SUBJECT: MID-CYCLE PERFORMANCE REVIEW AND INSPECTION PLAN - GINNA

Dear Dr. Mecredy:

On November 6, 2000, the NRC staff completed its Mid-Cycle plant performance assessment of Ginna. The Mid-Cycle Review for Ginna involved the participation of the responsible technical divisions in Region I in evaluating performance indicators (PIs) and inspection results for the period of April 2, 2000 through September 30, 2000. The purpose of this letter is to inform you of our assessment of your safety performance during this period and our plans for future inspections at your facility so that you will have an opportunity to prepare for these inspections and to inform us of any planned inspections which may conflict with your plant activities.

Plant performance for the most recent quarter was within the Regulatory Response column of the NRC's Action Matrix based on the white performance indicator for alert and notification system reliability in the emergency preparedness cornerstone. Based upon our review of your staff's actions to address this performance indicator (reference Supplemental Inspection Report 05000244/2000-007, dated October 20, 2000), no additional inspector follow-up is planned at this time. We noted that alert and notification system modifications were being planned to enhance the system's overall reliability.

Enclosure 1 details the scheduled inspections that will occur through September 30, 2001. The inspection plan is provided to minimize the resource impact on your staff and to allow for scheduling conflicts and personnel availability to be resolved in advance of inspector arrival onsite. Routine resident inspections are not listed due to their ongoing and continuous nature. The last six months of the inspection plans are tentative and may be revised at the end-of-cycle review meeting.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be made available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

Dr. Robert C. Mecredy

2

If circumstances arise which cause us to change this inspection plan, we will contact you to discuss the change as soon as possible. Please contact William Cook at (610)337-5074 with any questions you may have regarding this letter or the inspection plan.

Sincerely,

/RA/

A. Randolph Blough, Director
Division of Reactor Projects
