

NWCG
STATE CODE
Standard Data Values

July 29, 2002

Standard data values are provided when a data element has a pre-determined set of terms, codes, and/or numbers that must be used in order for the data to be valid. The purpose of standard data values is to ensure consistency and accuracy within the system and across multiple systems.

This standard adopts the two-letter state alphabetic codes in Federal Information Processing Standards (FIPS) publication 5-2, Codes For The Identification Of The States, The District Of Columbia And The Outlying Areas Of The United States, And Associated Areas. For more detailed information about the standard, visit the FIPS website at: <http://www.itl.nist.gov/fipspubs/fip5-2.htm>.

The following list provides the standard State Codes identified in FIPSPUB 5-2.

Name	FIPS Code
Alabama	AL
Alaska	AK
Arizona	AZ
Arkansas	AR
California	CA
Colorado	CO
