

Small Business Profile: ARIZONA

In Arizona, small businesses are vital to the financial well-being of the state's economy. Their contribution is essential for economic growth since they make up almost all employer firms in the state. As entrepreneurs and innovators, small business owners represented a diverse group in 2004 and continued to keep the state's economy productive. The *Small Business Profile* provides information on the performance of small businesses in the state using the most current federal data available.

Number of Businesses. There were an estimated 396,318 small businesses in Arizona in 2004.¹ Of the 110,153 firms with employees, an estimated 97.2 percent, or 107,018, were small firms. In 2004, the estimated number of employer businesses increased by 0.4 percent. The number of self-employed persons (including incorporated) increased overall by 1.6 percent, from 293,006 in 2003 to 297,672 in 2004. Non-employer businesses numbered 289,300 in 2002, an increase of 4.5 percent since 2001, based on the most recent data available. (Sources: U.S. Dept. of Labor, Employment and Training Administration; U.S. Dept. of Commerce, Census Bureau; U.S. Dept. of Labor, Bureau of Labor Statistics.)

Women-Owned Businesses. In 2002 women-owned firms totaled 109,807, an increase of 24 percent from 1997, and generated \$16.2 billion in revenues. Firms owned jointly by women and men numbered 59,754 with revenues of \$18.3 billion. Women represented 37.4 percent of the self-employed persons in the state. (Sources: U.S. Dept. of Labor, Bureau of Labor Statistics; U.S. Dept. of Commerce, Census Bureau.)

Minority-Owned Businesses. In 2002, Hispanic-owned firms numbered 35,102, an increase of 21 percent from 1997. Black-owned firms numbered 6,338, an increase of 77 percent; Asian-owned firms numbered 10,223, an increase of 48 percent; American Indian and Alaska Native-owned firms numbered 6,614, an increase of 20 percent; and there were 348 Native Hawaiian and other Pacific Islander-owned businesses.² (Source: U.S. Dept. of Commerce, Census Bureau.)

¹ The Office of Advocacy's estimate of the total number of state small businesses is based on the percent of small businesses (2002 Census Bureau firm size data) multiplied by the total number of employer businesses in 2004 (Employment and Training Administration). To this total is added the 2002 number of non-employer firms (Census Bureau). See *Business Estimates from the Office of Advocacy*, www.sba.gov/advo/research/rs258tot.pdf.

² Minority owners may be in more than one minority group.

Business Turnover. There were an estimated 12,421 new employer businesses in 2004, 6.8 percent less than the previous year. Business terminations numbered 17,553 in 2004, an increase of 13.3 percent. Business bankruptcies decreased by 31.5 percent and totaled 480 in 2004. (Sources: U.S. Dept. of Labor, Employment and Training Administration; Administrative Office of the U.S. Courts; U.S. Dept. of Commerce, Census Bureau.)

Employment. Small firms with fewer than 500 employees numbered 93,178 in 2002 and employed 930,225 individuals, or 47.8 percent of the state's non-farm private sector (Table 1).³ Net job gains among firms with fewer than 20 employees totaled 22,473, while large firms with 500 or more employees lost 14,640 jobs between 2001 and 2002 (Table 2). (Source: U.S. Dept. of Commerce, Census Bureau, Statistics of U.S. Businesses.)

Small Business Income. Non-farm proprietors' income, a partial measure of small business income, increased by 5.5 percent, from \$11.9 billion in 2002 to \$12.6 billion in 2003. (Source: U.S. Dept. of Commerce.)

Finance. Commercial bank lenders are an important source of small business loans, and small firms usually rely on them for financing. Over the last 10 years the number of banks in Arizona has increased (Table 3). The Office of Advocacy has identified banks in each state that make the most loans to small businesses. This information is available in its banking studies at www.sba.gov/advo/research/lending.html.
