpine
Colusa
Fresno
Glenn
Imperial
Kern
Kings
Lake
Madera
Merced
San Benito
San Joaquin
Shasta
Stanislaus
Sutter
Tehama
Trinity
Tulare
Yuba

2) If a county has an unemployment rate which is not 25 percent higher than the state average, but, within this county, there is a definable area with an unemployment rate at least 25 percent higher than the State average, based on LMID and census data information, at the time the application for funding is received by ETP, then this area will be considered a high unemployment area. The following list includes areas considered as areas of high unemployment.
