Question1: If farm producers can not obtain a more favorable ratio of crops price/input costs we will lose another generation of farmers. \$60 barrel oil and \$2 corn, \$3 wheat and \$6 beans will not compute profitably enough to let farmers survive financially.

Question2:

Question3:

Question4: Capital is needed to build many more the ethanol and bio diesel plants. Current fuel and fertilizer costs are driving farmers into retirement prematurely.

Question5: Give strong tax rebates to producers for the use of fuel, herbicides and fertilizer in the production of all crops.

Question6: Educate consumers of the benefits of ethanol and bio-diesel.
