*Low precision; no estimate reported.

¹ Past month cigarette smokers reporting inconsistently (i.e., reporting both purchase and nonpurchase methods) were not classified by source of cigarettes.

² Only past month cigarette smokers who reported no cigarette purchase on their behalf or no personal purchase of cigarettes were classified as reporting no cigarette purchase.

³ Past month cigarette smokers aged 12 to 17 were asked whether a friend or relative had bought cigarettes for them in the past month and if they personally had bought the cigarettes they smoked during the past month from various sources; thus, the response categories are not mutually exclusive.

¹ Past month cigarette smokers aged 12 to 17 were asked whether a friend or relative had bought cigarettes for them in the past month and if they personally had bought the cigarettes they smoked during the past month from various sources. Respondents indicating no purchase on their behalf or no personal purchase could indicate multiple methods of obtaining cigarettes besides purchasing them; thus, the responses categories are not mutually exclusive.
