

NRC INSPECTION MANUAL

DI

PART 9900: 10 CFR GUIDANCE

10.CFR

TITLE 10 OF THE CODE OF FEDERAL REGULATIONS

A. PURPOSE

To provide guidance on certain sections of Title 10, Code of Federal Regulations.

B. OBJECTIVE

Guidance presented in this chapter does not constitute written interpretation by the Office of the General Counsel even though some of the guidance may have received concurrence by the legal staff and other regulatory components before it was issued. Although this guidance is not an official interpretation, it has been sufficiently developed and reviewed so that it can be used in determining whether a licensee or construction permit holder has complied with its requirements or commitments. It is not intended that all sections of the regulations will be discussed; rather, the chapter will include discussions of those sections that appear to require guidance, or where guidance is requested by the region, and for which a well defined position exists.

C. GUIDANCE

Each directive issued for this manual chapter will be identified by Part and Section for which the particular guidance is provided. This identification will appear at the top of the first page of each directive. Directives should be filed after the 10 CFR tab according to the numeric sequence of the directive.
