PROGRAM INTEGRATION AND CONTROL

Attachment J-8 - Applicable and Reference Document Lists

This attachment contains applicable documents for the contract effort. The contractor shall comply with these requirements in performing SOW requirements. This attachment is structured as follows:

Table J8-1: Applicable Documents List

Table J8-2: Reference Documents List

The documents identified within Table J8-1 are cited within the body of this contract or within a document that is cited in this contract (second tier). Requirements written in these documents have full force and effect as if their text were written in this contract to the extent that the requirements relate to context of the work to be performed within the scope of this contract. When a document is classified as "reference", the document is provided for information about the ISS Program execution and the Program Integration and Control's role in the ISS Program.

The general approach for interpreting whether a document impacts the contractor's performance is that if a document is "applicable", then the contractor has solid requirements that derive from that document. Applicable documents contain additional requirements and are considered binding to the extent specified. Applicable documents shall be cited in the text of the document in a manner that indicates applicability such as follows:

- in accordance with
- as stated in
- as specified in
- as defined in
- per
- in conformance with

When a document is classified as "reference", the document is provided for general context of the ISS Program execution and for influence on the performance of the Program Integration and Control contract in its role of support to the ISS Program. Sample documentation that may be used or produced by the contractor is included as reference documents to allow the contractor to gain insight into the Program Integration and Control functions and products. Reference documents shall not contain additional requirements and will not be considered binding. Citations of Reference documents shall clearly indicate that the material is for information or reference only such as follows:

- reference
- using (as a guide)
- for additional information
